SS. PETER AND PAUL CHURCH.

REV. FATHER REDING.

Death of Mrs Christie.

Mrs. J. K. Christie of Minneapolis died last Friday morning at her home cause of death being childbirth. Deceased was well known in this city, being a sister to our townsman, T. E. Mullen, and was reared and educated in this city, and was married to J. K. Christie thirteen years ago. She resided in Merrill for about five years and then moved to Minneapolis, where the family has since resided. Mrs. Christie is survived by her husband and one daughter.

Mr. and Mrs. T. E. Mullen left for Minneapolis on Friday to attend the funeral which was held on Tuesday.

Mrs. Christie had many friends in this city and the family has the sympathy of all in their affliction.

A son to Mr. and Mrs. Geo. Baker Jr., last week.

Death of Patrick Rouhan.

Patrick Rouhan, one of the old residents of the town of Sigel, died on Tuesday morning after an illness extending over considerable time.

Deceased was 82 years of age, and was a native of Ireland, but had made his home in this county for many years. He is survived by four children, they being John Rouhan of Sigel, William Rouhan who resides in Michigan and Mrs. Thomas Hanulfin and Mrs. Frank Lessig of the town of Sigel.

Mrs. George Pomainville and twin babies departed on Thursday for their home in Waumondee after making an extended visit with relatives in the city.

Fossert Bros. returned from Pittsville on Monday with their crew of men where they have been putting in cement sidewalks for the past month.

Rounding Up Juvenile Band.

Prof. Bliss reports that he has already had applications for about fifteen boys who want to join the juvenile band that he is to organize in the near future, and he expects to start the boys in about the first week in October. It is his intention to make the tuition only twenty-five cents a week, which will be about a dollar a month, or $12 a year. For this the boys will get two rehearsals a week, which should soon put them where they could be making some noise. It is the desire to get about thirty boys interested in the matter, so that there will be enough to make a good representation on each instrument.

Those interested in the matter should see Prof. Bliss at once so that the boy may be able to start in with the rest of the crowd.

SOCIAL EVENTS.

Last Friday night Mr. and Mrs. Yonker received, at their home on Third street, the teachers of the schools of the city. The house was beautifully decorated with asters and ferns. Mrs. Rockwell, assisted by Misses Helen Taylor and Vera Rockwell, presided at the punch bowl, and later in the evening assisted in the serving of dainty refreshments Everyone present spent a most delightful evening. The guests other than the teachers of the city schools were: Rev. and Mrs. Fred Stutf, Mr. and Mrs. M. H. Jackson, Miss Michaels and Mr. and Mrs. E. L. Hayward.

On Sunday Stevens Point will play the second of a series of three games with the Tigers, when it is expected that there will be another close contest.

Mrs. Leon LaSarge entertained a few ladies at her east side home on Tuesday afternoon in honor of her cousin, Miss Mabel Hutchinson of Elroy.

Death of Nicholas Winkle.

Nicholas Winkle, one of the old residents of Grand Rapids, died early Tuesday morning at the home of Mrs Lizzie Coony.

Deceased was a native of Germany and was in his 83d year at the time of his death. He had been a resident of Grand Rapids since 1854.

The funeral will be held tomorrow morning from the Catholic church, Rev. Reding officiating.

Jos. Landry is taking in the sights at the state fair this week.

Won From Stevens Point.

The Tigers went to Stevens Point on Sunday and won a game from the Stevens Point boys by a score of 6 to 1. It was a Grand Rapids Game all the way thru and the Stevens Pointers had to work exceedingly hard in order to keep from being shut out entirely.

Manahan started pitching for the Tigers, and was throwing a good game, but in the third inning he felt that his arm was giving out and called in the captain and asked that somebody be put in his place. Byers was put in the box and he threw the other six innings in good shape, thus getting their only run off him.

This is the first of a series of three games that these two teams intend playing, the next of the series to be in this city on Sunday next. The boys and the visitors who went over with them report that they were treated in first class style by the Stevens Point people, and a large crowd turned out to see the game, notwithstanding the fact that the weather was anything but good for baseball, and looked very much like rain. Admirers of baseball should not fail to see the game next Sunday.

Pellersells-Smith.

Henry Pellersells and Miss Lillian Smith, both of this city, were married on Wednesday last at LaCrosse.

Both of the contracting parties are well known in this city, the groom being one of our old residents, while the bride is the daughter of Mr. and Mrs. Patrick Smith and has made her home in this city for a number of years past. The Tribune unites with their many friends in extending congratulations.

Mr and Mrs. Pellersells arrived home on Monday evening from their wedding trip and will make their home on the east side in this city.

Gentlemen Invited.

The ladies want it understood that they will cordially welcome the husbands of the members and their friends who may be invited, each member being privileged to bring one guest. The address by Miss Stearns on "Regulate your Hurry" is sure to be of interest to the gentlemen as well as ladies.

CHANCES ARE GOOD

No Need to Worry Because You Were not Started Among First in Contest.

We have been asked by some if it is now too late to enter in the piano contest and compete for one of the prizes. We answer that it is not too late, that you can start in at any time, and if you have been saving votes to send them in and get your name among the contestants. The object in getting your name in is that your friends may see it and in case they have not been calling for votes it will be possible for them to do so, and thus help you along. Some who have striven for the ten dollars and failed to get it were under the impression that that was all there was to it, but they should bear in mind that the votes they have secured will count on the piano and other prizes that are being offered.

There are a number of good prizes offered, some of which are of even more practical value than a piano, so that those who are hustling for votes but do not occupy the first place, need not feel at all discouraged. The standing of the contestants will be given each week.

ON THE TRAIL OF THE AMERICAN MISSIONARY

By WILLIAM T. ELLIS

This Distinguished American Journalist Is Traveling Around the World for the Purpose of Investigating the American Foreign Missionary Enterprise. His Articles, Which Are Being Published Exclusively in This Paper, Are Illustrated with Drawings and from Photographs.

CRITICISM OF MISSIONS RAMPANT IN PORT CITIES

Tientsin, China.—Here is the place to come to learn "the other side" of foreign missions. This city and Shanghai are doubtless the two greatest centers of anti-missionary sentiment in the world. The criticisms of missions and missionaries most commonly heard have to do with China and with China's capital. Three out of four stories reflecting upon missions are located in China, and two out of three are likely to concern Peking and its neighborhood.

Now, that means Tientsin. The foreign population of Peking is very small, including few persons besides missionaries and ambassadors. But Tientsin, the port of Peking and of North China, has the second largest foreign population in the empire. It is a city of imposing European buildings, of foreign stores, of modern streets and homes, of clubs and churches. In short, it is a bit of the west which greets a traveler like an oasis in the desert of the east.

A Missionary Charged with Graft.

On the ship between Chefoo and Tientsin I was talking over a variety of far eastern topics with a British merchant who had lived for more than 20 years in Tientsin. He was plainly a gentleman, a man of family, of breeding and social standing, and to all respects his views had been temperate. Without his knowing my interest in the subject, the conversation drifted to missionaries. "Really, some one should look into this missionary business. It is not what people at home think it is. You go up to Pekine, and you will find the missionaries living in compounds as big as legations. And during the Boxer trouble they looted frightfully.

"There was one missionary, a Mr. Blank, who was made interpreter to a British punitive expedition, with the honorary rank of second Lieutenant. At every village he would demand a large sum of money. In the name of the commanding officer, which he would quietly pocket himself. At length word of this reached the British authorities, and the missionary was asked for an explanation. He flatly denied everything. Then he was given his choice of standing a fair court martial, with the assurance that he would be shot if found guilty, or of being deprived of his rank and of being disbarred from the service in ignominy. He chose the latter, thus practically confessing his guilt. Missionaries all say: 'Poor Mr. Blank,' and look upon him as a martyr; although the board that employed him took a different view of the matter, and discharged him. He lives in Tientsin today, and is a rich man."

Trouble Through Ex-Missionaries.

Now this attitude of many English-speaking residents of the east toward missions means something. It is not a sufficient answer to filing charges, as missionary supporters commonly do, at the moral character of the white communities in port cities. The man above quoted is, as has been said, a honorable man of position, and his statements were specific.

In the particular case he cited, an investigation showed that his statements were warranted, except as to the attitude of the missionaries toward the alleged culprit in question. What the merchant said was mildness as compared with what the missionaries said to me. They seem to have a more intimate knowledge of the crookedness of the ex-missionary than others, and they have the additional grievance that he has brought disgrace upon their calling. Similarly, the missionaries went farther than others in condemnation of another notorious character in this city, an ex-missionary now in corporation service, who is commonly alluded to as "the prize coward of the Peking siege," and whose business methods are reputed to be devious.

Of this attitude of the missionaries, apparently, the community is unaware. In its sensitiveness to criticism the missionary body presents a solid front, making no explanations, and the world does not know that the black sheep have been cast out of the flock. It appears that this place, like other port cities, contains a number of ex-missionaries who have been dismissed from board service, or who have of their own will retired to enter business. There is nothing dishonorable in the latter practice, although it is a clear violation of accepted missionary ethics. The onus of the shortcomings of all these, who are naturally still called "missionaries," attaches to the missionary body, the members of which I have been repeatedly assured, look with utmost disfavor upon the entrance of any one of their number into money making pursuits.

The wiser way would be for the missionaries openly to disavow responsibility for the course of all except bona fide members of established missions; and hospitably to meet honest criticism with frank explanations and with respect for the motives of the critics. Instead of maintaining an attitude of silence, seclusion and self-sufficiency. In the matter of the gulf that exists between the foreign community and the missionaries, the latter appear to be more blameworthy than the former, for it is their business to be friendly with all men and to guard the good reputation of their work. Yet in truth they sometimes seem the more censorious of the two. Some of the sweeping assertions of the missionaries concerning the evil lives of non-missionary foreigners are as astounded as many of the criticisms which the latter make of the missionaries. Investigation reveals the fact that in Tientsin more effort is put forth in behalf of the moral welfare of the Anglo-Saxon young men and for the reclamation of those who have strayed, by the non-missionary residents than by the missionaries themselves.

Where the Missionaries Are at Fault.

An interested critic could probably prove the charges of narrowness, exclusiveness and censoriousness against many members of the missionary body here, admitting the noteworthy exceptions. All this might be comprehended within the phrase, general unfitness for missionary work in a port city. It is a singular lack of perception on the part of the mission boards in America and Europe which often put in the open ports missionaries who by social gifts, intellectual equipment and by temperament are least likely to do the most effective work there, both among the natives and the foreigners. No end of misunderstanding and misrepresentation would be escaped by a wiser method on the part of the boards.

The frequently expressed policy of the missionaries, that they have come to work for the heathen and not for Europeans, is mistaken to the point of absurdity and folly, as in a case I can across here. The best single missionary enterprise in Tientsin is the work of the Young Men's Christian association in the Chinese city proper. It is almost entirely self-supporting, so greatly does it command the respect of eminent Chinese, the viceroy himself being among the contributors. All the work, including the home of the missionary, is in a big Chinese residence, with upwards of a hundred rooms. A school which has government recognition and approval is maintained, as well as a library and an athletic department. Some months ago the wife of the secretary was taken suddenly and dangerously ill. A messenger was hastily dispatched to a physician in the foreign concessions, who reported himself busy. (The journey by night into the center of the native city is not a pleasant one.) A missionary physician who, like all the other missionaries, lives outside the native city, sent back word, when appealed to: "I came to treat the Chinese, and I cannot take other patients."

So after this experience, which might have proved fatal to his wife, the association secretary, to avoid its repetition, is obliged to consider the possibility of surrendering his home amid the Chinese, where he is doing notable work, and of taking up his residence in the foreign settlement. Probably such an extreme instance as this of the contention of the missionary, that he came to work for natives and not for foreigners, cannot be duplicated. But it is nevertheless significant.

A Missionary Rebellion.

Since this article is dealing with missionary shortcomings, it is proper to tell the story of a missionary rebellion which has its focus in Tientsin. In the southern part of this province is an independent undertaking called the "South Chihli mission," begun ten years ago by Rev. H. W. Houlding, an American Congregationalist. The mission is not related to any church or denomination, its support coming chiefly from independent city missions and from Congregational churches in the west and middle west of the United States. Mr. Houlding, it appears, has the gift of glowingly portraying China's needs and last year he received more than $20,000 for the work of his mission. During the past eight years he has brought out 39 adult missionaries, most of them coming at their own expense and putting all their worldly possessions into a common mission fund, from which they could never withdraw them.

Troubles in the mission have been almost constant, and now former members of the mission are out in a public circular, which they are sending widely to America, making various charges against the mission and its head. It is reported that the American consul general is taking steps to require Mr. Houlding to provide return passage to America for his missionaries, since a number of them have become a charge on the consulate. For it appears, according to this circular, that of the 69 missionaries brought out, three have died and 38 have left the mission in dissatisfaction. Most of these have remained in China, in connection with other missions; some have gone into business here, and some have returned to America.

The circular charges Mr. Houlding with lack of proper qualifications for leadership, with denying the missionaries a voice in the management of the mission; with running a sort of absolute monarchy, all the property being in his own name; and with making representations concerning the work which are not borne out by the facts. The signers of the circular say that they have made the mildest possible presentation of the real situation, and they hint at more serious evils. Some of the many stories current here are ludicrous. One member of the mission was British, and liked his cup of afternoon tea. The mission thought this a wicked and sinful indulgence. When he persisted in the practice, they held a mission prayer meeting over him, to show him the evil of his course! Another member was similarly disciplined for being too fond of peanuts! All this while grave evils were existing in the conduct of the mission.

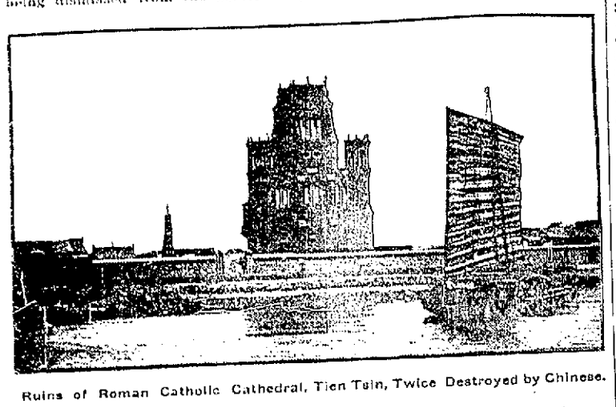

Stranded Missionaries.

One hears many stories in the east concerning independent missions, without substantial and responsible bodies back of them at home. Especially are tales told of the "faith" missions. Zealous and unqualified enthusiasts come out on "faith," and the other missionaries and foreigners have to support them to keep them from starving, until they can secure work or provision is made for their return to America. I have repeatedly been told instances of this sort concerning a Scandinavian mission whose people come chiefly from Minnesota. Some of the independent missionaries who do manage to get along, are obliged to give a large part of their time to cultivating their American constituency.

These missionaries who come out with no other equipment than enthusiasm make strange blunders. One party of Swedes, whose advent is a pronounced memory in missionary circles, bore each a musical instrument. They would play and sing hymns along the street, to the entertainment of the Chinese. The young women wrote home glowing accounts of the crowds they gathered by their street meetings, not realizing at all that in China such performances as theirs are always attributed only to evil characters and the basest of motives. Instead of doing good, they actually did only harm.

Akin to these, are the religious faddists who enter the foreign fields, representing some special tenet or doctrine. These make no special effort to reach the genuine heathen, but confine themselves to proselyting among the native Christians. Still easier mission work is that done by a holiness sect in America which publishes a paper called "The Gospel Trumpet." It appeals for funds to evangelize the heathen, and then spends the money for sending copies of the paper to missionaries of the various denominations, already on the field! Thus, every missionary in Japan receives "The Gospel Trumpet," and none, so far as I could learn, ever reads it.

GREAT FEAT OF MEMORY.

Zangwill Had at Command All Famous Trials of History.

As an indication of the quality of Zangwill's mental processes I may relate an incident that occurred while we were producing "The Children of the Ghetto." Mr. Zangwill was seated in my office, and we were going over some of the details of the play. It was the day that Labori, intimately connected with the Dreyfus case in Paris, was assassinated. Knowing that Zangwill had intimate knowledge of the case, a New York newspaper sent a representative up to see him. The reporter entered, and, after conveying the news, said:

"Mr. Zangwill, we want from you a history of all the famous trials you can call to mind for our paper."

"Indeed?" said Mr. Zangwill; "I think I can prepare that for you. Come to see me in three or four days and I will have it ready."

"We want it now," objected the newspaper man. "We want to print it in our paper to-morrow morning."

"But surely you don't expect me to quote you dates and facts out of my mind on the spur of the moment, do you?" asked Mr. Zangwill in astonishment. "Such a thing is out of reason."

"I'm sorry, but it's the only way we can make use of it," replied the newspaper man, firmly. Mr. Zangwill thought a moment, and then asked if he could have my stenographer for a short time. He was called in, and Zangwill dictated to him, then and there, a two-column resume of all the famous trials of history from Savonarola down, and quoted every important date and historical feature connected with each.—The Bohemian.

A Cardinal's Fellow Feeling.

Cardinal Manning used to say that he never saw an Irish name in a police case without noting it, grieving over it and regarding it as almost an alias of his own.

Thrones of the Sultan.

The Turkish sultan has several thrones, of which the principal is in the palace of Dolma-Bajtche. It is a seventeenth century work and was constructed for Abbas the Great. It is of pure white marble, which is habitually covered with the richest of gold and cashmere shawls. The sultan when occupying it reclines against a cushion encased in a network of pearls.

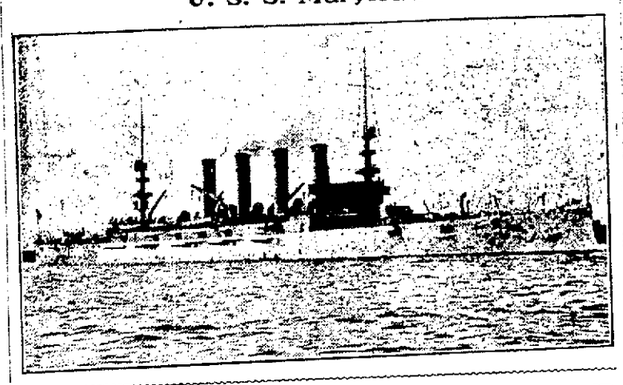

Light Blue and Gray Eyes.

Light blue eyes are generally the most powerful, and next to those are gray.

No More Plodding.

Superficiality is the bane of the day, and, backed up, as it so often is, by colossal self-esteem and forwardness, it adds a formidable contingent to the must-get-on-classes of people. No one wants to plod nowadays; the getting on must be rapid, and in trying to attain money without having to work for it, falsehood, dishonesty and heartlessness creep in.—T. P.'s Weekly.

ONE MAN'S WAY

By ANNA BANCROFT COUSHAINE

(Copyright, by Daily Story Pub. Co.)

He was a royal good fellow, was Jack Bell, a leading light in the newspaper world and the writer of some of the cleverest bits ever published in the Call, but notwithstanding his environment, he had no love for the Bohemian life and his pleasantest hours were those spent in his own cozy flat with his charming wife and two youngsters.

Theirs had been a love match, pure and simple and five years had passed without a ripple to disturb the serenity of their married life. In the winters they had lived in town—as a rule they spent part of the summer with Mrs. Bell's relatives in Pennsylvania. The year of which I write, however, the publisher of the Call had given Jack a big assignment which would mean a couple of weeks in the Shenandoah Valley and with the golden harvest and a wealth of material for magazine work in view he had gaily bided to the southern states.

"O, no, Genevieve, its quite impossible. I have a fine photograph of you and Beth and Meg riding a prancing animal through the Shenandoah—I'm going on horseback, you know—better go to your mother's and take the youngsters with you and have a good, quiet, restful time. I'll be back in a fortnight."

Of course that settled the matter, if Jack was going on horseback Mrs. Jack couldn't go, but his footsteps hadn't died away when womanlike she began to plan to "get even."

"Well," she said to herself, "I will go to mother's and I'll stay and stay and stay, and give him a chance to get good and lonesome, that's what I'll do to him."

The Shenandoah trip was pleasant and fruitful, but it didn't consume all of the time Bell had allotted for it, and there were two days of the fortnight left when he got back home.

"I'll surprise Genevieve," he thought, I'll get the house aired, and have some papering done before I let her know I'm home."

He found enough to keep him busy for four days and last of all sent for a cleaning woman to come over and put on the finishing touches—then when everything was in readiness, he telegraphed Genevieve—"Had a through ticket to Buffalo, am home now, when will I meet you. Jack."

To his amazement, the telegram brought forth no eager reply from Kentshire and in an agony of fear lest some one might be ill he called Mrs. Jack on the long distance.

"Yes, this is Genevieve, is that you, Harry?"

"Harry—well, I should say not, who the devil is Harry?"

"Well, you are very rude, whoever you are, I guess you've got the wrong number."

"No, I haven't; I want to speak to Mrs. Jack Bell."

"Well, this is Mrs. Bell, who are you?"

"Why, it's me, dear, Jack; but I say, who is Harry?"

"Oh, is that you, Jack, well, for goodness sakes, didn't know your voice."

"Oh, you didn't. I say, who were you expecting to hear from?"

"Who was what? I can't hear very well, dear, there's something wrong with the line."

"I say, W-H-O I-S H-A-R-R-Y—"

Oh, Harry? Oh, he is—don't cut me off, Central—well, upon my word, did you ever hear any thing like that racket? I can't hear a word you say, Jack, better call me up to-morrow."

What Jack Bell didn't say to that phone and later to the operator, wouldn't be worth repeating.

"Harry, Harry, I'd like to know who in—well it's the Baltimore for me, I guess, for a few days longer." And the Baltimore it was with pool at the press club for many nights, in fact, so many that he was contemplating a trip to Kentshire when a letter from Genevieve arrived.

"Dear Jack:—I know you are getting along famously, and we are having a lovely time. Sis is home and we are going out a great deal. Mother is going to New York next week for a month and I've promised to stay here till she gets back, you don't mind, do you dear? It's so easy for you to get your meals at that nice little place at the corner. Harry is here, too. Be careful not to leave the windows open when you go down town in the morning, I don't want the rain to ruin the carpets. Bye, bye, be a good boy. Affectionately, Genevieve."

"Another month, another month, eh," and the man who hated the corner restaurant, hated the club room and was beginning to hate every thing else, groaned aloud, "Another month? Well, by gum, she can stay two months, and I won't ask her to come home, and I won't go down there, either. Now, Mrs. John Henry Bell, if you are so doggoned fond of the country, you just stay there till you get good and ready to come home. Somehow or another he managed to get through three weeks of the month and then the spirit of lonelliness oppressed him. "I'll fix her, all right. She will come home, but it won't be for my asking."

That night he took his sister and a young friend who was visiting her by name, Miss Polly Pert, to the Saturday hop at the Yacht club; next day he and Polly and sister dined at one of the down town hotels. Two or three days later the two young ladies happened in his sanctum about noon and that meant a luncheon together. Neither sister nor Polly divined the reason for the sudden avalanche of attentions but they agreed on one point, that it was jolly good of Jack.

On Sunday Miss Katherine Bell wrote her sister-in-law a long letter in which she faithfully chronicled the good times she and Jack and Polly were having—automobile rides, theaters, boat rides and dances. Two days later Jack received a very snappy little letter from Mrs. Jack in which she said a few things that won't bear repeating and closing with this paragraph:

"Run down and spend the week end with us, Jack. I know it's expensive, but then you might as well be spending your money that way as wasting it in other directions. I won't be home for a couple of weeks yet. Lovingly, Genevieve."

"O, so you won't be home for a couple of weeks yet," groaned the lonely one. "Very well, lovingly Genevieve, nor will I go to Kentshire for a couple of weeks yet.

That night Genevieve received a telegram that made her bite her lips with vexation: "Can't come Saturday, business engagement, have promised to take Katherine and friends for a launch ride Sunday. Jack."

"O, the hateful hateful thing. I don't believe there is a meaner man in the world; he wouldn't ask me to come—well, I'll go for spite and I'll spoil that launch ride for 'friends,' too, so I will."

"Poor Gen, it's a shame to tease her so," mused Bell as he watched the wreaths of smoke curl to the ceiling of his den, "but then she deserves it. I wonder who the dickens Harry is. She never mentions him in her letters."

Was it intuition or a perfect understanding of the woman he had married that made him stop at the florists that night and order a great bunch of roses.

"Guess I'd better telephone to Mrs. Morlarity to come over and sweep up and get something to eat in the house. There's no telling what may happen."

The next morning before he was up this telegram came: "Will be home on the noon train; will expect you at the depot. Harry is with me. Genevieve."

"Harry is with her? Well, some things are liable to happen to Harry."

"Yes, this is the train from the east—O, here they are. Well, you dear girl, how ever did you manage to get along with the youngsters, and—well, who is this?" with an inquiring glance at a fifteen-year-old who was carrying the youngest of the children.

"That—O, that's Harry Maxwell—Elizabeth Maxwell's little son; he's been spending the summer with mother and I brought him on to Buffalo for a little visit."

It is needless to say that Harry was not annihilated and it wasn't until after she had gone into raptures over the roses and the dinner that Mrs. Jack remembered to express her regret at making Jack miss his launch ride.

"Why, you dear old girl, I'd miss 20 launch rides to get you back, but to tell the truth, that launch ride was a hoax, I had to say something that would bring you home."

And then they both laughed.

BOTH UPS AND DOWNS.

Pair of Comedians Have Fun with Broadway Storekeeper.

The following story is accredited to Miss Phyllis Rankin, who in private life is Mrs. Harry Davenport:

"My husband and I went into a Broadway umbrella store a few days ago," says Miss Rankin. "A sign reading 'Umbrellas, $1 up,' was displayed in the window.

"'How much down?' asked Mr. Davenport.

"'All cash down,' answered the salesman innocently. 'This is not a credit house.'

"'But I mean how much do I have to put up for an umbrella put down?' asked Mr. Davenport.

"The salesman looked a bit perplexed. 'We have them for $1 up,' he said.

"'I know,' replied Mr. Davenport, 'but I don't want to buy one up; I want to buy one down. I can put it up myself.'

"'O,' said the salesman, smiling gently, 'you are speaking of the umbrella, while I am speaking of the price.'

"'And now I understand, too,' returned Mr. Davenport, 'it is the price that is $1 up. Then it isn't exactly $1 down as you said?'

"'Exactly. But perhaps you would like to talk with the proprietor.'

"The salesman hurried to the rear of the store, and I overheard him explaining to his employer; also I heard remarks about an insane asylum. The proprietor came blandly forward and said, 'We storekeepers have our ups and downs, but—' At this we bought an umbrella and fled."—Bohemian.

Mere Man and the Ubiquitous Lady.

May we be permitted to hint that perhaps there is still hope for even mere man, owing to the fact that all of his larger ideals are feminine? Liberty is a lady, Justice is a lady, Truth is a lady, and Faith, Hope and Charity are ladies. Everything worth having or worth following or worth worshiping is a lady. If Toil is sometimes a lady, too, we are extremely sorry and apologetic about it.

USEFUL HOME HINTS

SUGGESTIONS THAT HAVE BEEN FOUND VALUABLE.

Simple Remedy for the Annoying Chilblain — Novel and Effective Manner of Cleaning Lace— Cure for Cold Feet.

A busy woman, employed during the day in sewing in other people's homes, sends the following useful suggestions:

1. Some one asked for a remedy for chilblains. Here is a simple cure. Cut an onion in two, put table salt on the cut side and rub it upon the afflicted part. Do this a few times and the cure will be effected.

2. To clean draperies, I use sawdust and ammonia. Put the sawdust into a tub and pour in enough household ammonia to soak it to the bottom. Beat the draperies or rugs free of dust. Put them into the sawdust and, with a small whisk broom, rub the mixture well into the article to be cleaned. The dirt will disappear at once. Hang out of doors to dry and air.

3. To clean lace, get a large paper bag and put the laces into it. Pour in a quart or more of Indian meal, and shake the bag up and down—not hard, but steadily—for some minutes. Do this several days, and four or five times a day. I cleaned a hand-made hat in that way and it came out as white as snow.

4. Get rid of water bugs and ants, weevils and roaches by washing shelves and floors with borax. I live in an apartment where there are 26 families, and I have not had a bug of any kind for years. I also clean my carpets every Friday with borax, and never find a moth. I sprinkle borax in my packing boxes when I put away woolens and feather pillows, using it liberally, and the moths never touch them. Turpentine is good for washing woodword and floors in closets and wardrobes. Moths will not live in a place that has been washed with turpentine.

5. For cold feet and cramps, an old doctor told me once to rub the shinbone up and down until the flesh and the hand are hot. I tried it and have never suffered from cold feet and cramps after doing it.

6. A common oyster shell is a durable pot-and-pan cleaner. I got my husband to drill a hole in the center of one and to put a lid knob in it. One may buy one knob at a hardware store for three cents, or two for five cents.

7. If I put a half cupful of water in the saucepan in which I am about to cook oysters, then pour in the milk, the milk will not scorch. I let the water come to a boil, then add the milk or cream, or both. Then I let that boil before the oysters go in. I never need to clean burned milk from the side of a pan if this is done.—Montreal Herald.

Dyed Laces.

In dyed laces there is a marked preference for old tones mixed with a great deal of black, and these are brightened with pipings of gay-colored satins about the neck and sleeves, and also along the upper edge of the girdle. Notwithstanding the fact that the summer has been so belated in the point of warm weather, there is an abundance of light tailored costumes. White voiles and serges trimmed with filet lace are the acme of chic, and voiles made with slightly raised waists look charming for afternoon wear. At Dieppe and Cannes women carry with such frocks beautiful parasols in green, pure white and Pompeiian red. These are mostly perfectly plain, but some are scalloped and trimmed with "milliner's piping," in rows, following the form of the scallops.

Girdle for Batiste Frock.

A girdle intended for a fine willow green batiste frock, is formed of pinched tucks of the batiste, with lace beading above and below and black ribbon velvet run through the beading.

Three cute little bows at the back mark the finish of the waist belt, over which the blouse hangs gracefully. Immediately above the girdle the blouse shows a band of embroidery trimmings and the deep irregular shaped yoke repeats the drawn work and baby crochet embellishment shown upon the skirt. The puffed elbow sleeves are embroidered all over and gauged into unpretentious but marvelously smart cuffs that carry out the design of the tucked girdle. Finishing the toilet is a white mushroom hat with an immense willow plume, shading to very pale green.

Orange Cake.

Take the grated rind of one orange, two cups of sugar, whites of four eggs, and the yolks of five, one cup sweet milk, one cup of butter and two large teaspoonfuls of baking powder to be sifted through with the flour, bake in jelly tins. Filling: Take white of one egg that was left, beat to a froth, add a little sugar and the juice of one orange, beat together and spread between the layers.

Vanilla Sauce.

Take one pint and a half of milk, stir in three beaten eggs, and pass through a strainer in a double boiler. Add three tablespoonfuls of sugar. Put on the fire and when the water in the lower pan begins to boil, stir and keep stirring until the mixture has reached the consistency of a thick cream. Remove from the fire, add a tablespoonful of vanilla, and serve warm or cold.

An Herb Bouquet.

In cooking recipes one very often comes across the term a "bouquet of herbs." This means that a few sprigs of parsley, a piece of thyme, a clove of garlic, a bay leaf, and a few peppercorns all tied together, ready to be dropped into whatever they are to flavor and are (in this way) easily removed.

Green Currant Pie.

Stew and mash one pint of green currants until all are burst, using as little water as will keep them from burning. Add sugar to make it very sweet, and one soda cracker rolled fine. Bake between two crusts. When using ripe currants, do not stew.

Luncheon Fad.

Among the new social fads is that of serving a poached egg on a small square of toast to each guest at luncheons and teas. This has long been an English custom and has lately been introduced in New York by society women who have just returned from London.

Keeping Child Cool.

Place one or two thicknesses of wrapping paper between the sheet and mattress. It also is effective between the slips and hair pillow.

WHAT SHE WEARS

Eton Jacket Model Still Is the Most Popular

The present is the best time of year to pick up goods for making jackets and wraps, and never were the counters so flooded with silk remnants that are adapted to the linings of these garments.

Despite the influx of new models, the eton jacket has held its own in popular taste, and for some figures it is by far the most becoming model that could be worn.

An eton jacket is always in demand. It is both serviceable and smart, and it means a bit more protection than the more fanciful models. It is adapted to all seasons and materials, and for the girl whose figure is well rounded and long-waisted, it is always recommended. It shows the figure to best advantage.

Of course, the mandarin, kimono or tokio sleeve is very up-to-date, and the eton with these sleeves is bound to show this season's mark upon it. It does not give the warmth that the tight sleeve does, but it has many practical advantages, as it can readily be slipped on over lingerie dresses with fluffy sleeves without mussing them.

These separate etons are best evolved from plain materials, but they can be trimmed quite elaborately and lined with bright silks or figured foulards.

An extra overgarment in the shape of a smart looking tailor coat is always wanted in the wardrobe of the well-dressed woman. The chesterfield coat, which, by the way, can be made in hip or three-quarters length, is a good model to go by.

The home sewer can do this coat if she is clever about her pressing and but that seems to have been superseded by much smarter looking materials, like cheviots in broken plaids, or novelty cloakings.

These coats are seldom lined, although it can be done if preferred. The popular model is the three-quarter stitching, but if she is a novice, afraid to do big things, then it is best left in the hands of the professional.

Several years ago these coats were almost always made of covert cloth,

Eton With Mandarin Sleeves.

for length, with the seams bound, but if you prefer it lined, then match the goods in a heavy twilled silk or soft satin. Under no circumstances get a figured lining for this style coat, nor should it be of contrasting color.

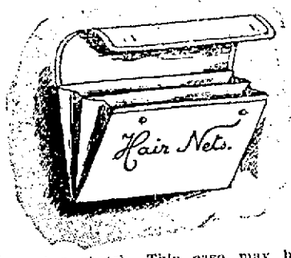

This coat should always have a full-length sleeve, for you wear it only on undress occasions.

For the woman who goes out much in the evening, or for the young miss just entering society, nothing is more in demand than the mandarin coat for these occasions. The model is also adaptable for afternoons, driving, motoring, etc.

USEFUL HAIR-NET CASE.

Provides Safe Keeping for the Light Fringe-Nets.

Now that hair-nets and fringe-nets are so very generally worn, any suggestion for their safe keeping when they are not actually in use will be gladly welcomed. These light nets are very easily mislaid and swept aside, or even blown out of window and lost altogether, when they are left for an unguarded moment on the dressing-table. Under these circumstances our readers may like to provide themselves with a hair-net case similar to the one which is shown in the accom-

panying sketch. This case may be made in colored linen or silk, and it is arranged with two pockets like those of a purse, so that it might easily hold about half-a-dozen nets at one time. It is edged with stitching and made to fasten with buttons and button-holes. The words "Hair-nets" might be embroidered in washing threads on linen, or in silk on silk. Such a case as this would be specially useful to take away when going for one's summer holiday, as fringe nets are always greatly in request, when a neat coiffure has to submit to the unkind treatment of sea breezes and country winds. It will keep its shape better, by the way, if cardboard is used to stiffen the sides and top.

Empty Spools.

Never throw away empty cotton reels; they have a hundred uses. In most kitchens there is a row of nails on which aprons and dishcloths are hung, with the result that they are frequently torn and rust-marked. This will be prevented if you force on each nail one of your empty reels; nothing could make a more useful peg.

A spool will make an excellent stop to prevent the door from opening too far and banging the furniture. Cover the spool with thick cloth to prevent its injuring the varnish of the door and screw it firmly to the flooring in the position required.

Often enough one finds the door of a cupboard provided with no better means of opening than a keyhole. You can make an effective knob by screwing on another of those ever-useful spools.

Styles in Brooches.

In brooches the crescent-shaped and the horseshoe, both set with rhinestones, are the most popular and are worn either for day or evening. In plain gold-filled brooches the knot, the fleur de lis and the four-leaf clover share equal popularity. Breastpins in mosaic and enameled effects are good. Dainty sprays of lilies of the valley in green enamel and pearls and violets with mock diamond centers are dainty for summer gowns.

FANCIES FOR LATE SUMMER.

Original Features Put Forth by Parisian Costumers.

However much the late season may lack in great originality there are quite certain to be minor features developed. The very latest news from Paris is to the effect that wine and strawberry tints are much seen and that rich, deep blues appear to be given preference over the brighter sorts. Also, we are told that the sleeveless guimpe blouse and princesse gown are the favorites, but that they are cut out with only a moderate decollete neck, so that little of the guimpe beneath is shown.

The wide kimono sleeves are by no means becoming to all figures, and it was almost a foregone conclusion that the big armholes with narrow sleeves, or with trimming to simulate them, would be developed. More and more is the tendency toward simplicity of trimming on the skirts to be noted, and more and more certain does it become that the comparatively plain skirts with elaborate blouses will make a feature of the autumn.

Just now Paris dressmakers are using the flimsiest possible materials with tucks or folds as their trimmings, but weighted at the lower edge with hems of contrasting and heavier fabric, and this treatment quite as well as the bordered stuffs is looked for throughout the coming season. The contrasting hems allow of color and fabric effects, at the same time that they serve a definite, practical end, and when utility and beauty are combined there seems every reason for any fashion to take as firm a hold as is possible in matters of the sort. Just now heavy linen is being used in this way, and late summer costumes are made of net with hems of the linen that are either plain or braided with soutache, as may be liked. Separate coats of linen, too, are being greatly used, and linen is given prominence during these late weeks of the summer season.

Beads Modish.

If there is any thought of beads going out of style, present conditions do not indicate it. There are new styles, large beads in irregular shapes, small beads of pretty patterns, good ones, precious gems and some decidedly cheap, though, strange to say, very pretty. Women are wearing all kinds and to many women they are very becoming. Amber is a favorite color at present, since the color looks beautiful worn with the new brown tints. Genuine amber beads are expensive, but there are some very clever imitations in the market which will satisfy most women. Many cheap beads can be made more elegant in appearance by stringing them on platinum wire and using gold clasps. It is the cheap cotton string and brass clasp which gives more evidence of cheapness than the beads.

Cheap Trimming for Fall Hats.

One sees handsome, dark colored flowers which have been rejected as too heavy looking by the buyers of summer finery at greatly reduced prices in the millinery departments. Autumn hats are far prettier trimmed with these flowers and foliage than with feathers and wings, and the long winter season affords plenty of time for employing the latter decorations.

STRIPED SILKS FIND FAVOR.

Remarkably Effective Costume That Was Seen Recently.

Many of the chic effects exploited in cloth gowns of the tailored order find repetition in the smart striped silks, which increase in favor as correct summer fabrics. For instance, there appeared recently a handsome striped silk, having the skirt cut with a very narrow front panel, embroidered in silk in the predominating shade of the dress—pale opal green silk. The design of the embroidery was picked out with tiny buttons and here we have a suggestion of a trimming patterned after the idea of picking out lace patterns with gold and silver braids, yet a mode of decoration that is better suited to frocks for street wear than the original idea itself. The buttons were very tiny and of the crochet genre. The rest of the skirt was finished with a band of embroidery, piped with a satin fold, which ended on either side of the panel.

Worn with the skirt was a smart neck, finished like the bands on the skirt, with a piping of satin and embroidered below with the same pattern. Similar bands formed the cuffs to the lace guimpe.

The Tunic Skirt.

The tunic skirt, which reminds one very much of the old-fashioned overskirt, is made with deep points which reach to the knee line. A pretty arrangement for the bottom of the upper skirt portion is to have the points developed in tucks. This work must be carefully done, but is very beautiful as a border edge when carefully fashioned. Of course the waist should be tucked to match the skirt tucks, and this is easily accomplished by making a surplice waist with tucks down the front.

Ruffles.

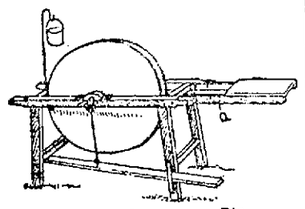

It is a long time since straight ruffles have played as important a part in summer gowns as they do now. Usually, however, the gown is otherwise trimmed in such a manner that in spite of this circular trimming the long lines are preserved.

ROAD AND FARM IMPROVEMENT

RUNNING THE GRINDSTONE.

Some Suggestions for Making a Hard Job Easy.

If the face of the grindstone is hard and glazed pour a little sand on the stone every few minutes until the glaze is worn off and the stone will cut like a new one. This condition is caused by exposing the stone to the weather. I like to keep the stone in a shed under cover, but if this is not possible set it under a tree and put a box over it when not in use. It is

Handy Grindstone Rig.

surprising how easy a little oil on the bearings will make the stone run, yet some of my neighbors never think to oil theirs. A few drops of kerosene will cut the gum if it runs hard and then some oil or axle grease will make it go easy.

It is hard to stand on one foot and work the treadle with the other. This job can be made easy, suggests a writer in Farm and Home, by bolting two boards to the grindstone frame, and extending it two feet, on which place a seat as shown in the cut. With a smooth and even face the grindstone works nicely, but when it becomes uneven it is hard work to do a good job of grinding. Such a stone needs to be cut down and toned up. This can be done by grinding against the end of a piece of pipe, having the stone dry. There is nothing more exasperating than to try to work with a poor grindstone, but with a good one it is a pleasure to keep the tools sharp.

HELPS THE ROADS.

Experience of the Specialist at Nebraska Experiment Station.

The following from a recent issue of the Nebraska Farmer gives their experience with the road drag on the roads near the Nebraska experiment station:

"A good proof of road dragging with split log drags was shown last winter during the long spell of deep muddy roads. The roads next to the farm have been dragged for the last four or five years, and comparing them with others it makes a very great contrast. While some of the other roads are hardly dry, and a good many are rough and rutty the dragged roads have long become smooth and are as hard as brick. Even during very muddy weather the depth of mud on the dragged roads was slight compared with that of the undragged roads. When a person drives over a road of this kind when muddy it is like driving on pavement with but one or two inches of mud while the unworked roads sink to a depth of nine inches in places and also very heavy pulling, having no solid ground under the mud. A farmer who believes it does not pay to drag roads is badly mistaken. In eastern Nebraska it is just beginning to become a practice. And the ones to introduce it there were the students of the school of agriculture."

PLOWING DEEP OR SHALLOW.

Much Depends on the Kind of Crop to Be Grown.

Plow deep in the fall and shallow in the spring, is the advice of an Iowa professor of agriculture. We would amend this by suggesting that the crop you expect to raise on the land has something to do with it, as does also the length of time to elapse before the crop is sown or planted. Plowing deep for wheat is all right if the plowing is done in time so the soil will settle before seeding, but he who plows deep one week and drills in his wheat the next is courting failure.

For English bluegrass, timothy or any such crop, it is a detriment to plow very deep. We have found this out through sad and costly experience. Deep plowing furnishes too loose a seed bed for any of this stuff, and it is a hundred times more apt to dry out or freeze out before the winter is over. Like a good many rules, the one referring to deep plowing in the fall should be practiced only after a full and careful consideration of the field to be plowed and the crop to be sown.

FARM JOTTINGS.

Give the sheep shelter from the sun.

You can never improve a flock by using a grade sire.

Now is the time to select the best possible sire for the flock.

The superiority of beef breeds is largely in their early maturity.

Well drained land will stand drought or freshet better than land that has not been drained.

Wethers intended for market should be put in a pasture by themselves, where they can be liberally fed.

When ewes are gaining in condition at mating time, there will be a large percentage of twins and the lambs will be stronger.

The feeding of cotton seed meal is not yet reduced to a science. Any man that undertakes it should avail himself of all extant information on the subject.

Stringhalt.

Stringhalt is sometimes due to local injury. Closely observe the stable, change the stall, bathe the limbs in hot brine and attend to the shoeing. Your farrier may discover some fault in shoeing that may be remedied. A pronounced case can be corrected only by an operation.

The Horses at Night.

When the weather permits, try hitching the horses out these warm nights; or, what is better, leave the stable door open and let them go out into a small lot to roll and lie down on the ground instead of in the hard, narrow stalls.

Keep an eye open for tent caterpillars. When found, wrap a rag around the end of a long stick, saturate the rag with kerosene, ignite the torch, and then quickly burn out the pests.

FARMERS AND GOOD ROADS.

The Latter Contribute to the Prosperity of the Farmer.

One of the factors contributing to the prosperity of the modern agricultural community is a system of good public roads. This subject has been discussed so frequently in the farm, daily and magazine press, that very few are not conversant with its more important aspects. Every one must concede that the subject is important and its benefits to the agricultural and commercial worlds are self evident.

Impetus is being given to the building of rural highways, by the activities of the office of public roads connected with the United States department of agriculture. Systematic work is being carried forward under the direction of this bureau and the influence of these federal endeavors has reached out into a number of the states.

It was quite opportune that the government undertook to foster the building of good roadways. Now, through the education received from national road experts and from the crying necessity for better means for wagon transportation of farm products to market a general demand for good permanent country highways has gone out from the agricultural classes.

America has been exceedingly backward in developing a system of good public roads, but the time is at hand when farmers will not be compelled to haul their grain and produce over ways covered with mire or filled with dangerous ruts.

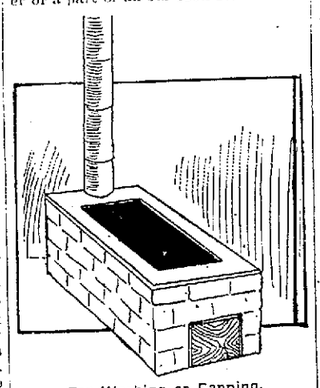

The general consensus of opinion regarding public roads, declares the Indiana Farmer, is that there should be a good, strong executive man at the head of a forceful commission dealing with the question.

Twenty-one states in the union have such a commission with an active and competent civil engineer or some other skillful, practical man at its head. It will be noticed that these states are improving their highways and are making them permanent and durable. Prominent among the states thus applying business methods and scientific principles to road building are New York, Pennsylvania, Illinois and Ohio. The 17 other states are following suit very closely and good results are noticeable. Of course it will require many years before every section in those states is immediately benefited, but it suffices that the work is well begun.

AN OUTDOOR FURNACE.

It Can Be Put to Many Uses on the Farm.

Build the furnace walls of brick and mortar. When three inches high lay iron strips crosswise four inches apart; this makes the grate. Build as high as you want the walls, finishing with a top from an oldtime heater or a part of an old cook stove. Take

an old stove door for the furnace door, suggests the Missouri Valley Farmer, leaving room for ventilation under the door. Use any kind of piping, but four or five-inch pipe is better than larger. Build the furnace in a shed or some other convenient place.

A New Kerosene Emulsion.

It is not a very delightful job to make kerosene emulsion. Besides being not the cleanest of work, it takes considerable time. The principal trouble and annoyance is in dissolving the soap and mixing it with kerosene. The Canadian Station has made a new discovery which promises to make the work a great deal easier, says the Rural World. It is found that eight ounces of flour will hold in suspension a quart of kerosene. If the flour is scalded before the kerosene is added, two ounces have been found sufficient to make an emulsion which will remain in suspension three days. It has also been found that when flour is used in making the emulsion there is not nearly so much danger of discoloring the trees.

Buy a Good Separator.

When a separator is to be purchased, see that it is a good one. There are many cheap and worthless machines on the market that will simply disgust the buyers when they come to use them. The separators advertised in the Farmers' Review are not of this class, but are of the class that will give satisfaction for many years to come. The buyer of a separator should remember that when a separator is offered him at a price far below what the regular companies can make them for, something must be the matter with it. The matter is generally that the cheap machine is manufactured at a very low cost out of poor material and lacks exactness in adjustment. Without that exactness a separator is of no value.

The Far-Sighted Farmers.

The far-sighted farmers are planning on having an abundance of roughage for the cows next winter. With plenty of hay, corn fodder, millet (although millet is not an extra good feed to produce milk) straw, etc., supplemented with a light grain ration, if the present high prices of grain prevail, they will be able to make money out of their cows next winter. The prevailing sentiment is in favor of more cows, and in this the farmers are "wise in their day and generation."

Low-Headed Trees.

Apples grown on low-headed trees can be picked at one-third the cost than from high-headed trees. Besides, low-headed trees are less exposed to high winds, which is a great consideration to the protection of both the fruit on the tree and the tree as well from windstorms.

Buds inserted last month should be watched; do not allow the ties to choke the trees. Budding may still be done.—Farm Journal.

VIOLET SHADE WELL LIKED.

Has Attained Much Popularity for Bedroom Furnishing.

A charming wall paper displayed in a store window shows an arbor design of light purple shades upon a cream ground, says the Chicago News. Purple tones are so fashionable now that they are, and very rightly, used considerably for furnishing. They are particularly clean and pretty for a bedroom; that is, if the violet or lavender shades are selected. For a sunny exposure violet gives a cool effect.

Most women select blue or pink for their bedrooms, but if violet is becoming it is every bit as effective, and if the solid tone is not used the dainty floral designs in papering are not sufficiently pronounced to conflict seriously with a dislike for the color.

In a spare room violet is very pretty. One room facing north and east is furnished with old mahogany, although the two little beds are of brass. The matting is violet and white, with two or three woven rugs of the same coloring.

The paper shows clusters of violets on a cream-colored ground, and the colonial fireplace and deep-embrasured windows are of snowy white paint. The white flowered muslin curtains have plaited ruffles. Can any one imagine a cozier apartment for a welcome guest?

DISH OF MEXICAN ORIGIN.

"Chili Colorow" for Those Fond of Highly Seasoned Viands.

A dish that cannot fail to delight the palate of those who love highly seasoned viands, and yet, strangely enough, will not induce an increase of the body's internal heat, is recommended by Harry Leighton, whose talents as an amateur cook are quite on a par with his ability as an actor. This is a Mexican concoction, called "Chili colorow," and those who care for such dainties will find it a most delectable mixture. To make it, Mr. Leighton takes a quart of boiled tomatoes and one onion that has already been chopped fine. To these he adds three tablespoonfuls of granulated sugar, one tablespoonful of the prepared ground Spanish pepper—a condiment that may be purchased at any first-class grocery store—and a little salt. The mixture is then permitted to stew rather slowly for some 20 or 30 minutes, when, if it seems too dry, a little water is added.—The Bohemian.

Fruit Dumpling.

Sift one pint of flour, one-half teaspoonful of salt, and two teaspoonfuls of baking powder; rub in one heaping tablespoonful of butter and mix into a stiff dough with three-fourths of a cupful of milk. Toss the dough onto a well-floured board, knead it slightly and roll out one-third of an inch thick. Cut into rounds with a large cutter. Put half of a pared peach in the center of each, draw the dough up over the peach and roll carefully in the hand until the folds have disappeared and it is smooth and round like a ball. Butter the perforated pan in a steamer, arrange the dumplings on it so that they will not touch, cover tightly and steam 20 minutes. Serve with fruit sauce. Rub one-fourth of a cupful of butter to a cream, add gradually one cupful of powdered sugar and beat until light and frothy, then beat in gradually one cupful of sliced peaches. Set in a cool place till hard. Serve the same as hard sauce.

Buttered Rice.

A nice "made-over" entree for lunch is made by boiling rice, draining well, and placing while warm in a bowl or mold. The next day turn it out carefully upon a pie plate and set in a quick oven. When hot all through draw to you in the oven and butter plentifully. After this let in the oven until it browns lightly. Then butter again, sift over it a thick coating of cheese—preferably Parmesan — and leave in the oven until the cheese is melted. Then heap irregularly with a meringue of whites of two eggs, beaten up with a pinch of celery salt. Brown very lightly, slip a spatula under the mold, and transfer to a hot platter.

Cheese Sticks.

On a day when pies have been made, take a piece of pastry dough, roll it out very thin and cut into strips as long and wide as a finger; spread on each strip grated cheese sprinkled with salt and pepper. Lay on another strip, pinch together, brush with yolk of egg, and bake in a slow oven. If no pie crust is at hand, it can be easily made of a half-cupful of flour, a tablespoonful of butter and a little icewater.

Double-End Pillow Slips.

When making pillow slips, if both sides are left open instead of just the one, there will be no hard corners to turn in washing, and they are easier to iron. Both sides can be trimmed with lace and insertion—two buttons and buttonholes on each side to button the pillow in. They look so pretty on the bed pillow shams are not needed.

How to Bake Peaches.

Peaches may be baked like apples with excellent results. Peel the fruit, put into a baking dish with sugar, bits of butter and a cupful of water. Bake until the peaches are tender. A few chopped nuts sprinkled over the top of the fruit is an improvement. They should be served cold.

Keep Food Hot.

Instead of putting food into the oven to keep hot for late comers, try covering it closely with a tin and setting it over a saucepan of hot water. This plan will keep the food hot and at the same time prevent it from drying.

To Serve Watermelon.

A watermelon came to the table the other day with the pulp heaped in the shell as if it had been a basket. The red pulp had been removed with a big spoon and some of the white uneatable fibre had also been taken out.

Putting Up Preserves.

In putting up fruit in glass jars care should be taken to get fresh rubbers each season. This is a comparatively small expense and will save untold worry from leaking jars.

Egg Sauce.

Heap two tablespoonfuls of butter in a saucepan. When it bubbles, put in (all at once) two tablespoonfuls of flour, and stir from the sides toward the center of the pan until the ingredients are well mixed. Have ready heated a cupful of milk; add to this the "roux" gradually, and beat to a smooth cream. Season with pepper, salt, and beat into the thickened milk the yolks of two raw eggs and a little minced parsley. The white and yolk of a hard-boiled egg chopped fine may also be added.

DOES YOUR BACK ACHE?

Profit by the Experience of One Who Has Found Relief.

James R. Keeler, retired farmer, of Feaner St., Cazenovia, N. Y., says: "About fifteen years ago I suffered with my back and kidneys. I doctored and used many remedies without getting relief. Beginning with Doan's Kidney Pills, I found relief from the first box, and two boxes restored me to good, sound condition. My wife and many of my friends have used Doan's Kidney Pills with good results and I can earnestly recommend them."

GIFT NOT ALL A GIFT.

Generosity That Was Purely the Result of Accident.

A missionary bishop told this story about F. Marion Crawford, the famous novelist:

"Mr. Crawford went to school," he said, "in Concord, and one day he was taken to call at a Concord clergyman's.

"The clergyman had a missionary box on his drawing room table, and, time hanging heavily on the boy's hands, he amused himself with trying whether a silver dollar—it was all the money he had in the world, and he had converted it into that gigantic coin for safety—would go into the slit in the box's top.

"It was a close fit, but unfortunately it did go, and the coin slipped out of the embryo author's fingers. There was a terrible crash of silver falling among the coppers—and then the boy, as the novelists say, 'knew no more.'

"When he came to himself he found the clergyman and his family in raptures over his generosity."

CHILDREN TORTURED.

Girl Had Running Sores from Eczema—Boy Tortured by Poison Oak—Both Cured by Cuticura.

"Last year, after having my little girl treated by a very prominent physician for an obstinate case of eczema, I resorted to the Cuticura Remedies, and was so well pleased with the almost instantaneous relief afforded that we discarded the physician's prescription and relied entirely on the Cuticura Soap, Cuticura Ointment, and Cuticura Pills. When we commenced with the Cuticura Remedies her feet and limbs were covered with running sores. In about six weeks we had her completely well, and there has been no recurrence of the trouble.

"In July of this year a little boy in our family poisoned his hands and arms with poison oak, and in twenty-four hours his hands and arms were a mass of torturing sores. We used only the Cuticura Remedies, and in about three weeks his hands and arms healed up. Mrs. Lizzie Vincent Thomas, Fairmont, Walden's Ridge Tenn., Oct. 13, 1905."

Jerome on Colored Evidence.

District Attorney Jerome, of New York, said one day of a piece of suspicious evidence:

"It is evidence that has been tampered with, colored. It is like the lady's report of her physician's prescription.

"A lady one day in July visited her physician. The man examined her and said:

"'Madam, you are only a little run down. You need frequent baths and plenty of fresh air, and I advise you to dress in the coolest, most comfortable clothes—nothing stiff or formal.'

"When she got home her husband asked her what the physician had said. The lady replied:

"'He said I must go to the seashore, do plenty of automobiling, and get some new summer gowns.'"

Sure to Have One.

Lincoln Steffens, in an address on municipal politics, said in Chicago of a certain city:

"That city is as notorious for its rottenness as the town of Pebbles is notorious for another characteristic.

"Here is an incident that will give you an idea of the reputation of Pebbles.

"On a train one day a man rushed into a car, held up his hand for attention, and shouted excitedly:

"'Anybody here who belongs to Pebbles?'

"'Aye; I do,' said a small, dry old fellow calmly.

"'Then,' said the other, 'lend us yer corkscrew.'"

Born, Not Worn.

Little Margaret's grandmother had written for a photograph of her namesake, the "baby." For material reasons it was advisable that the little girl should appear as well dressed as possible, and a cousin's new open-work dress was borrowed for the occasion. On being arrayed for the picture Margaret rushed to her father, crying:

"Oh, father, just look! These ain't worn holes; they is born holes."—Harper's.

FEET OUT.

She Had Curious Habits.

When a person has to keep the feet out from under cover during the coldest nights in winter because of the heat and prickly sensation, it is time that coffee, which causes the trouble, be left off.

There is no end to the nervous conditions that coffee will produce. It shows in one way in one person and in another way in another. In this case the lady lived in S. Dak. She says:

"I have had to lie awake half the night with my feet and limbs out of the bed on the coldest nights, and felt afraid to sleep for fear of catching cold. I had been troubled for years with twitching and jerking of the lower limbs, and for most of the time I have been unable to go to church or to lectures because of that awful feeling that I must keep on the move.

"When it was brought to my attention that coffee caused so many nervous diseases, I concluded to drop coffee and take Postum Food Coffee to see if my trouble was caused by coffee drinking.

"I only drank one cup of coffee for breakfast but that was enough to do the business for me. When I quit it my troubles disappeared in an almost miraculous way. Now I have no more of the jerking and twitching and can sleep with any amount of bedding over me and sleep all night, in sound, peaceful rest.

"Postum Food Coffee is absolutely worth its weight in gold to me." "There's a Reason." Read the little health classic, "The Road to Wellville," in pkgs.

Not Entire.

The aeronaut, after painfully extricating himself from the wrecked balloon, limped to the nearest farmhouse.

"Madam," he said to the woman who answered his knock, "can you accommodate with a night's lodging a balloonist who has come to grief?"

"I'd be glad to," she hesitated, "but you are an entire stranger to—"

"Not an entire one," he interrupted, with some acerbity. "For I have left my left ear, three teeth, and certain portions of my nose back there with the ruined car."

Laundry work at home would be much more satisfactory if the right Starch were used. In order to get the desired stiffness, it is usually necessary to use so much starch that the beauty and fineness of the fabric is hidden behind a paste of varying thickness, which not only destroys the appearance, but also affects the wearing quality of the goods. This trouble can be entirely overcome by using Defiance Starch, as it can be applied much more thinly because of its greater strength than other makes.

Great Discovery Announced.

Sir William Crookes, as a result of his own researches and the experiments of Professors Krowalski and Moscicki, of Freiburg university, has discovered a process of extracting nitric acid from the atmosphere. The process is available for commercial, industrial and agricultural purposes, and is expected to revolutionize the nitrate industry and the world's food problem.

Sheer white goods, in fact, any fine wash goods when new, owe much of their attractiveness to the way they are laundered, this being done in a manner to enhance their textile beauty. Home laundering would be equally satisfactory if proper attention was given to starching, the first essential being good Starch, which has sufficient strength to stiffen, without thickening the goods. Try Defiance Starch and you will be pleasantly surprised at the improved appearance of your work.

Pointed Conversation.

"Jack, I am going away."

"Going away, Madge?"

"Yes, going away. But before I go I have something to say to you."

"Something to say to me, little wife?"

"Yes, something to say to you. Don't send me any poker stories in lieu of the weekly remittance. That'll be about all."

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Colleges Undesirable Fire Risks.

Colleges are now regarded as rather undesirable insurance risks, and it is probable that the rate will be generally increased. In 18 years 784 fires have occurred in college buildings, entailing a loss of $10,500,000 in money and a heavy loss of life. This makes the average money loss over $13,000.

With a smooth iron and Defiance Starch, you can launder your shirt waist just as well at home as the steam laundry can; it will have the proper stiffness and finish, there will be less wear and tear of the goods, and it will be a positive pleasure to use a Starch that does not stick to the iron.

Physicians Recommend Castoria

CASTORIA has met with pronounced favor on the part of physicians, pharmaceutical societies and medical authorities. It is used by physicians with results most gratifying. The extended use of Castoria is unquestionably the result of three facts: *First*—The indisputable evidence that it is harmless: *Second*—That it not only allays stomach pains and quiets the nerves, but assimilates the food: *Third*—It is an agreeable and perfect substitute for Castor Oil. It is absolutely safe. It does not contain any Opium, Morphine, or other narcotic and does not stupefy. It is unlike Soothing Syrups, Bateman's Drops, Godfrey's Cordial, etc. This is a good deal for a Medical Journal to say. Our duty, however, is to expose danger and record the means of advancing health. The day for poisoning innocent children through greed or ignorance ought to end. To our knowledge, Castoria is a remedy which produces composure and health, by regulating the system—not by stupefying it—and our readers are entitled to the information.—*Hall's Journal of Health.*

Dr. B. Halstead Scott, of Chicago, Ill., says: "I have prescribed your Castoria often for infants during my practice, as I find it acts as a perfect laxative. It is first in its class. In my thirty years of practice I can say I never have found anything that so filled the place."

Dr. William Belmont, of Cleveland, Ohio, says: "Your Castoria stands first in its class. In my thirty years of practice I can say I never have found anything that so filled the place."

Dr. J. H. Taft, of Brooklyn, N. Y., says: "I have used your Castoria and found it an excellent remedy in my household and private practice for many years. The formula is excellent."

Dr. R. J. Hamlen, of Detroit, Mich., says: "I prescribe your Castoria extensively, as I have never found anything to equal it for children's troubles. I am aware that there are imitations in the field, but I always see that my patients get Pitcher's."

Dr. Wm. J. Mew'ing, of Omaha, Neb., says: "As the father of children I certainly know something about your great medicine, and do so from my own family experience I have in my years of practice found Castoria a popular and efficient remedy in almost every home."

Dr. J. R. Clawson, of Philadelphia, Pa., says: "The name that your Castoria has made for itself in the face of thousands of home-like and by the presence of children, scarcely needs to be supplemented by the endorsement of the medical profession, but I, for one, most heartily endorse it and believe it an excellent remedy."

Dr. R. M. Ward, of Kansas City, Mo., says: "Physicians generally do not prescribe proprietary preparations, but in the case of Castoria my experience, like that of many other physicians, has taught me to make an exception. I prescribe your Castoria in my practice because I have found it to be a thoroughly reliable remedy for children's complaints. Any friend of mine who has raised a family, as I have, will join me in heartiest recommendation of Castoria."

Secured by Mortgages on Farm Lands, adjacent to the City of Denver, Colo.

Proportion of Security, 3 to 1 with Rising Values

Denominations, $1,000, $500 and $100

Due serially from three to thirteen years. Interest payable semi-annually at The American Trust & Savings Bank, Chicago.

Issued by the Denver Reservoir Irrigation Co., Having A ROCKY MOUNTAIN WATER SUPPLY

The Company owns eight reservoirs and two very large reservoir sites (the largest to be completed at once), thus storing water for use late in the season.

It has early and late water, for which there is almost unlimited demand. Stored water is stored wealth.

The district lies immediately north of the city of Denver, the capital of the State of Colorado, a city of 200,000 people.

The bonds are secured, first, by mortgage on all of the property, canals, reservoirs, etc., of the Denver Reservoir Irrigation Company.

Also by collateral security in the form of mortgage liens deposited with The American Trust & Savings Bank, Chicago, Trustee, on Farm Lands to secure deferred payments for a perpetual supply of reservoir water aggregating **one and one-quarter times the amount of the bonds.**

The lands thus mortgaged are estimated worth three times the amount of the bonds, and rapidly increasing in value.

Hon. Elwood Mead, Chief Irrigation Expert of the Department of Agriculture, Washington, has examined these properties at our request. We quote from letter as follows:

"In conclusion, it is my conviction that this Company has an assured water supply, that it has an assured market for water, and that the price which can be obtained for water makes its construction an investment safe and vencurous, and that the enterprise promises every promise of a handsome return for its owners." ELWOOD MEAD, Consulting Engineer.

MOTHERHOOD

MRS. JAMES CHESTER

The first requisite of a good mother is good health, and the experience of maternity should not be approached without careful physical preparation, as a woman who is in good physical condition transmits to her children the blessings of a good constitution.

Preparation for healthy maternity is accomplished by Lydia E. Pinkham's Vegetable Compound, which is made from native roots and herbs, more successfully than by any other medicine because it gives tone and strength to the entire feminine organism, curing displacements, ulceration and inflammation, and the result is less suffering and more children healthy at birth. For more than thirty years

Lydia E. Pinkham's Vegetable Compound

has been the standby of American mothers in preparing for childbirth.

Note what Mrs. James Chester, of 427 W. 35th St., New York says in this letter:—Dear Mrs. Pinkham:—"I wish every expectant mother knew about Lydia E. Pinkham's Vegetable Compound. A neighbor who had learned of its great value at this trying period of a woman's life urged me to try it and I did so, and I cannot say enough in regard to the good it did me. I recovered quickly and am in the best of health now."

Lydia E. Pinkham's Vegetable Compound is certainly a successful remedy for the peculiar weaknesses and ailments of women.

It has cured almost every form of Female Complaints, Dragging Sensations, Weak Back, Falling and Displacements, Inflammation, Ulcerations, and Organic Diseases of Women and is invaluable in preparing for Childbirth and during the Change of Life.

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.

A Wrong Idea.

An editorial recently published in the Milwaukee Journal commences as follows:

"A man might fool the public; he might fool his friends; he might fool his family. But he can't fool himself."

Now we wish to take issue with the Journal man, and say, that a man invariably starts in by fooling himself. We firmly believe that the greatest hypocrite in the land believes himself to be the soul of honor. In fact there are very few men who do not succeed in fooling themselves, and doing it continually. A man invariably imagines he is the strongest right where he is the weakest, and notwithstanding that his friends may recognize his strong points, and urge him to develop himself along those lines he will generally be found to be paying very little attention to these matters and will pass over any reference to them without giving them much thought.

A man should not find out how he stands with himself, but how he stands with his acquaintances. It would be a mighty poor stick indeed who was not all right in his own estimation; in fact, there are very few of such persons. The crazy person first brings suspicion on himself by assuring those he meets that he is not crazy and the drunken man is profuse in his assertions that he is not drunk, while the gaffer who has no education and will not take the trouble to learn is always the first to assert that he is a mighty smart fellow, and doesn't care a cuss if the general public is apprized of the fact.

So we say a man not only can fool himself, but he invariably does do so. This is probably because the things that come easy are thought little of, while those that are acquired by hard work are magnified in their importance and appeal more strongly to the mind.

Don't like Present System.

It is said that the present system of two cent rate is not giving very good satisfaction to the railroad companies. The reason for this is said to be because there are a lot of traveling men who, since the mileage book went out of existence now tender the cash for their fare instead of stopping to buy a ticket each time. This system enables the conductors to be dishonest if they are so inclined, and there is very little chance for the railway officials to catch them at it.

It is said that the new developments may cause the companies to again adopt some form of mileage book in order to get away from the trouble. The traveling men also like the mileage books, as it furnishes an easy method for them to keep track of the number of miles traveled without making a note of each ticket purchased.

How to Avoid Appendicitis.

Most victims of appendicitis are those who are habitually constipated. Orino Laxative Fruit Syrup cures chronic constipation by stimulating the liver and bowels, and restores the natural action of the bowels. Orino Laxative Fruit Syrup does not nauseate or gripe and is mild and pleasant to take. Refuse substitutes. Daly Drug & Jewelry Co.

Doan's Kidney Pills relieve backache,
Cure every kidney ill.
Grand Rapids citizens endorse them.

Edward Young, living on Twelfth St., Grand Rapids, Wis, says: "I have used Doan's Kidney Pills and they gave entire satisfaction. I suffered with a lame back and sharp shooting pains through the loins. I ached constantly and was in a very miserable condition. My kidneys were in a disordered condition and gave me a great deal of annoyance. I was advised to try Doan's Kidney Pills and procured a box at a drug store. My kidneys are now regular in action and I feel a great deal better in every way since using them. It gives me pleasure to recommend Doan's Kidney Pills to others suffering from kidney trouble."

PAIN

Pain in the head—pain anywhere, has its cause. Pain is congestion, pain is blood pressure—nothing else usually. At least, so says Dr. Shoop, and to prove it he has created a little pink tablet. That tablet—called Dr. Shoop's Headache Tablet—relieves blood pressure away from pain centers. Its effect is charming, pleasingly delightful. Gently, though safely, it surely equalizes the blood circulation.

If you have a headache, it's blood pressure.
If it's painful periods with women, same cause.
If you are sleepless, restless, nervous, it's blood congestion—blood pressure. That surely is a certainty, for Dr. Shoop's Headache Tablets stop it in 20 minutes, and the tablets simply distribute the unnatural blood pressure.
Bruise your finger, and doesn't it get red, and swell, and pain you? Of course it does. It's congestion, blood pressure. You'll find it where pain is—always. It's simply Common Sense.
We sell at 25 cents, and cheerfully recommend

Dr. Shoop's Headache Tablets

Take Foley's Kidney Cure at the first sign of trouble as it corrects irregularities and prevents Bright's disease and diabetes. Daly Drug & Jewelry Co.

An Oklahoma paper declares that the weather is so hot there that the pop corn is popping on the stack. This is evidently meant as a companion piece to the Kansas story that the water melon vines grew so fast that they wore the melons out dragging them over the ground.

During the past week some of the members of the band have approached their friends on the subject of a series of concerts during the coming winter, and they have met with very favorable encouragment, and a number of names are already on the list. There is little question but what enough names will be secured to make the affair a success.

The new blue books which are issued every two years by the Secretary of State, will be ready for distribution the latter part of September or the first of October. The index this year will be an improvement over other years, and the additional work in this branch has delayed the publication to some extent.

The Marshfield News entered last week upon the nineteenth year of its existence. The News has been one of the best papers in this section of the state ever since it was established, and there does not seem to be any indication that it will go backward under the able management of its present proprietor, John White.

Register of Deeds, W. S. Powell was in Bayfield recently where he purchased 160 acres of fruit land, two miles north of Bayfield. Mr. Powell will soon start a crew of men at work setting out fruit trees and expects to get in about twelve acres this fall. Mr. Powell has great faith in the soil and climate conditions of that locality for fruit raising.

Dr. Brewer will visit the Hotel Dixon in this city on Thursday, Sept. 19th.

Portage Democrat.—H. W. Goggins and R. B. McDonald of Grand Rapids were in the city Sunday. They are taking a canoe trip to Princeton and left Grand Rapids last Tuesday. They made the distance of fifty miles from Pete-in-Well Rock down the Wisconsin to Kilbourn in one day, coming from the latter place to Portage on Saturday night. Yesterday they went to Montello. The canoe is a handsome little craft, seventeen feet long, of cedar, weighs only fifty pounds and was built by the Detroit Boat Co.

The day of safely marketing rotten eggs and eggs about ready to hatch is over and both farmers and merchants have ample reason for being exceedingly careful of the hen fruit they dispose of, as otherwise the consequences may be exceedingly unpleasant. A government inspector recently hung around a store in an Iowa town, and when a farmer brought in some eggs he said he wanted some fresh eggs and took the lot. Several of them proved to be rotten and the farmer was assessed $120 by Uncle Sam under the pure food law. If the merchant had taken the eggs and disposed of them to his customers he would have been reliable to the same fine. The only safe rule now for both farmer and merchant is to candle their eggs so that they know they are giving the purchaser whatever he or she pay their money for.—Necedah Republican.

New Auto Ordinance.

At the last meeting of the city council an ordinance was passed which put a speed limit of six miles an hour on automobiles while running between the library building and the St. Paul depot, and ten miles an hour in other parts of the city. Another part of the ordinance provides that automobiles in crossing the bridge must not run past teams ahead of them, but must take their place in the procession and remain there until the structure is crossed.

Most of the Auto owners object to the last clause in the ordinance as they claim that most of the trouble on the bridge is caused when one of the machines is compelled to creep along at a low rate of speed, making much more noise than when it is moving faster and meeting less teams.

Cured Hay Fever and Summer Cold

A. J. Nusbaum, Batesville, Indiana, writes: "Last year I suffered for three months with a summer cold so distressing that it interfered with my business. I had many of the symptoms of hay fever, and a doctor's prescription did not reach my case, and I took several medicines which seemed to only aggravate my case. Fortunately I insisted upon having Foley's Honey and Tar in the yellow package, and it quickly cured me. My wife has since used Foley's Honey and Tar with the same success." Daly Drug & Jewelry Co.

Nearly a Freeze.

Cranberry growers report that it was cold on the marsh Monday morning, mercury going as low as 27 in spots. No damage is reported, as there is an abundance of water, should it be needed. A low temperature was reached early in the night and it was only because of a brisk wind that prevailed that there was not some damage.

New Millinery Store.

—Misses Bock and Spengler got back from Chicago last week where they had been securing a line of goods for their millinery store which is in the building formerly occupied by Mrs. T. J. Riemen. They are showing a fine line of the latest styles and solicit a share of the patronage.

Railroad Men Sent West.

Tomahawk Leader.—John Flanagan, conductor, and Thomas McCarthy brakeman, left this (Friday) morning for Chamberlain, S. D., where they will work during the next sixty days on the Pacific coast extension of the Milwaukee road. They are transferred from the Valley division. Other Valley railroaders have been sent west to help on the extension, among them being Conductor Thomas Pennawell, Engineer Charles Slightom and N. L. Boucher.

Was a Good Play.

It is seldom that the people of Grand Rapids have the pleasure of attending a production that is as good as the Cow Puncher, which was procured at the opera house on Monday night. Although the play is of the Wild and Wooly West, and there is a heap of shooting and stabbing, it was handled in a manner that made it good, and while the audience was not large, it is certain that those present appreciated the play thoroly.

Elected President.

At the convention of Wisconsin and Michigan undertakers held at Milwaukee last week, J. R. Ragan was elected president of the association. Mr. Ragan had been vice-president of the association during the past year and it is evident that he gave good satisfaction in that capacity. Mr. Ragan also responded to the address of welcome on behalf of the association.

It was discovered some years ago that a part of the business district of Minneapolis was built over a great subterranean cavern, whose rocky roof lay some sixty or more feet below the surface, but the fact has been kept quiet until now, when the roof of the cave has been put upon the support of great concrete pillars. The cave had been caused by a subterranean waterflow, which has been diverted. When accidentally discovered, says the San Francisco Argonaut, the cavern contained a lake of fine ice-cold water, ten feet deep, and large enough to have supplied the city.

BONAPARTE EXPLAINS WHY PROCEEDINGS WERE POSTPONED.

NEW FACTS DISCOVERED

Department of Justice Had Ordered Immunity Pledge Fulfilled and Doesn't Yet Know What Its Attorney Learned.

Lenox, Mass. — Attorney General Charles J. Bonaparte Wednesday issued a statement regarding the Standard Oil case in the Illinois court. The attorney general's statement is as follows:

"On August 14 Judge Landis asked, in substance, that the department of justice consider portions of the transcript of testimony in the case of the United States against the Standard Oil company of Indiana in order to determine whether the Chicago & Alton Railroad company, its officers and employes, were entitled to the benefits of an agreement assuring it and them of immunity against criminal prosecution in connection with the granting of certain rebates to the Standard Oil company.

Immunity Bath Ordered.

"The department, in compliance with the desire of Judge Landis, examined the above mentioned records and carefully investigated the entire subject, and as a result of such investigation the attorney general on August 29 wrote Edwin W. Sims, United States attorney at Chicago, informing him in substance that the agreement was shown to have been made in June or July, 1906, by C. B. Morrison, Mr. Sims' predecessor in office; that Mr. Morrison's action appears to have been duly authorized at the time by the department; that in the opinion of the department the arrangement had greatly facilitated the indictment and conviction of the Standard Oil company, and that while certain portions of the evidence might be fairly open to unfavorable comment, the department regarded the government as bound in good faith and also as a matter of public policy, to give effect to the agreement.

"Mr. Sims was instructed to read this letter when the grand jury reconvened on September 3, and to take such further action to the foregoing end as might seem to the court and to himself appropriate in the premises.

New Facts Found by Sims.

"The department learns that Mr. Sims did not comply with these instructions by reason of his having had called to his attention very recently certain new, and, in his judgment, material facts, which he thought should be submitted to the department for its further consideration before its conclusions should be finally announced. For this purpose, he asked and was granted by the court a delay of three weeks.

"The department is not as yet advised as to what are the facts thus ascertained by Mr. Sims. It has great confidence in his sound judgment and devotion to duty and it awaits his report before taking further action in the premises. Inasmuch, however, as the circumstances of the case may be liable to misconstruction, it is deemed proper to submit now the present statement to the public."

BORAH INDICTMENT SERVED.

Senator and Others Are Accused of Timber Land Frauds.

Boise, Idaho. — An indictment returned last April by the federal grand jury against Senator William E. Borah and other prominent men, charging conspiracy to defraud the United States government, was served on the defendants Wednesday.

Beside Borah, the indictment includes Frank Martin, attorney general of Idaho under Gov. Steunenberg's administration; J. T. Barber and Sumner G. Moon, millionaire stockholders of the Barber Lumber company, residing in Wisconsin; J. L. Wells, F. H. Downs, John Kincaid, L. M. Pritchard, William Sweet, Albert M. Palmer and H. S. Rand.

The indictment charges that these persons entered into unlawful conspiracy in September, 1901, and various other times to secure by fraudulent entry timber lands in Boise county, Idaho.

Falling Tree Kills Seven.

Raleigh, N. C.—Details of the disastrous effect of a lightning stroke at Buckhorn Falls, in Chatham county, show that seven men were killed and ten injured. A heavy storm had forced 50 to 70 men to seek shelter in the cement house of the Buckhorn Falls' power plant. Lightning struck a large tree back of the house and the tree, splitting, fell over on the building, instantly killing two white men and five negroes and injuring three whites and seven negroes, all of them residents of this vicinity.

Shepard, of New York, while speeding over the fifth circuit in the automobile race here Monday, plunged into the river at Monte Chiari, broke his collar bone and slightly injured other parts of his body. Mr. Shepard's chauffeur, Ledmann, had his face cut and bruised. While Mr. Shepard was driving rapidly over the bridge spanning the Chiari river a tire slipped, the car lurched, bounded into the air, jumped over the bridge railing and shot down five yards into the river.

Metcalf's Son Elopes.

San Francisco.—William Howard Metcalf, youngest son of Secretary of the Navy Victor H. Metcalf, social favorite and Oakland bank clerk is married. The young man eloped to San Rafael and was married to Mrs. Wida Bevans, a widow.

Kaiser's Daughter Will Wed.

London.—Emperor William, it is understood, will arrange a marriage between his only daughter, Princess Victoria, and Prince Leopold, son of the Princess Henry of Battenberg.

"MIDDIES" UNDER ARREST

SCALED WALLS TO DINE WITH CHORUS GIRLS.

Hilarious Time at Bath, Me., May Lead to Ousting of Four Offenders.

Annapolis, Md. — Superintendent Badger's recommendation to President Roosevelt for the dismissal of four "middies," one of whom is a member of the first class, has caused much talk in Annapolis. The youths are under arrest and confined in their rooms.

Two of the cadets, who are upper classmen, broke the discipline of the academy on the recent summer cruise. The other two offenders are "plebes" of the type known in "middy" slang as "bilges"—boys who dropped back a class and reentered the fourth class a second time. Nothing has been heard from the president or the navy department on Capt. Badger's recommendation for dismissal of the four midshipmen.

It is learned that the culprits participated in and were understood to be the leaders of a "shore party" at Bath, Me., while the ships of the practice squadron were at anchor off that place. The return to the ship was said to have been long after the allowed time, and there is said to have been considerable disorder among the youths as a result of too frequent indulgence in something stronger than water.

"The Devil's Auction," with a spectacular chorus of beauty, was the bill at the local theater that night. The show was enjoyable, the supper afterwards was more so, and the stay from under the sheltering care of superior officers was prolonged. In fact, day was approaching when the two "plebes" returned to quarters by way of the wall to find that their absence had been noted in the conduct report.

It is said that since forwarding his recommendations for the dismissal of the four youths to the president, Capt. Badger has called on them to give him three reasons why they should not be dismissed.

In connection with the alleged afterthater party it will be remembered that Capt. Badger, since assuming charge of the academy, has held several conferences with Mayor Claude of Annapolis, with a view of breaking up this and similar practices through cooperation between the city and federal authorities.

TWO MOTORMEN ARRESTED.

Held Responsible for Fatal Wreck Near Charleston, Ill.

Charleston, Ill. — Following the verdict of the coroner's jury, charging them with criminal negligence, which resulted in the death of 14 persons in an interurban collision Friday, motorman Ben F. McClara and Charles Butts were arrested Sunday. McClara was motorman of the express car and Butts was motorman on car No. 14, in which the victims were riding. Both men were released on bonds of $3,000 each.

The coroner's jury completed its investigations Sunday and returned its verdict. McClara is blamed for leaving Charleston without knowing where car No. 14 was; Butts is accused of disobeying orders in not having his car under proper control while going around the curve where the disaster occurred. The jury further charges that the Central Illinois Traction company employs incompetent men, and does not keep in its principal office some person from whom employes can get positive instructions in the movement of cars, and that instructions to employes on days when the regular schedule is not in force are misleading.

WARNER STILL FIGHTS.

Pension Commissioner to Appeal Victory of His Stepmother in Will Case.

Clinton, Ill. —There is general rejoicing here over the decision of Judge Cochran that Mrs. Isabella Robinson Warner, stepmother of Vespasian Warner, United States commissioner of pensions, has no negro blood in her veins, did not deceive her husband, and is entitled to dower and homestead rights in the estate of Dr. John Warner. The court held that at the time of his death Dr. Warner was worth $1,600,000. The effect of the decision if sustained by the supreme court, to which an appeal will be carried, is to give the widow the old Warner homestead in Clinton, $250,000, and an annual income of $10,000.

Commissioner Warner, who, as executor of his father's estate was defendant to the suit, concealed whatever chagrin he felt over the defeat of his efforts to prevent his stepmother from inheriting her share of his father's estate. "There would have been an appeal in any case," he said. "Now, I shall carry it vigorously to the supreme court." He said he was still convinced his stepmother's father was a negro.

Famous Composer Dead.

Bergen, Norway.—Edward Hagerup Grieg, the composer, died here Wednesday. He intended sailing for Christiania Tuesday and his baggage was already on board a steamer, when he was taken sick.

Metz Tiger New Creek Chief.

Washington.—The president Wednesday authorized the secretary of the interior to appoint Sub-Chief Metz Tiger, of the Creek Indians, to succeed Gen. Pleasant Porter as chief of the tribe.

American Painting Portrait of King.

Marienbal.—King Edward has commissioned Mrs. Leslie Cotton, a portrait painter of New York, to paint his portrait. Two sittings already have been given and the results are most satisfactory.

Double Crime by Rejected Suitor.

Worthington, Minn.—Mrs. William Brayon, a widow, was shot and killed here Tuesday morning by William Walsh because she refused to marry him. Walsh then blew out his own brains

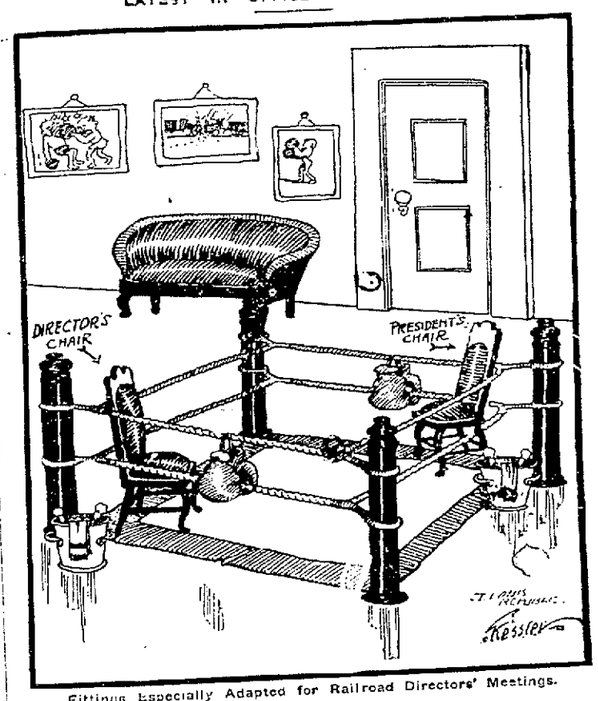

200 Dying Daily of Cholera.

Shanghai.—The epidemic of cholera among the Chinese in the lower Yangtse ports is spreading. About 200 persons die daily in the streets of Wuhu, in the province of Nganhwei, and Kiukiang, province of Kiangsi.

Edward Is Shocked by Song.

Marienbad.—King Edward has administered a rebuke for the singing of indelicate songs in places of public amusement, and his action, which was taken publicly, has created intense excitement in Marienbad.

PHILLIPS' WIDOW ARRESTED

CLEVELAND MURDER CASE HAS A SENSATIONAL TURN.

Dr. Richardson Tells Coroner's Jury of Peculiar Circumstances Surrounding Death.

Cleveland O.—Developments in the investigation into the death of John J. Phillips, coal operator, broker, banker and clubman, came thick and fast Wednesday and took a sensational turn late in the afternoon when Mrs. Phillips, widow of the deceased, was taken into custody by Chief of Police Stamberger, of the aristocratic suburb, East Cleveland.

Late Wednesday night Chief Stamberger made public a warrant which was issued by Justice Brown, of East Cleveland, charging Mrs. Phillips with the murder of her husband. The warrant charges second degree murder. Up to a late hour Mrs. Phillips, who collapsed about the funeral hour in the afternoon, had not regained consciousness. Physicians attending her say her condition is serious.

The police are reticent in the case, and whether they really believe Mrs. Phillips culpable in the murder or whether they merely believe that she can give facts concerning the tragedy which would solve the mystery surrounding it, does not appear at this time.

The inquest into the death of Phillips was resumed Wednesday morning by Deputy Coroner Houck. Dr. C. L. Richardson, the first witness, testified he had not been summoned until four a. m., more than three hours after Phillips was shot. He had been called by telephone. Mrs. Phillips admitted him to the house. She exclaimed:

"Oh, doctor, something dreadful has happened! Mr. Phillips has been shot by a burglar."

He found the wounded man in bed. He called Dr. Rhodes. After they reached the house Phillips asked them to leave the bedroom a minute as he wished to talk with his wife. Husband and wife were together alone for perhaps two minutes. He said there was a trace of blood on the stairway. The bed in which Phillips was found was much stained by blood. When the physicians reached Phillips they realized immediately. Dr. Richardson said, he could live but a short time.

BLACK HUNDREDS CHECKED.

Massacres Stopped by Action of Bankers and Exporters.

Odessa.—The Black Hundreds Tuesday suffered a severe blow by the closing of the grain bourse and the threat of the bankers to suspend financial transactions as a protest against the anti-Semitic outrages of September 2, when three men were killed and from 50 to 60 wounded. The disorders of last February were followed by similar steps, and financial transactions were then practically suspended.

A deputation of exporters called on the governor general Tuesday, and demanded that the authorities take action against the rioters, saying that if they did not, the exporters would leave Russia. The governor general assured the deputation that the police officials would suppress the raids of the Black Hundreds.

Strikers Become Fire Bugs.

Antwerp.—The striking dock laborers Wednesday night set fire to another lumber yard and stacks of lumber covering 3,000 square yards were soon blazing furiously. An entire regiment of troops was called out at ten o'clock to assist the firemen, but their efforts were futile. The loss was estimated at $800,000. Shortly after midnight the rioters set fire to two warehouses. Officers of the militia declared the strikers were in a dangerous temper as free liquor was being distributed to them in saloons.

Woman Murdered in Feud.

Clarksburg, W. Va. — Mrs. Fred Pickett, wife of the manager of the Bijou theater, was shot through the heart and instantly killed Tuesday afternoon, it is alleged, by Thomas Hannon, of the firm of Hannon & Murray, saloonkeepers. The shooting occurred on the front porch of the house where Mrs. Pickett was staying. Hannon immediately surrendered himself to the officers. A family feud of long standing is said to have been the cause of the crime. Mrs. Pickett was from Oil City, Pa.

Paducah Building Falls.

Paducah, Ky.—Without warning, the American Express company building collapsed at 5:10 Monday afternoon. A. F. Ingersoll was caught in the debris and it required more than two hours to dig him out. He was not badly injured.

E. R. Coffin Dies in Omaha.

Omaha, Neb.—E. R. Coffin, vice president of the Electrical Securities corporation of New York, and a prominent financier, died Monday at the Omaha General hospital.

FIVE YEARS FOR LOUIS GLASS.

San Francisco Telephone Man Is Sentenced for Bribery.

San Francisco. — Five years for Louis Glass, was the news message that sped with incredible rapidity to all parts of the city Wednesday morning from the Temple Sherith Israel at California and Webster streets, where was imposed the sentence that brought to a dramatic close the second trial of the vice president and former general manager of the Pacific Telephone and Telegraph company, convicted last week of the crime of bribery, a crime whose extreme punishment under the law of this state is 14 years. Only a small crowd, made up for the most part of lawyers and newspaper men, witnessed the imposition of sentence.

After his attorney had applied for and been granted a 30 day arrest of judgment, within whose expiration they will apply for bail and begin the prosecution of an appeal, Mr. Glass was removed by the sheriff to the county jail.

The crime for which Louis Glass was sentenced to San Quentin and of which he maintains his innocence, was the bribing of Supervisor Thomas F. Lonergan in the sum of $5,000 to vote against the application of the Home Telephone company for a franchise in this city.

RECEIVER FOR IRON COMPANY.

One of Bank Wrecker Harper's Concerns in Trouble.

Bristol, Va.—Judge A. M. Skeen of the United States court here Wednesday appointed Col. L. O. Pettit of Big Stone Gap receiver of the Union Iron and Steel corporation of New York, owning furnaces in Virginia, Ohio, Michigan and New Jersey.

The Union Iron and Steel corporation is an offshoot of the Union Steel and Chain corporation—the latter a $60,000,000 concern—organized several years ago by Edward L. Harper, formerly of Cincinnati.

It is reported that the receivership is a plan of the creditors of E. L. Harper to uncover his assets. Obligations aggregating several million dollars are held by Cincinnati and Chicago bankers against Harper, as a result of the failure of the Fidelity bank of Cincinnati about 20 years ago. Harper, it was alleged, wrecked this institution in an attempt to corner the wheat market. For this he was sentenced to eight years in the Ohio penitentiary.

Thief Robs Baron Rothschild.

Baden Baden, Germany. — A thief went through one of the principal hotels here Saturday night and stole a large amount of money and jewelry. Baron Goldschmidt Rothschild, of Frankfort, who is attending the races here, is reported to have lost from $2,000 to $20,000 and the Baroness Ephrussi, of Vienna, lost jewels which were reported to the police as being worth $18,000. There were many Americans stopping at the same hotel, but apparently they did not lose anything.

Two Cent Rate Ordered in Kansas.

Topeka, Kan.—At a late hour Wednesday afternoon the state board of railroad commissioners ordered that the railroads of Kansas put in a flat 2-cent fare rate, beginning Oct. 1.

Road Is in Bad Condition.

Jefferson City, Mo.—The board of railroad commisioners Tuesday reported on the condition of the Iron Mountain railroad. That portion of the main line between Poplar Bluff, Mo., and the Arkansas state line is reported in bad condition and a speed limit of 20 miles an hour is ordered until that part of the road has been repaired. The yards at Poplar Bluff are reported to be in bad condition and improvements have been ordered made. The rest of the line is considered reasonably safe.

Caid MacLean Well and Safe.

Tangier.—The anxiety expressed here regarding the safety of Caid Sir Harry MacLean, due to the protracted absence of direct news from the general, was relieved Monday by the arrival of letters from MacLean himself. He is in good health and is with Raisuli in the Ben Iarous territory. Letters from Raisuli to the British minister here, laying down the terms upon which the bandit chief will release MacLean, were also received. Raisuli suggests that an emissary be sent to Ben Iarous.

Fierce Battle at Casablanca.

Paris.—A terrific battle is reported to have occurred at Casablanca, Morocco, between the French and Spanish troops encamped there and a vast force of Moorish tribesmen.

Mounted on fleet horses the Arabs made a desperate charge, hoping to take the camp by surprise. They were met with volleys from the artillery and machine guns with which the French garrison is well provided and which mowed lanes through the tribesmen's ranks. The result of the encounter was favorable to Europeans.

HINDUS DRIVEN OUT

EAST INDIANS EXPELLED FROM THE BELLINGHAM MILLS.

SIX ARE BADLY BEATEN

Long Threatened Race Crusade Breaks Out Among White Laborers in the Washington Town.

Bellingham, Wash.—Six badly beaten Hindus are in the hospital, 400 frightened and half-naked Sikhs are in jail and the corridors of the city hall, guarded by policemen, and somewhere between Bellingham and the British Columbia line are 750 natives of India, beaten, hungry and half clothed, making their way along the Great Northern railway bound for Canadian territory and the protection of the British flag.

The long expected cry, "Drive out the Hindus," was heard throughout the city and along the water front Wednesday night. The police were helpless. All authority was paralyzed and for five hours a mob of half a thousand white men raided the mills where the Hindus were working, battered down doors of lodging houses and, dragging the invaders from their beds, escorted them to the city limits with orders to keep on going.

The trouble started at C and Holly streets, a district with Indian lodging houses. The houses were cleaned and the denizens started on their trek for the Canadian line. The mob then swept down on the water front and mill after mill was visited, the white employes joining the mob, and every Hindu was hustled outside.

Racial feeling has played no small part in the affair. Every day whites are being replaced in the mills by the East Indians. The invaders have become bold and insolent, many instances of women being pushed into the gutter, insulted on street cars, etc., being reported. General uneasiness of the whites is given as a reason for the outbreak.

The Hindus are all British subjects and their case is being placed before the British authorities.

TEN DEAD IN HOTEL FIRE.

Serious Loss of Life in Disaster at Shelton, Wash.

Tacoma, Wash.—Ten persons are known to have lost their lives in the burning of the Webb hotel at Shelton, 20 miles from here, early Thursday morning. Another person is dying and yet others may be found in the ruins.

The fire was discovered about 1:40 in the morning. It had started in the hotel annex, probably from a lighted cigar dropped in the sample room. The hotel was a three-story structure. The top floor was occupied by lodgers, but the exact number is not known.

Within a few minutes of the time the fire was discovered the hotel was a mass of flames. Screams and cries for help were coming from almost every window and dozens of people risked their own lives to help bring out the unfortunates. Those in the upper stories were cut off from the stairway and seven or eight jumped from the windows before help could reach them from the outside.

BIG FAILURE ON 'CHANGE.

Watson & Co., Grain and Stocks, Forced to Wall.

New York.—The failure of Watson & Co., members of the New York Stock and Produce exchanges, and of the Chicago Board of Trade, was announced in those exchanges Thursday. No cause was assigned for the failure nor was any estimate of the liabilities and assets made public.

The firm has had extensive connections in the west, maintaining offices in Duluth, Minneapolis, Fargo and Winnipeg. It is said to have carried on one of the biggest grain brokerage businesses in the country besides trading actively in railroad stocks, particularly those of the Great Northern and Northern Pacific railroads.

The members of the firm are Louis T. Watson, Henry P. Watson, Charles E. Anderson and Herschell V. Jones. Louis T. Watson is the only member of the firm residing in this city, the others being residents of Minneapolis.

Warship Coming to St. Louis.

Washington—Acting Secretary Newberry has ordered the tug Lebanon to tow the converted yacht Huntress from League Island, Pa., to Pensacola, Fla. There the Huntress will be formally turned over to the naval militia of Missouri, a crew from which will take the vessel to St. Louis. This will be the first time that a warship has been permanently stationed as far up the Mississippi river as St. Louis. Reports to the navy department from the recruiting parties in the middle west show the development of a remarkable interest in naval affairs in that section.

Brick Concern in Trouble.

Springfield, Ill.—Creditors of the McNeil Pressed Brick company of Jerseyville, Ill., with a plant valued at about $50,000, filed a petition in the United States circuit court Thursday alleging that the corporation is insolvent and asking that it be adjudged bankrupt. They allege that the company allowed an attachment to be issued in the circuit court of Jersey county in favor of certain creditors on Aug. 20, and permitted the sheriff of Jersey county to levy on all the stock on hand.

McKinley Monument Unveiled.

Buffalo, N. Y.—In a heavy downpour of rain and before a vast multitude, the McKinley monument on Niagara square was dedicated Thursday afternoon and formally turned over to the state of New York through Gov. Charles E. Hughes.

Man and Girl Drowned Together.

Muscatine, Ia.—Bodies of a young man and a girl clasped in each other's arms were found in the Mississippi river Thursday. There is nothing to establish their identity.

Snow Avalanche Buries Fifty.

Santiago, Chili.—Fifty persons are said to have been buried alive by a vast avalanche of snow that obliterated the Chilian custom house at Juncal. This station is on the Argentine frontier, high up in the Andes.

Failure Follows Trolley Wreck.

Mattoon, Ill.—Following the wreck that resulted in the loss of 17 lives, the Mattoon City Railway company and the Central Illinois Traction company, Thursday went into the hands of a receiver.

NOT THE TIME TO STOP.

Manager Saw the Possibilities in the Situation.

Jim Johnstone, the famous baseball umpire, said recently in New York that baseball crowds were far kinder to umpires than they used to be.

"This is true of theater crowds, too," said Mr. Johnstone. "Why, with provincial touring companies in the past, maltreatment was regularly expected. In fact, the companies profited by it in more ways than one.

"I knew of a company that was playing 'The Broken Vow' in Paint Rock, a one night stand. The audience didn't like 'The Broken Vow,' and once didn't like 'The Broken Vow,' and once didn't like 'The Broken Vow,' and once eggs, cabbages and potatoes rained upon the stage.

"Still the play went on. The hero raved through his or less speeches, dodging an onion or a baseball every other minute, and pretty soon from those missiles that he hadn't been able to dodge.

"But finally a gallery auditor in a paroxysm of rage and scorn hurled a heavy boot, and the actor, thoroughly alarmed, started to retreat.

"'Keep on playing, you fool,' hissed the manager from the wings, as he hooked in the boot with an umbrella. 'Keep on till we get the other one.'"

PRESCRIPTIONS IN LATIN.

The Public Should Have Them Translated by the Druggists.

What virtue is there in the secrecy with which the doctor hedges about his profession?

"Professional etiquette" occupies a prominent place in the curriculum of every medical school, and when strictly analyzed "professional etiquette" seems to mean "doing what is best for the doctor, individually and collectively."

Among the things that "is best for the doctor" is the writing of his prescriptions in Latin, and thus keeping the public in ignorance not only of what it is taking for its ills, but forcing a call upon the doctor each time a prescription is needed.

In plain and unmistakable English the writing of prescriptions in Latin makes business for the doctors.

Let us say that you have the ague. You had it last year and the year before. Each time you have visited the doctor and he has prescribed for you in Latin. You have never known what he has given you for the disease, and so each time you are forced to go to him again and give him an opportunity to repeat his prescription—in Latin, and his fee—in dollars.

If you ask the doctor why he uses Latin in writing his prescriptions, why he writes "aqua" when he means water, he will give you a technical dissertation on the purity of the Latin language, and the fact that all words are derived from it, etc. It will be a dissertation that you may not be able to answer, but it will hardly convince you.

It would be a good thing for the public to devise a little code of ethics of its own; ethics that will be "a good thing for the public individually and collectively."

Let us apply one of the rules of this code of ethics to you, the individual.

You call in the physician when you have the ague, the grippe, or any of the other ills to which human flesh is heir, and which you may have again some day. The doctor prescribes—in Latin, and you take this, to you, meaningless scribble to the druggist to have it compounded. Right here is where you come in, if you are wise. Say to the druggist that you want a translation of that prescription. It is your privilege to know what you are taking. While the doctor's code of ethics may not recognize this right it is yours just the same.

With the translated prescription in your possession you have two distinct advantages. You know what you are taking, and should you wish to call some other doctor at some time you will be able to tell him what drugs you have been putting into your system, and also if you should have the same disease again you can save yourself a visit to the doctor, and his fee, by taking this translated prescription to the druggist once more and having it refilled.

APPEAL THAT WAS HEEDED.

Judge Must Also Have Been Follower of the Gentle Art.

John Quincy Adams, of Massachusetts, third of that name, who died about ten years ago, was very fond of fishing, and not especially fond of his legal profession.

One day, the story runs, a case in which he was counsel was down for trial in a Massachusetts court. Mr. Adams did not make his appearance, but sent a letter to the judge. That worthy gentleman read it, and then postponed the case with the announcement:

"Mr. Adams is detained on important business."

It was afterward learned by a colleague of Adams that the letter read as follows:

"Dear Judge: For the sake of old Isaak Walton, please continue my case till Friday. The smelts are biting, and I can't leave."

She Experimented.

A little girl of five was taken to church one Sunday, and listened with unexpected attention to the sermon, which graphically told the story of the stilling of the tempest on the Sea of Galilee, and how Christ walked on the waves. In the afternoon her mother missed her and began an anxious search of the house. As she neared the bathroom she heard sounds of splashing, and hurried to the door to behold a small, excited face peering over the rim of the big white tub, and to hear a small, excited voice exclaim: "Say, mamma, this walking on the water is quite a trick."

Time to Fly.

The trust magnate leaped up from the banquet table and made a dive for his 100-mile-an-hour automobile.

"Hold on!" cried the astonished toastmaster. "Won't you wait for us to serve the dessert?"

"No," replied the nervous magnate; "I just saw a suspicious face loom up at the window. The next thing served will be a process."

And telling his chauffeur to put on full speed the wealthy fugitive headed for the next state.

A Knock.

"Jimmy," said the father, "there's a rip in your bathing suit. Go and sew it up."

"But papa," growled the boy, "mother will sew it for me."

"Never mind. I want you to learn to sew yourself. For," said the father, "some day you will get married, and then you won't have any mother—you will only have a wife."

GOOD DISH FOR INVALIDS.

Bavarian Creams of All Sorts Are Most Palatable.

Bavarian creams of all sorts make delicious and nourishing desserts for invalids. For chocolate Bavarian cream, soak half a box of gelatin in cold water for at least half an hour. In a double boiler heat one pint of milk and two ounces of grated chocolate; add the gelatin and stir until dissolved. Next add half a cup of sugar and remove from the stove, turn into a deep bowl and add one teaspoonful of vanilla; set this bowl into a pan of ice water and stir until it thickens like a sauce, then add a pint of cream whipped stiff. Stir lightly, pour into a mold, wet with cold water, set on ice and serve with whipped cream. This must be made very early in the morning if it is to be used for lunch or tea. If a fruit cream is desired substitute fruit juice, stewed and strained, for the milk, omitting the grated chocolate. Both raspberry and peach Bavarian cream are delicious.

Cheese and Mustard Sandwiches.

Cream some butter, adding to every tablespoonful two tablespoonful grated cheese seasoned lightly with paprika and made mustard. Mix thoroughly and spread. Grated American or Swiss cheese mixed to a paste with salad dressing makes an excellent filling, as also cottage cheese mixed with parsley or cress and seasoned with paprika. Other good combinations with cottage or cream cheese are cream cheese and olives green or black, chopped fine; cream cheese and chopped nuts, with or without mayonnaise; cheese and chopped dates or figs; cheese and chopped spinach moistened with lemon juice and mayonnaise; cheese with the yolks of hard-boiled eggs put through a ricer; cheese and sliced cucumber; cheese and preserved ginger, chopped; cheese, currant jelly and nuts.

Tasks That Do Not Pay.

Does it pay to darn socks repeatedly amid a multitude of other tasks, in order to save money that it may be spent for a silk petticoat, an extra feather in one's hat, or an expensive dessert for dinner? Does it pay to stand at the ironing board and shoot out ruffles and laces for children to wear once, perhaps, when it means to mother so tired out that she cannot repress impatient words later in the day? Does it pay to do without the occasional day's help in the kitchen in order to spend the money for some unnecessary piece of furniture? None of these things ever pays in anything but heartache and tired nerves, in temper and friction. And so the housewife's best friend is a "sense of proportion" applied to daily life and the daily tasks of the home.—Pictorial Review.

Beads Modish.

If there is any thought of beads going out of style, present conditions do not indicate it. There are new style large beads in irregular shapes, small beads of pretty patterns, good ones of precious gems and some decidedly cheap, though strange to say, very pretty. Women are wearing all kinds and to many women they are very becoming. Amber is a favorite color at present, since the color looks beautiful worn with the new brown tints. Genuine amber beads are expensive, but there are some very clever imitations in the market which will satisfy most women. Many cheap beads can be made more elegant in appearance by stringing them on platinum wire and using gold clasps. It is the cheap cotton string and brass clasp which give more evidence of cheapness than the beads.

The Deadly Travel Letter.

Letter-writing is, of course, an entirely different thing from note-writing. It is the intimate chat of dear friends or the art of conversation between congenial people. All letters exchanged in friendly correspondence are bound to be interesting and welcome, except, and it should be emphasized, letters of travel. What is more deadly than a letter that consists of arrivals and departures of trains, locations of hotels, shopping lists and raptures over scenery?—The Delineator.

Parasols.

Attractive parasols of white taffeta silk have wide borders of coin spotted silk in various colors to match suits and hats. The parasols come in two qualities and can be bought for $2.50 and $5. White linen parasols with wide eyelet embroidered borders are marked $2.50. A pretty white taffeta sunshade, cross checked with black, is finished with a half-inch edge of colored silk hemstitched on. It has a white furze handle. The parasol costs $3.25.

Use for Celery Leaves.

After cleaning the celery do not throw away the leaves. Wash them carefully, spread them out thinly in a pan set them on the back of the stove to dry.

After they are thoroughly dried, rub them to a powder, and put them away in bottles. They will prove a delicious flavor to many different kinds of dishes.

Try a pinch in a chicken stew, or with the scalloped tomatoes.

Take Tuck in Under Hem.

A simple way to shorten wash linen or crash skirts that have a deep hem at the bottom is to take up a tuck on the inside of the hem. This need not be stitched on a machine or very particularly sewn, as the starch used in the laundry will hold it in position and it can be more easily ripped if the washing shrinks the material.

Fruit Cocktail.

Cut in small pieces three or four varieties of fruits, cooked or fresh; mix with sugar or sugar sirup and the juice of the fruit. Wine may or may not be added. The whole is served cold in sherbet glasses in hollowed out pineapple or orange shells especially prepared for it.

Doughnuts.

Add a large cupful of mutton fat or suet to the fat in which the doughnuts are to be fried. They will absorb less grease and will not be greasy.

Tutti Frutti for Invalids.

For invalids who are allowed to eat fruit there is nothing more dainty and refreshing than the following: Take one box blackberries, one-half pound cherries, peel and cut up four bananas, powder with sugar to taste and mix thoroughly. Do this early in the morning and set on the ice to get cold.

To Roast a Bird.

Roast a bird with the breast down the greater part of the time; the flesh will then remain more juicy.

THE HOUSE OF A THOUSAND CANDLES

By MEREDITH NICHOLSON
AUTHOR OF "THE MAIN CHANCE," "ZELDA DEMERON," ETC.
COPYRIGHT, 1903, BY BOBBS-MERRILL CO.

CHAPTER XXI.—Continued.

"Good! but this is just wall here—with a layer of bricks and a thin coat of cement. A nice job it must have been to do the work,—and it cost the price of a tiger hunt," I grumbled.

"Take heart, lad, and listen," and Larry began pounding the wall with a hammer, exactly under the north cupboard. We had sounded everything and about the house until the process bored me.

"Hurry up and get through with it," I jerked impatiently, holding the lantern at the level of his head. It was darply cold under the posts and I was anxious to prove the worthlessness of his idea and be done.

"Thump! thump!

"There's a place here that sounds a little off the key. You try it."

I snatched the hammer and repeated the soundings.

Thump! thump!

There was a space about four feet square in the wall that certainly gave with a hollow sound.

"Stand back!" exclaimed Larry eagerly. "Here goes with the ax."

He struck into the wall sharply and the cement chipped off in rough pieces, revealing bricks beneath. Larry paused when he had uncovered a foot of the inner layer, and examined the surface.

"They're loose—these bricks are loose, and there's something beside earth behind them!"

The bricks were set up without mortar, and I plucked them out and rapped with my knuckles on a wooden surface.

Even Larry grew excited as we flung the bricks out into the tunnel.

"Ah, lad," he said, "the old gentleman had a way with him—he had a way with him!" A brick dropped on his foot and he howled in pain.

"Bless the old gentleman's heart! He made it as easy for us as he could. Now, for the Glenarm millions,—red money all piled up for the ease of counting it,—a thousand pounds in every pile."

"Don't be a fool, Larry," I coughed at him, for the brick dust and the smoke of Larry's pipe made breathing difficult.

"That's all the loose bricks,—bring the lantern closer,"—and we peered through the aperture upon a wooden door, in which strips of iron were deeply set. It was fastened with a padlock and Larry reached down for the ax.

"Wait!" I called, drawing closer with the lantern. "What's this?"

The wood of the door was fresh and white, but burned deep on the surface, in thin order, were the words:

The Door
of
Bewilderment

"There are dead men inside, I dare say! Here, my lad, it's not for me to turn loose the family skeletons,"—and Larry stood aside while I swung the ax and brought it down with a crash on the padlock. It was of no flimsy stuff and the remaining bricks cramped me, but half a dozen blows broke it off.

"The house of a thousand ghosts," chanted Larry, as I pushed the door open, crawled through and dropped down inside.

Whatever the place was it had a floor and I set my feet firmly upon it and turned to take the lantern.

"Hold a bit!" he exclaimed. "Some one's coming,"—and bending toward the opening I heard the sound of steps down the corridor. In a moment Bates ran up, calling my name with more spirit than I imagined possible in him.

"What is it?" I demanded through the opening.

"It's Mr. Pickering. The sheriff has come with him, sir."

As he spoke his glance fell upon the broken wall and open door. The light of Larry's lantern struck full upon him. Amazement, and, I thought, a certain satisfaction, were marked upon his countenance.

"Run along, Jack,—I'll be up a little later," said Larry. "If the fellow has come in daylight with the sheriff, he isn't dangerous. It's his friends that shoot in the dark that give us the trouble."

I crawled out and stood upright. Bates, starting at the opening, seemed reluctant to leave the spot.

"You seem to have found it, sir," he said.—I thought a little chokingly. His interest in the matter nettled me; it was none of his affair, for one thing; and my first business was to go above for an interview with the executor,—a matter of immediate importance, as should have been clear to any one.

"Of course we have found it!" I ejaculated, brushing the dust from my clothes.

"Is Mr. Stoddard in the library?"

"Oh, yes, sir; I left him entertaining the gentlemen."

"Their visit is certainly most inopportune," said Larry. "Give them my compliments and tell them I'll be up as soon as I've articulated the bones of my friend's ancestors."

Bates strode on ahead of me with his lantern, and I left Larry crawling through the new-found door as I hurried toward the house. I knew him well enough to be sure he would not leave the spot until we had found what lay behind the Door of Bewilderment.

"You didn't tell the callers where you expected to find me, did you?" I asked Bates, as he brushed me off in the kitchen.

"No, sir. Mr. Stoddard received the gentlemen. He rang the bell for me and when I went into the library he was saying, 'Mr. Glenarm is at his studies, Bates,'—he says—'kindly tell Mr. Glenarm that I'm sorry to interrupt him, but won't he please come down?' I thought it rather neat, sir, considering his clerical office. I knew you were below somewhere, sir; the trap door was open and I found you easily enough."

Bates' eyes were brighter than I had ever seen them. A certain buoyant note gave an entirely new tone to his voice. He walked ahead of me to the library door, threw it open and stood aside.

"Ah, here you are, Glenarm," said Stoddard. Pickering and a stranger stood near the fireplace in their overcoats.

Pickering advanced and offered his hand, but I turned away from him without taking it. His companion, a burly countryman, stood staring, a paper in his hand.

"The sheriff," Pickering explained, "and our business is rather personal—"

He glanced at Stoddard, who looked at me.

"Mr. Stoddard will do me the kindness to remain," I said and took my stand beside the chaplain.

"Oh!" Pickering ejaculated scornfully. "I didn't understand that your relations with the neighboring clergy were so intimate. Your taste is improving, Glenarm."

"Mr. Glenarm is a friend of mine," remarked Stoddard quietly. "A very particular friend," he added.

"I congratulate you—both."

I laughed. Pickering was surveying the room as he spoke,—and Stoddard suddenly stepped toward him, merely, I think, to draw up a chair for the sheriff; but Pickering, not hearing Stoddard's step on the soft rug until the clergyman was close beside him, started perceptibly and reddened.

It was certainly ludicrous, and when Stoddard faced me again he was biting his lip.

"Pardon me!" he murmured.

"Now gentlemen, will you kindly state your business? My own affairs press me."

Pickering was studying the cartridge boxes on the library table. The sheriff, too, was viewing these effects with interest not, I think, unmixed with awe.

"Glenarm, I don't like to invoke the law to eject you from this property, but I am left with no alternative. I can't stay out here indefinitely, and I want to know what's I'm to expect."

"That is a fair question," I replied. "If it were merely a matter of following the terms of the will I should not hesitate or be here now. But it isn't the will, or my grandfather, that keeps me. It's the determination to give you all the annoyance possible,—to make it hard and mighty hard for you to get hold of this house until I have found why you are so much interested in it."

"You always had a grand way in money matters. As I told you before you came out here, it's a poor stake. The assets consist wholly of this land and this house, whose quality you have had an excellent opportunity to test. You have doubtless heard that the country people believe there is money concealed here,—but I dare say you have exhausted the possibilities. This is not the first time a rich man has died, leaving precious little behind him."

"You seem very anxious to get possession of a property that you call a poor stake," I said. "A few acres of land, a half-finished house and an uncertain claim upon a school teacher!"

"I had no idea you would understand my position," he replied. "The seriousness of a man's oath to perform the solemn duties imposed upon him by law would hardly appeal to you. But I haven't come here to debate this question. When am I to have possession?"

"Not till I'm ready,—thanks!"

"Mr. Sheriff, will you serve you writ?" he said, and I looked to Stoddard for any hint from him as to what I should do.

"I believe Mr. Glenarm is quite willing to hear whatever the sheriff has to say to him," said Stoddard. He stepped nearer to me, as though to emphasize the fact that he belonged to my side of the controversy, and the sheriff read an order of the Wabana county circuit court directing me, immediately, to deliver the house and grounds into the keeping of the executor of the will of the estate of John Marshall Glenarm.

The sheriff rather enjoyed holding the center of the stage, and I listened quietly to the unfamiliar phraseology. Before he had quite finished I heard a step in the hall and Larry appeared at the door, pipe in mouth. Pickering turned toward him frowning, but Larry paid not the slightest attention to the executor, but leaned against the door with his usual tranquil unconcern.

"I advise you not to trifle with the law, Glenarm," said Pickering, as the sheriff folded his paper. "You have absolutely no right whatever to be here. And these other gentlemen—your guests, I suppose—are equally trespassers under the law."

He stared at Larry, who crossed his legs for greater ease in adjusting his lean frame to the door.

"Well, Mr. Pickering, what is the next step?" asked the sheriff.

"Mr. Pickering," said Larry, straightening up and taking his pipe from his mouth, "I'm Mr. Glenarm's counsel. If you will do me the kindness to ask the sheriff to retire for a moment I should like to say a few words to you that you might prefer to keep between ourselves."

I had usually found it wise to take any cue Larry threw me, and I said:

"Pickering, this is Mr. Donovan, who has every authority to act for me in the matter."

Pickering looked impatiently from one to the other of us.

"You seem to have the guns, the ammunition and the numbers on your side," he observed dryly.

"The sheriff may wait within call," said Larry, and at a word from Pickering the man left the room.

"Now, Mr. Pickering,"—Larry spoke slowly,—"as my friend has explained the case to me, the assets of his grandfather's estate are all accounted for,—the land hereabouts, this house, ten thousand dollars in securities and a somewhat vague claim against a lady known as Sister Theresa, who conducts St. Agatha's school. Is that correct?"

"I don't ask you to take my word for it, sir," rejoined Pickering hotly. "I have filed an inventory of the estate, so far as found, with the proper authorities."

"Certainly. But I merely wish to be sure of my facts for the purpose of this interview, to save me the trouble of going to the records. And, moreover, I am somewhat unfamiliar with your procedure in this country. I am a member, sir, of the Irish bar. Pardon me, but I repeat my question."

"I have made oath—that, I trust, is sufficient even for a member of the Irish bar."

"Quite," said Larry, nodding his head gravely.

He was not, to be sure, a presentable member of any bar, for a smudge detracted considerably from the appearance of one side of his face, his clothes were rumpled and covered with brick dust, and his hands were black. But I had rarely seen him so calm. He recrossed his legs, peered into the bowl of his pipe for a moment, then asked, as quietly as though he were soliciting an opinion of the weather.

"Will you tell me, Mr. Pickering, whether you yourself are a debtor of John Marshall Glenarm's estate?"

HER LITERARY LIKES

They had just met; conversation was somewhat fitful. Finally he decided to guide it into literary channels, where he was more at home, and, turning to his companion, asked, "Are you fond of literature?"

"Passionately," she replied. "I love books dearly."

"Then you must admire Sir Walter Scott," he exclaimed with sudden animation. "Is not his 'Lady of the Lake' exquisite in its flowing grace and poetic imagery? Is it not—" "It is perfectly lovely," she assented, clasping her hands in ecstacy. "I suppose I have read it a dozen times."

"And Scott's 'Marmion,'" he continued, "with its rugged simplicity and Scottish characters and his graphic, forceful pictures of feudal times and customs?" "I just dote on them," she replied.

"And Scott's Emulsion," he continued, a faint suspicion beginning to dawn upon him.

"I think," she interrupted rashly, "that it is the best thing he ever wrote."—Montreal Herald.

TROUBLE AHEAD FOR JACK

His Well Meant Advice Evidently Caused All the Trouble.

Recently a lady was seen hurriedly approaching the gate at the Grand Central Depot, in New York. She had a traveling bag in one hand, a hat box and a bunch of flowers in the other and an umbrella and a box of lunch tucked under her arm. There was not a moment to spare, but the gatekeeper stopped her mad rush.

"Let me have your ticket, please," he commanded.

"I can't," she said, turning first red and then white, "but I have one. Please let me pass. I've got to catch that train."

"You will have to show your ticket, madam," repeated the gateman sternly. Tears glistened in the lady's eyes.

"I tell you I can't, it's—it's— Well, I pinned it in my— Oh, I put it where I wouldn't lose it, and I can't get it till I have a chance to— Oh, do please let me through!" She was allowed to pass, and was heard to say as she made a dash for the train:

"The next time Jack worries me into putting things where I can't lose them I guess I'll know it."

Sickness as Age Advances.

At the age of 20, the average man loses six days yearly by illness; at 65 he will lose 26 days.

State Capital Notes

Weekly Budget Gathered by Our Special Correspondent at Madison.

Madison.—Electors of a city or village cannot by means of petitions or in any other way legalize an illegal contract or act of the village board or city council, says Judge Michael Kirwan, of Manitowoc, in a decision which he has handed down in the Duggan vs. Rusch case at Reedsville, heard at the June term of Circuit court. He emphasized the validity of the state law prohibiting village or city officeholders from entering into contracts with the municipalities they may serve. The decision makes permanent a temporary injunction issued in court a year ago preventing L. Rusch, a village trustee, from furnishing material or labor to the village of Reedsville while an official there. In the decision the court intimates that the officer is liable for prosecution and penalty for an attempt to collect the moneys due. Rusch performed certain work for the village of Reedsville while a trustee and furnished lumber because both could not be procured from anyone else, and the plea entered in defense that the village could get no one except Rusch to accept the contract, and that the work was imperative, is not recognized by Judge Kirwan, who adheres to the principle that an illegal act is always illegal, and no petition can make it otherwise.

Plan to Attract Immigrants.

Marinette county already has a development association organized to work with the state board of immigration in its efforts to people the northern wilderness and make grass and grain grow where now are to be found stumps and brush, ferns and wild berry bushes, timber and opportunities to make money. That it required nothing more than a suggestion from the state commissioner of immigration, A. D. Campbell, to bring about such an organization is explained by the fact that there are in Marinette county more members of the Wisconsin Immigration and Development association than in any other county in the state with the single exception of Milwaukee. Also, Elmer Grimmer of Marinette is a director of the association, the organization that brought about the establishment of the state board of immigration. Also, again, Marinette county in general and the city of Marinette in particular are awake and ready for a campaign which may be described in the vernacular of "going some." The articles of incorporation of the Marinette County Development association were forwarded to the secretary of state at Madison this week and the organization is now ready for business. That the membership of the body is not confined to citizens of the county seat is shown by the list of officers. J. B. Wood of Amberg is president, George E. Bograd of Wausaukee, secretary, D. J. McAllister of Marinette, vice president, and L. J. McAlpin of Marinette, treasurer. The directors are F. E. Noyes, L. J. Evans, T. J. Redeling and P. A. Martineau, of Marinette; J. L. Hallenbeck, Dunbar; H. P. Bird, Wausaukee; S. D. Woodward, Peshtigo; Peter Nelson, Beaver; Philip Dwyer, Pound.

Hears Pleas for Mercy.

Gov. Davidson recently heard arguments on applications for the pardon of three persons serving life sentences in the state prison at Waupun for murder. After hearing the arguments he took the applications under consideration and will probably not reach a decision on any of them for some days. The first application heard was one for the pardon of Marvin M. Fenner, who was sentenced on May 10, 1883, for killing John L. Hesler near Grand Rapids in January of that year.

The second was for a pardon for John Bernhardt, who was sentenced for life on June 30, 1891, for killing Henry Schley of Waukesha with a club on the night of May 3, 1891.

The third petition heard was for the pardon of Wilhelmina Beehr of the town of Washington. Shewano county, who pleaded guilty on April 24, 1891, to the murder of Michael Sell in 1889.

Shot Guns Balk Railroad.

An attempt by the Chicago, Milwaukee & St. Paul railroad, abetted, it is charged by the board of regents of the university, to force a spur track across the property of A. W. Gratz on West Johnson street while Mr. Gratz and his family were away from home, was frustrated by the timely arrival of Fred Gratz who, with a couple of shotguns, kept two section crews off the property until help arrived, by threatening to blow off the head of the first man who attempted to start work.

Denies Paper Mill Merger.

Anson R. Flower of New York city, director of the International Paper company, in a statement emphatically denied that his company is back of the prospective print paper mill merger of the middle west. Mr. Flower is the first man in an executive position who has come out point blank and denied that it is the great eastern syndicate that is behind the movement. This again seems to lend substantiation to the report circulated some time ago that Standard Oil interests are back of the project.

Oshkosh to Have New Gym.

The executive committee of the state board of normal school regents at a meeting here considered plans for the new gymnasium at the school in Oshkosh. Plans for the new gymnasium at the Oshkosh school were submitted by four architects—H. Van Ryn of Milwaukee, William Waters of Oshkosh, Herman Wildhagen of Appleton, and W. T. Proudfit of Des Moines, Ia. After considering the plans for several hours the committee decided to defer making a selection for a month.

Decides Important Case.

Manitowoc.—Electors of a city or village cannot by means of petitions or in any other way legalize an illegal contract or act of the village board or city council, says Judge Michael Kirwan, of this city, in a decision which he has just handed down in the Duggan vs. Rusch case at Reedsville, this county, heard at the June term of circuit court, and he further emphasized the validity of the state law prohibiting village or city office holders from entering into contracts with the municipalities they may serve.

Ambitions of McGovern.

A political rumor of some moment is to the effect that District Attorney McGovern of Milwaukee will be the Republican candidate for mayor of that city next spring, the boyish executive having decided that one term is quite sufficient for him. There have been whisperings more or less pronounced for some months that Mr. McGovern would be a candidate for the Republican nomination for governor next year. It is quite natural that this other rumor should follow. If it turns out that the rumor is based on fact it will not mean that the district attorney has abandoned his hunt for the governorship. Indeed, if he is a candidate for mayor of Milwaukee that fact will be pretty good confirmation that he is a candidate for governor, and will push his claim with all of the skill and energy at his command. It is remembered by the older residents of the state that the position of mayor of Milwaukee has long been regarded as a fairly good stepladder upon which to climb to higher stations.

Severs Connection With Company.

E. B. Cutrill, general manager of the Wisconsin Telephone company has severed his connection with the company after a service of 21 years in which time he rose from a minor clerkship to one of the highest positions with the company. At the last meeting of the board of directors it was decided to combine the office of general manager with that of president. The consolidation of these two offices was proposed as much in the nature of an economy as well as better to align the lines of organization, other large corporations having found it profitable as well as advisable to have these two positions joined in one person. The additional work entailing greater responsibilities upon President Burt, the office of assistant general manager was created and filled by appointing H. O. Seymour who had acted as special agent for the company for the last five years. Under the circumstances Mr. Cutrill deemed it best to resign at once.

Against Municipal Ownership.

The municipal ownership of a lighting plant is a thing of the past in Superior, according to the vote of the council at its last meeting, when it was decided to make a contract with the local lighting company at a lower rate than formerly. The contract is for a year, but with a clause which may lengthen it to five years. Most of the aldermen in the council and the mayor were elected on municipal ownership platforms, but after attempting to build a light plant, and expending $800 for the services of an engineer in preparing plans they came to the conclusion that no money could be saved, and negotiated with the company for a new rate on which to base a contract. The vote was 14 to 2 in favor of making the contract.

Mayor Becker at Madison.

Mayor Becker of Milwaukee, and his secretary, George R. Gove, arrived here in the mayor's auto and left the next day for Beloit. Mayor Becker was the chief speaker at the reunion of the Dodge County Veterans' association. "Your lives and your deeds will always be sung," the mayor said. "It was your glorious example which inspired our younger generation when they left their homes, their wives and their children to enter the doubtful conflict with Spain in 1898. For their part in that short but eventful epoch they are deserving of the same glory which our people love to bestow upon the veterans of the war of the rebellion."

Attacks Open Berth Law.

The first attack on the new law providing that occupants of a double berth in a sleeping car shall have the right to direct whether the upper berth shall remain open or closed will be made at Green Bay by John Redmond, a negro porter for the Pullman company. He is accused by James H. Elmore and W. O. Stone of neglecting to comply with their directions to close the upper berth.

Post for Filipino Student.

Jose Gomez, a Filipino student in the state university, has been appointed a lieutenant in the constabulary in the Philippine islands, and will leave Madison in a few days for Manila to assume his new office. During the two years he was in the university he attained the reputation of being one of the best drilled and most efficient members of the university battalion.

Site for Marinette Post Office.

The postmaster general has accepted the proposal of the Albert Parth company to lease quarters for five years for the Marinette post office. The location is Main street between Wells street and Pierce avenue.

Made Normal School Regent.

Gov. Davidson has appointed Attorney H. O. Hamilton of Whitewater a member of the state board of normal school regents to succeed Attorney Paul Tratt, who has moved from Whitewater to Fort Atkinson.

To Choose Park Sites.

The state park board has appointed T. E. Brittingham and Senator E. E. Browne of Waupaca and W. H. McFetridge of Baraboo a committee to look up available sites for parks in the state.

New Bank Gets Charter.

State Banking Commissioner Bergh has issued a charter to the Bank of New Auburn at New Auburn, Chippewa county. Amt. Erickson is president, and L. Abrahamson cashier of the new institution.

Poisoned by Candy.

District Attorney Thompson of Racine is investigating a sensational poisoning case that may develop in arrests being made. Three families received through the mail boxes containing caramels and marked sample candy. A mother and daughter partook of the candy and were taken violently ill. There was sufficient arsenic in each caramel to kill a person. An impression prevails in police circles that a woman who is suspected is not right mentally.

RECIPES FOR FRENCH CAKES.

Dessert Dishes from the Land of Good Cooking.

Lorraine Cakes.—Take one quart of flour, a half pound of butter a small teaspoonful of salt, and two eggs. Mix and knead these well together. Flatten on the board to the thickness of two silver dollars. Butter a pie dish and line it with the paste, making a rounded edge at the top. Put it in the oven for 15 minutes, and take it out. Beat two eggs together, with a pinch of salt and a half pint of cream. Pour it to the paste. Scatter over a few small pieces of butter and put it again in the oven for another 15 minutes. Serve warm or cold.

Biscuit de Savoie.—Take four yolks of eggs and mix them with three tablespoonfuls of powdered sugar. Add and mix two ounces of rice flour, a tablespoonful of vanilla and the whites of the four eggs beaten to a froth. Butter a mold, put in the mixture and cook it in the oven for about 20 minutes.

Quarter Quartz Cake. Weight four eggs and mix with them their equal weight of sugar, the same weight of flour, as much of butter and a tea spoonful of vanilla. Butter a mold, put the mixture in and bake it in the oven for 20 minutes.

Souse of Pigs' Feet.

Another substantial addition to the lunch hamper for a fishing or camping party, where men "grown ups" are in the ascendency, are pickled pigs' feet made in the good old Dutch way. The souse should be made a day or two before using, but it will keep for days. They may be eaten cold or broiled over the campfire, as preferred. Put the desired number of well cleansed pigs' feet in a kettle, cover with boiling water, and cook for half an hour. Remove and plunge into cold water. Drain and return to the kettle. Cover with water and vinegar I equal proportions, adding to each gallon of the liquor a tablespoonful of salt, two tablespoonfuls of sugar, a tablespoonful of whole peppers, a bay leaf, three blades of mace, four large onions cut fine, and a teaspoonful of thyme tied in a little bag. Cook until the feet are very tender, remove and pack in a stone jar. Strain the liquor over the feet, and when cold cover tightly and keep in a cold place.

White Bread.

Chop into a quart of flour a tablespoonful of shortening, wet with a quart of warm water, add a tablespoonful of white sugar and beat in a half-yeast cake that has been dissolved in warm water. Beat hard for ten minutes, cover and set to rise over night. In the morning work in two and one-half quarts of white flour that has been sifted with a tablespoonful of salt. When the flour is thoroughly incorporated, turn upon a pastry board and knead for 15 minutes, then set to rise until double its original size. Knead again, make into loaves, kneading each loaf for five minutes. Set to rise for an hour, then bake.

Lima Beans Served in White Sauce.

A delicate way of serving lima beans is in a white sauce. Soak one pint of beans over night. About three hours before dinner drain, cover with two quarts boiling water and simmer gently for two and a half hours. Drain, saving the water for soup. Put into a saucepan a heaping tablespoonful butter, a half tablespoonful flour, a teaspoonful salt and pepper to season. Stir into this a pint of hot milk and cook, stirring constantly until smooth and thick. Season the beans with salt and pepper, simmer 15 minutes longer and serve.

Vear Scallop.

Chop into bits cold roast veal and the dressing with which it has been stuffed. Put a layer of this mince in a baking dish and moisten with veal gravy, then put in a layer of chopped canned mushrooms and sprinkle with buttered bread crumbs. Season with salt and pepper, add more chopped meat and proceed in this way until the dish is full, sprinkling the top with crumbs and bits of butter and wetting each layer of the meat with gravy. Cover the dish and bake until the contents bubble, then uncover and brown lightly before sending to the table.

Renovate Skirt.

An old black skirt may be successfully cleaned as follows: First of all, brush and shake it well to get rid of the dust, then brush carefully all over with a good hard clothes brush dipped in malt vinegar, using plenty of the vinegar. The skirt should then be hung out in the air for an hour to dry, and then pressed on the wrong side over a damp cloth. The ordinary serge or cloth skirt will be found to look like new after this treatment.

A Savory Green Corn Chowder.

This is a savory mixture of green corn, green peppers and tomatoes. To a half dozen ears of corn allow five tomatoes, five green peppers and five small onions, all minced. Cook the onions a golden brown in a little bacon fat, then add the other vegetables, having the corn cut from the cob as nearly whole as possible. Cover with boiling water and simmer for an hour. Season with salt and pepper and serve.

Fruit Gelatine.

Pare and core a dozen nice apples, put them in a pudding dish with a cup of sugar and half a pint of water, and bake until tender. When cool, lay in a glass bowl. Have wine or lemon jelly made, and when it begins to congeal pour it over the apples and set on ice. Whip some cream, flavor it with wine or lemon, and put around the jelly. Sliced peaches or bananas are also nice thus.—Good Housekeeping.

Salad Dressing.

Take a coffee cup; put into it one egg; a pinch of salt; two tablespoonfuls of sugar; one of flour; mix well, and fill up the cup with vinegar. Take a small, granite pan; put it on the fire with a piece of butter the size of a walnut. When warm, put in the contents of the cup; stir until thick and smooth. Put back in the cup, and when cool thin with sour cream. Will keep a month or more.

Clean Old Cloak.

It is not always necessary to send light cloth coats or cloaks to the cleaners whenever they appear a little soiled by smoke and dust. A successful method of removing surface dirt consists in rubbing the material with equal parts of oatmeal and whiting applied with a piece of flannel. The coat should be well shaken, and the same application repeated once or twice, until the cloth looks perfectly clean. After shaking it once more, it should be pressed on the wrong side with a warm iron.

News of Wisconsin

Interesting Happenings in the Various Cities and Towns of the State.

WILL MINISTER TO APACHES.

Milwaukee Pastor to Resign to Go as Missionary to Southwest.

Milwaukee.—Rev. A. P. G. Haeberle has resigned from the pastorate of the Jerusalem Evangelical Lutheran church of this city in order to devote himself to missionary work among the Apaches. He will leave with his family for Globe, Ariz., where he will be stationed in charge of the missionary field work among Indians of the southwest. Mr. Haeberle recently spent some time in the southwest in search of health and was thrown into intimate contact with the Indian tribe to whose spiritual welfare he will now minister, and a warm friendship existed between him and some of the tribesmen.

VACATION FULL OF HORRORS.

Man Witnessed Two Murders and Attempt at Murder; Nearly Robbed

Manitowoc.—That Chicago is a wicked place is the firm conviction of Arthur Waechter, an employe of the Johns Lindell Co. of this city, who in a short seeing tour of that town witnessed two murders, an attempted murder, a desperate fight, and in the end was himself chased into an alley where he made his escape, by four things bent on robbery and possible murder. Waechter spent a portion of his vacation at Chicago, and now cows that neither money nor any other inducement will again lure him from his native heath to go to a large city in search of recreation.

CAUGHT IN WISCONSIN.

Harry D. Cotton, Wanted in Litchfield, Ill., for Forgery, Under Arrest.

Milwaukee.—Harry D. Cotton, wanted at Litchfield, Ill., is under arrest here. The arrest was made on advice from the state's attorney and sheriff of Montgomery county, Ill., and he is held on the charge of embezzlement and forgery, waiting the arrival of Sheriff Bray, with requisition papers. Young Cotton is wanted in Litchfield on a charge of embezzling $100 from the International Text Book company, and the evidence appears to be conclusive. The young man is also accused of passing at least three worthless checks.

Will "Outlaw" Dietz Give Up?

Hayward.—Is John Dietz, the far famed "hero of Cameron dam," ready to compromise his trouble with the Chippewa Lumber & Boom company? E. M. Worden, of Ladysmith, and two companions arrived here from the Dietz stronghold in an automobile and reported that Dietz told he would be glad to settle the cause. They also reported that a mysterious person is now in communication with Dietz. Mr. Worden was able to run his car up to a mile from the "outlaw's" homestead. At that point the trail was impassable, and they walked on to the house, meeting John and his son on the way. Mr. Worden says he received a hearty welcome.

One-Legged Man Rescues Girl.

Stowell.—E. A. McGrath, a one legged station agent at Stowell, is a candidate for a Carnegie hero medal. While sitting in his station he was signaled that an engine was approaching. He went out, and, looking about, saw five-year-old Emma Hamish, playing on the track. McGrath hobbled up the track as fast as he could, reaching the child, dragged her from the rails, and then threw him self into the ditch just as the big engine thundered by.

More Arrests Are Made.

Kenosha.—The Kenosha police and the Northwestern railway detectives have reopened the search for the members of the gang of train robbers which recently burglarized many cars on the Northwestern road at small stations in this county, and as a result of the renewed activity, Charles Griffin, and Walter Lyons, both Milwaukee men, are in jail here awaiting a hearing.

Milwaukee Banker Dead.

Milwaukee.—Samuel Marshall, founder of the Marshall & Ilsley bank and the oldest banker in Milwaukee, died at his home, 40 Prospect avenue, at the age of 87 years, after an illness of five weeks. An attack of kidney trouble, accentuated by old age, was too much for the veteran banker, and after sinking gradually for the last week, he passed away quietly.

Transfer Men Organizing Combine.

Eau Claire.—All the transfer men of this city are making plans for organizing a combine for the purpose of fixing a scale of prices that will be uniform for hauling baggage, passengers and doing dray work.

Fire Imperils Factory.

Racine.—Fire which started in the engine room of the Racine-Sattley Co., at Racine Junction, for a time imperiled the whole plant. It was extinguished, however, with a loss of only $2,000.

Killed by a Crowbar.

Manitowoc.—George Norkowski, an employe of the Chicago & Northwestern handcar crew, met instant death when a crowbar used in lifting rails slipped from his grasp, striking him with such force in the chin as to cause almost instant death.

Six Times Wedded Woman Dies.

Green Bay.—Mrs. Mary Smith, of the town of Howard, is dead. She had been married six times and was living with her sixth husband at the time of her death.

Potato Crop Blighted.

Waupaca.—The late potato crop in many parts of the surrounding country, which up to about a week ago looked promising, has been struck with the blight, caused by the hot, damp weather of the last week. The early potatoes were about one-third of an average crop.

Death in Green Bay Hotel Fire.

Green Bay.—One life was lost and damage to the extent of $20,000 was done by fire in the Beaumont hotel, one of the oldest hotels in the state.

SPRING GREEN CELEBRATES.

Village Observes Its Semi-Centennial at Fair Time

Spring Green.—The semi-centennial of Spring Green is a fair time to every department of life to-day. It has been decided to have a home-coming week, a reunion of the old soldiers and sailors, a concert of children's work, a concert by the Spring Green band, a baseball tournament between Spring Green and Lone Rock, and a street fair. A reunion of Milwaukee soldiers called in memory of Mr. Beach, Beckley & Milwaukee, of Mr. Beach, Beckley & Milwaukee, of Mr. Beach and the work of the great teacher and the work of the great schools of Liverpool, England, Edinburgh, Scotland, and many other places. Spring Green has no equal in the state to-day. Even the village celebrated its semi-centennial and Col. Bryan and wife were present.

EFFORT TO DIE IS FOILED.

Man Jumps Into Lake and Is Saved After Struggle

Kenosha.—Albert Hertel, a resident of this city, attempted suicide by drowning in Lake Michigan here when he leaped from the Simmons dock at the foot of 22d street into the lake. He was rescued by employes of the Peerless Manufacturing company. Before the man was carried to the beach he made a terrific struggle, inspector, that he decided to die. After he was taken out of the water he was locked up in the county jail pending the arrival of his folks here, having come here but a short time ago from Detroit, Mich.

To Round Up Tax Dodgers.

Milwaukee.—There will be no more tax dodgers in the Fifth District within three years if the plan of Tax Commissioner William F. Hooker of Milwaukee is carried out. Mr. Hooker is preparing to form a national association of tax commissioners and perfect a working system of assessments that no one shall escape. Mr. Hooker proposes that each tax commissioner exchange reports and thus find out who is escaping taxation.

Dock Breaks; 14 in Water.

Green Bay.—Fourteen people, three of them women, were thrown into Green Bay by the breaking of a dock at Bay Beach. Several lives were nearly lost. The men rescued the women. The water was over five feet deep. A Czech, Will Nemech and James Green made the rescue of the three women. It was their wives who carried the babies. A number of people were injured by the breaking of the dock.

Soil Girls' Waists.

Appleton.—Three candidates for the general offices of the Wisconsin Traction, Heat, Light & Power company, to the effect that conductors on interurban cars had soiled white shirt waists in assisting women to and from cars, has resulted in a general order from the managing office of the company that conductors shall assist only very old women and children.

Loat Faith in Banks; Robbed.

Superior.—Sam Tetson and wife, Lizzie are held on a charge of robbing Henry Johnson. Johnson had $1,500 in gold under a plank and found it missing. He claimed that Mrs. Tetson watched him dig the hole and although he tried to throw her off the scent he did not succeed. Tetson had $100 in gold on his person when arrested.

Lightning Kills Three.

Milwaukee.—During an electrical storm which passed over here Mrs. Hannah Alfier of West Allis was struck and instantly killed. At Waukesha George Huertel, aged 50 years, a farmer, and William Cannonsburg, a farmer at Kenosha, were also killed.

Gored by Bull; Is Dead.

Antigo.—Carl Dumjohn, aged 65 years, was badly gored by an angered bull at his home, near Summit Lake village, north of here, and died shortly afterward. The animal had escaped from its enclosure and Mr. Dumjohn was attempting to drive it back.

Crop Outlook Alarming.

Oshkosh.—The farmers in Winnebago county are very pessimistic over the crops. Some farmers are nearly ruined.

Burglars at Marinette.

Marinette.—Justice Jeremiah O'Leary, a veteran lawyer, discovered that his safe in his office had been swept clean by burglars and many valuable documents are gone. It is believed the burglary was committed with the hope of destroying a will.

Ptomaine Kills Children.

Galesville.—Two children are dead and a third is suffering from ptomaine poisoning in the family of John Reichel, a farmer near here. The fatalities are due to eating spoiled fish.

Makes Gift of Old Curio.

Appleton.—Judge N. C. Griffin has presented Lawrence university with a copy of the Ulster County Gazette, printed January 4, 1800. It contains a notice of the death of George Washington.

Play May Cause Death.

Appleton.—While scuffling playfully with her mother at their home in Neenah Miss Clara Arft gave her mother's shoulders a shrug that resulted in developing an attack of pleurisy that is likely to prove fatal.

COUNCIL PROCEEDINGS.

Council Rooms, Sept. 5, 1907.
Council met in regular session. Mayor Wheelan presiding. Present: Aldermen, Arpin, A. D. Hill, Steib, Rowson, Nisson, Getzlaff, Panter, Kubisiak, Jackson, Ristow, Lyon, G. M. Hill and Hansen.

On motion, the reading of the minutes of the last regular meeting was dispensed with.

There was presented the following communication from the Board of Education and, on motion, the same was referred to the comptroller to report upon at the next meeting of the Council.

Grand Rapids, Wis., Sept. 2, 1907.
To the Common Council,
Grand Rapids, Wis.

Gentlemen:—We hereby certify, on behalf of the Board of Education of this city, that it will be necessary to raise for school purposes, $18,200.00 by direct taxation. Of this amount $1305.00 is for kindergarten purposes.

Frank Pomainville
President of the Board of Education.
M. S. Yonker,
Clerk of the Board of Education.

The Sidewalk committee to whom had been referred the petition of W. A. Drumb, et al, for the placing in proper repair of that portion of the sidewalk on First Ave. North lying between the MacKinnon corner and the Tribune Printing Office reported, recommending that the prayer of the petitioners be granted and the said sidewalk put on grade. On motion, the report of the Committee was adopted and the Committee instructed to proceed with the work.

The Street committee to whom had been referred the petition of T. E. Mollen, et al reported, recommending that in place of the street being lowered at this time, that there be a few catch basins put in along the street.

Motion made and seconded that the Street committee be authorized and instructed to take whatever action they deem proper to give the necessary relief to the petitioners.

Motion made and seconded that the original motion be amended so as to adopt the Committee's report. Vote taken on the amendment and the same was carried.

The Street committee to whom had been referred the petition of John A. Gayner, et al, praying for the extending and opening of what used to be known as Main St. (now Second St.) from its present northerly terminus to the depot grounds of the Green Bay & Western Railway reported, recommending that the prayer of the petitioners be granted and, on motion, the report of the Committee was adopted.

On motion, by unanimous vote the Clerk calling the roll, the Clerk was instructed to draw an order of $28.00 in favor of the Rahlin estate, in payment of a strip of land to be used in the extension of Second St.

The city Attorney, to whom had been referred the claim of Frank Stahl for $29.60 on account of error in delinquent return, made the following report which was, on motion, accepted.

"To the Hon. Mayor and Common Council of the city of Grand Rapids, Wis.

Gentlemen:—With reference to the claim of Frank Stahl for reimbursement of certain money paid by him to said city on account of not returning certain taxes as delinquent, will say that on interviewing assessor Jones he states that he has reassessed said property and therefore the city will receive said tax this coming tax paying time or credit when same is returned delinquent and then the within claim will be due Mr. Stahl.

However the payment of the same at this time or a few months later will make but little difference and therefore your Honorable body will use your discretion in the matter. J. J. Jeffrey,
City Atty."

On motion, by unanimous vote the Clerk calling the roll, the claim of Frank Stahl for $29.60 was allowed.

The city Attorney to whom had been referred the claim of W. L. Compton for $5.95 presented the following report which was, on motion, accepted.

"To the Hon. Mayor and Common Council of the city of Grand Rapids, Wis.

Gentlemen:—With reference to the within claim of W. L. Compton will say that there is no liability on the part of said city for said claim.
J. J. Jeffrey,
City Atty."

There was presented the petition of T. J. Cooper and 9 others, petitioning your Honorable Body to cause the telephone poles standing on the easterly side of Fourth Ave. North to be placed in the proper position in order that shade trees may be planted between the curbstone and sidewalk on the said easterly side of Fourth Ave. North, the present location of said poles rendering the successful planting of shade trees impossible. On motion, the above petition was referred to the street committee.

There was presented the petition of J. L. Nash, and 8 others, praying your Honorable Body to open up and place in good passable condition a street beginning at a point on Oak St, between lots owned by Henry McCann directly east of his residence and running in a southerly direction to intersect with Birch St., (the street which is proposed to be opened from Third St. to the Lincoln High school) a distance of two blocks. Also to lay a sewer pipe on said street to connect with the sewer on Oak St. On motion, the petition was referred to the street committee and to the sewer committee.

Ordinance No. 111, regulating the running and driving of automobiles within the city limits, was presented. Motion made and seconded that Section 1 of the ordinance be amended so as to limit the speed on certain streets to eight miles per hour instead of six miles.

The amendment was lost by the following vote, the Clerk calling the roll. Ayes:—Arpin, Steib, Rowson, Hansen, 4. Nayes:—A. D. Hill, Nisson, Getzlaff, Panter, Kubisiak, Jackson and Ristow, 7.

On motion, by the following vote Ordinance No. 111 was adopted. Ayes:—A. D. Hill, Nisson, Getzlaff, Panter, Kubisiak, Jackson, Ristow, 7. Nayes:—Arpin, Steib, Rowson and Hansen, 4. (Same may be seen in legal form.)

There was presented the bill of W. C. Martin for $247.90 for papering and painting the Library building under a contract which was let for the sum of $195.00. On motion, the bill was referred to the committee on General Business.

The bill of J. D. Smith for $5.34 was referred to the committee on General Business and the bill of Louis Schroeder for $15.15 was laid over, as the same was not verified.

Ordinance No. 111.

An ordinance to regulate the speed of automobiles and the manner of crossing the wagon bridge with same, in the City of Grand Rapids, Wis.

The Common Council of the City of Grand Rapids, do ordain as follows:—

1. It is hereby declared to be unlawful for any person or corporation to run, drive, or cause to be run or driven, or allow to be run or driven any automobile of any kind or description, within the limits of said City, at a speed to exceed ten (10) miles per hour, and on the following named streets at a speed to exceed six (6) miles per hour: On Grand Ave. between the St. P. depot and the wagon bridge; on First street between Vine street and the Library building; and on Second street between Oak street and the said Library building.

2. It is hereby declared to be unlawful for any person or corporation to run or drive any automobile of any kind or description, or cause or allow the same to be run or driven on the Wagon bridge in said City at a speed greater than six (6) miles per hour, or pass any team or teams, horse or horses, going in the same direction as said automobile while on said bridge.

3. Any person found guilty of violating sections one or two of this ordinance shall on conviction thereof be liable to a fine of not less than Two dollars and not more than Twenty-five dollars and costs of suit, and in case of failure to pay said fine and costs the defendant shall be punished by imprisonment in the County jail of Wood County, Wis., not less than one and not more than twenty days.

4. This ordinance shall take effect and be in force from and after its passage and publication.

W. E. Wheelan,
Mayor.

Passed, approved, and adopted by the Common Council of the City of Grand Rapids, Wisconsin, this 3rd day of Sept A. D. 1907.

Attest C. E. Boles,
City Clerk.

SS. PETER AND PAUL CHURCH.

REV. FATHER REDING.

Death of Mrs Christie.

Mrs. J. K. Christie of Minneapolis died last Friday morning at her home cause of death being childbirth. Deceased was well known in this city, being a sister to our townsman, T. E. Mullen, and was reared and educated in this city, and was married to J. K. Christie thirteen years ago. She resided in Merrill for about five years and then moved to Minneapolis, where the family has since resided. Mrs. Christie is survived by her husband and one daughter.

Mr. and Mrs. T. E. Mullen left for Minneapolis on Friday to attend the funeral which was held on Tuesday.

Mrs. Christie had many friends in this city and the family has the sympathy of all in their affliction.

A son to Mr. and Mrs. Geo. Baker Jr., last week.

Death of Patrick Rouhan.

Patrick Rouhan, one of the old residents of the town of Sigel, died on Tuesday morning after an illness extending over considerable time.

Deceased was 82 years of age, and was a native of Ireland, but had made his home in this county for many years. He is survived by four children, they being John Rouhan of Sigel, William Rouhan who resides in Michigan and Mrs. Thomas Hannifin and Mrs. Frank Lessig of the town of Sigel.

Mrs. George Pomainville and twin babies departed on Thursday for their home in Woumundee after making an extended visit with relatives in the city.

Fossert Bros. returned from Pittsville on Monday with their crew of men where they have been putting in cement sidewalks for the past month.

Rounding Up Juvenile Band.

Prof. Bliss reports that he has already had applications for about fifteen boys who want to join the juvenile band that he is to organize in the near future, and he expects to start the boys in about the first week in October. It is his intention to make the tuition only twenty-five cents a week, which will be about a dollar a month, or $12 a year. For this the boys will get two rehearsals a week, which should soon put them where they could be making some noise. It is the desire to get about thirty boys interested in the matter, so that there will be enough to make a good representation on each instrument.

Those interested in the matter should see Prof. Bliss at once so that the boy may be able to start in with the rest of the crowd.

SOCIAL EVENTS.

Last Friday night Mr and Mrs. Youker received, at their home on Third street, the teachers of the schools of the city. The house was beautifully decorated with asters and ferns. Mrs. Rockwell, assisted by Misses Helen Taylor and Vera Rockwell, presided at the punch bowl, and later in the evening assisted in the serving of dainty refreshments. Everyone present spent a most delightful evening. The guests other than the teachers of the city schools were: Rev. and Mrs. Fred Staff, Mr. and Mrs. M. H Jackson, Miss Michaels and Mr. and Mrs E. L. Hayward.

On Sunday Stevens Point will play the second of a series of three games with the Tigers, when it is expected that there will be another close contest

Mrs. Leon LeSarge entertained a few ladies at her east side home on Tuesday afternoon in honor of her cousin, Miss Mabel Hutchinson of Elroy.

Death of Nicholas Winkle.

Nicholas Winkle, one of the old residents of Grand Rapids, died early Tuesday morning at the home of Mrs Lizzie Coony.

Deceased was a native of Germany and was in his 83d year at the time of his death He had been a resident of Grand Rapids since 1854

The funeral will be held tomorrow morning from the Catholic church, Rev. Reding officiating.

Jos. Landry is taking in the sights at the state fair this week.

Won From Stevens Point.

The Tigers went to Stevens Point on Sunday and won a game from the Stevens Point boys by a score of 6 to 1. It was a Grand Rapids Game all the way thru and the Stevens Pointers had to work exceedingly hard in order to keep from being shut out entirely.

Minahan started pitching for the Tigers, and was throwing a good game, but in the third inning he felt that his arm was giving out and called in the captain and asked that somebody be put in his place Byers was put in the box and he threw the other six innings in good shape, they getting their only run off him.

This is the first of a series of three games that these two teams intend playing, the next of the series to be in this city on Sunday next The boys and the visitors who went over with them report that they were treated in first class style by the Stevens Point people, and a large crowd turned out to see the game, notwithstanding the fact that the weather was anything but good for baseball, and looked very much like rain Admirers of baseball should not fail to see the game next Sunday

Pellersells-Smith.

Henry Pellersells and Miss Lillian Smith, both of this city, were married on Wednesday last at LaCrosse.

Both of the contracting parties are well known in this city, the groom being one of our old residents, while the bride is the daughter of Mr and Mrs. Patrick Smith and has made her home in this city for a number of years past The Tribune unites with their many friends in extending congratulations

Mr. and Mrs Pellersells arrived home on Monday evening from their wedding trip and will make their home on the east side in this city

Gentlemen Invited.

The ladies want it understood that they will cordially welcome the husbands of the members and their friends who may be invited, each member being privileged to bring one guest. The address by Miss Stearns on "Regulate your Hurry" is sure to be of interest to the gentlemen as well as ladies

CHANCES ARE GOOD

No Need to Worry Because You Were not Started Among First in Contest.

We have been asked by some if it is now too late to enter in the piano contest and compete for one of the prizes. We answer that it is not too late, that you can start in at any time, and if you have been saving votes to send them in and get your name among the contestants. The object in getting your name in is that your friends may see it and in case they have not been calling for votes it will be possible for them to do so, and thus help you along. Some who have striven for the ten dollars and failed to get it were under the impression that that was all there was to it, but they should bear in mind that the votes they have secured will count on the piano and other prizes that are being offered.

There are a number of good prizes offered, some of which are of even more practical value than a piano, so that those who are hustling for votes but do not occupy the first place, need not feel at all discouraged. The standing of the contestants will be given each week.

ON THE TRAIL OF THE AMERICAN MISSIONARY

By WILLIAM T. ELLIS

This Distinguished American Journalist Is Traveling Around the World for the Purpose of Investigating the American Foreign Missionary from a Purely Uninterested, Secular and Non-Sectarian Standpoint. Illustrated with Drawings and from Photographs

CRITICISM OF MISSIONS RAMPANT IN PORT CITIES

Tientsin, China.—Here is the place to come to learn "the other side" of foreign missions. This city and Shanghai are doubtless the two greatest centers of anti-missionary sentiment in the world. The criticisms of missions and missionaries most commonly heard have to do with China and with China's capital. Three out of four stories reflecting upon missions are located in China, and two out of three are likely to concern Peking and its neighborhood.

Now, that means Tientsin. The foreign population of Peking is very small, including few persons besides legationers and missionaries. But Tientsin, the port of Peking and of North China, has the second largest foreign population in the empire. It is a city of imposing European buildings, of foreign stores, of modern streets and homes, of clubs and churches. In short, it is a bit of the west which greets a traveler like an oasis in the desert of the east.

A Missionary Charged with Graft.

On the ship between Chefoo and Tientsin I was talking over a variety of far eastern topics with a British merchant who had lived for more than 20 years in Tientsin. He was plainly a gentleman, a man of family, of breeding and social standing, and in all respects his views had been temperate. Without his knowing my interest in the subject, the conversation drifted to missionaries. "Really, some one should look into this missionary business. It is not what people at home think it is. You go up to Peking, and you will find the missionaries living in compounds as big as legations. And during the Boxer trouble they looted frightfully.

"There was one missionary, a Mr. Blank, who was made interpreter to a British punitive expedition, with the honorary rank of second lieutenant. At every village he would demand a large sum of money, in the name of the commanding officer, which he would quietly pocket himself. At length word of this reached the British authorities, and the missionary was asked for an explanation. He flatly denied everything. Then he was given his choice of standing a fair court martial, with the assurance that he would be shot if found guilty, or of being deprived of his rank and of being dismissed from the service in ignominy. He chose the latter, thus practically confessing his guilt. His missionaries all say 'Poor Mr. Blank' and look upon him as a martyr, although the board that employed him took a different view of the matter, and discharged him. He lives in Tientsin to-day, and is a rich man."

Trouble Through Ex-Missionaries.

Now this attitude of many English-speaking residents of the east toward missions means something. It is not a sufficient answer to fling charges, as missionary supporters commonly do, at the moral character of the white communities in port cities. The man above quoted is, as has been said, an honorable man of position, and his statements were specific.

In the particular case he cited, an investigation showed that his statements were warranted, except as to the attitude of the missionaries toward the alleged culprit in question. What the merchant said was mildness as compared with what the missionaries said to me. They seem to have a more intimate knowledge of the crookedness of the ex-missionary than others, and they have the additional grievance that he has brought disgrace upon their calling. Similarly, the missionaries went farther than others in condemnation of another notorious character in this city, an ex-missionary now in corporation service, who is commonly alluded to as "the prize coward of the Peking siege," and whose business methods are reputed to be devious.

Of this attitude of the missionaries, apparently, the community is unaware. In its sensitiveness to criticism the missionary body presents a solid front, making no explanations, and the world does not know that the black sheep have been cast out of the flock. It appears that this place, like other port cities, contains a number of ex-missionaries who have been dismissed from board service, or who have of their own will retired to enter business. There is nothing dishonorable in the latter practice, although it is a clear violation of accepted missionary ethics. The onus of the shortcomings of all these, who are naturally still called "missionaries," attaches to the missionary body, the members of which, I have been repeatedly assured, look with utmost disfavor upon the entrance of any one of their number into money making pursuits.

The wiser way would be for the missionaries openly to disavow responsibility for the course of all except bona fide members of established missions; and hospitably to meet honest criticism with frank explanations and with respect for the motives of the critics, instead of maintaining an attitude of silence, seclusion and self-sufficiency. In the matter of the gulf that exists between the foreign community and the missionaries, the latter appear to be more blameworthy than the former, for it is their business to be friendly with all men and to guard the good reputation of their work. Yet in truth they sometimes seem the more censorious of the two. Some of the sweeping assertions of the missionaries concerning the evil lives of non-missionary foreigners are as unfounded as many of the criticisms which the latter make of the missionaries. Investigation reveals the fact that in Tientsin more effort is put forth in behalf of the moral welfare of the Anglo-Saxon young men and for the reclamation of those who have strayed, by the non-missionary residents than by the missionaries themselves.

Where the Missionaries Are at Fault.

An interested critic could probably prove the charges of narrowness, exclusiveness and censoriousness against many members of the missionary body here, admitting the noteworthy exceptions. All this might be comprehended within the phrase, general unfitness for missionary work in a port city. It is a singular lack of perception on the part of the mission boards in America and Europe which often put in the open ports missionaries who by social gifts, intellectual equipment and by temperament are least likely to do the most effective work there, both among the natives and the foreigners. No end of misunderstanding and misrepresentation would be escaped by a wiser method on the part of the boards.

The frequently expressed policy of the missionaries, that they have come to work for the heathen and not for Europeans, is mistaken to the point of absurdity and folly, as in a case I ran across here. The best single missionary enterprise in Tientsin is the work of the Young Men's Christian association in the Chinese city proper. It is almost entirely self-supporting, so greatly does it command the respect of eminent Chinese, the viceroy himself being among the contributors. All the work, including the home of the missionary, is in a big Chinese residence, with upwards of a hundred rooms. A school which has government recognition and approval is maintained, as well as a library and an athletic department. Some months ago the wife of the secretary was taken suddenly and dangerously ill. A messenger was hastily dispatched to a physician in the foreign concessions, who reported himself busy. (The journey by night into the center of the native city is not a pleasant one.) A missionary physician who, like all the other missionaries, lives outside the native city, sent back word, when appealed to: "I came to treat the Chinese, and I cannot take other patients."

So after this experience, which might have proved fatal to his wife, the association secretary, to avoid its repetition, is obliged to consider the possibility of surrendering his home amid the Chinese, where he is doing notable work, and of taking up his residence in the foreign settlement. Probably such an extreme instance as this of the contention of the missionary, that he came to work for natives and not for foreigners, cannot be duplicated. But it is nevertheless significant.

A Missionary Rebellion.

Since this article is dealing with missionary shortcomings, it is proper to tell the story of a missionary rebellion which has its focus in Tientsin. In the southern part of this province is an independent undertaking called the "South Chihli mission," begun ten years ago by Rev. H. W. Houlding, an American Congregationalist. The mission is not related to any church or denomination, its support coming chiefly from independent city missions and from Congregational churches in the west and middle west of the United States. Mr. Houlding, it appears, has the gift of glowingly portraying China's needs and last year he received more than $20,000 for the work of his mission. During the past eight years he has brought out 39 adult missionaries, most of them coming at their own expense and putting all their worldly possessions into a common mission fund, from which they could never withdraw them.

Troubles in the mission have been almost constant, and now former members of the mission are out in a public circular, which they are sending widely to America, making various charges against the mission and its head. It is reported that the American consul general is taking steps to require Mr. Houlding to provide return passage to America for his missionaries, since a number of them have become a charge on the consulate. For it appears, according to this circular, that of the 69 missionaries brought out, three have died and 38 have left the mission in dissatisfaction. Most of these have remained in China, in connection with other missions; some have gone into business here, and some have returned to America.

The circular charges Mr. Houlding with lack of proper qualifications for leadership, with denying the missionaries a voice in the management of the mission; with running a sort of absolute monarchy, all the property being in his own name, and with making representations concerning the work which are not borne out by the facts. The signers of the circular say that they have made the mildest possible presentation of the real situation, and they hint at more serious evils. Some of the many stories current here are ludicrous. One member of the mission was British, and liked his cup of afternoon tea. The mission thought this a wicked and sinful indulgence. When he persisted in the practice, they held a mission prayer meeting over him, to show him the evil of his course! Another member was similarly disciplined for being too fond of peanuts! All this while grave evils were existing in the conduct of the mission.

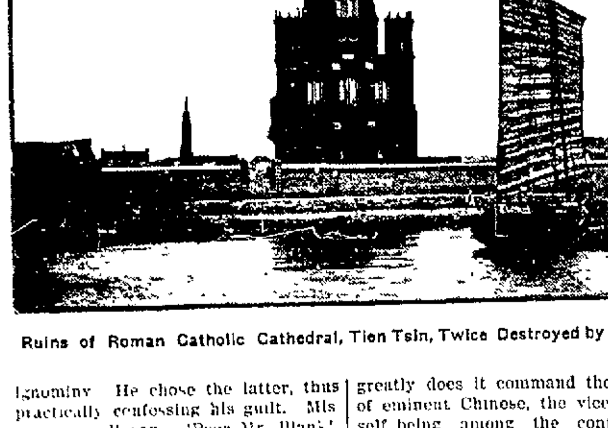

Stranded Missionaries.

One hears many stories in the east concerning independent missions, without substantial and responsible bodies back of them at home. Especially are tales told of the "faith" missions. Zealous and unqualified enthusiasts come out on "faith," and the other missionaries and foreigners have to support them to keep them from starving, until they can secure work or provision is made for their return to America. I have repeatedly been told instances of this sort concerning a Scandinavian mission whose people come chiefly from Minnesota. Some of the independent missionaries who do manage to get along, are obliged to give a large part of their time to cultivating their American constituency.

These missionaries who come out with no other equipment than enthusiasm make strange blunders. One party of Swedes, whose advent is a pronounced memory in missionary circles, bore each a musical instrument. They would play and sing hymns along the street, to the entertainment of the Chinese. The young women wrote home glowing accounts of the crowds they gathered by their street meetings, not realizing at all that in China such performances as theirs are always attributed only to evil characters and the basest of motives. Instead of doing good, they actually did only harm.

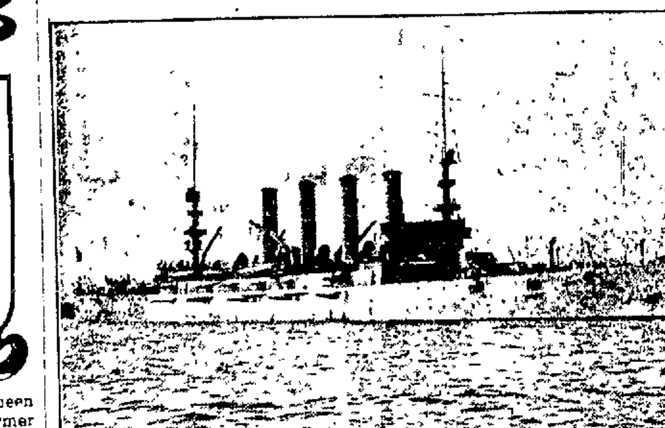

Akin to these, are the religious faddists who enter the foreign fields, representing some special tenet or doctrine. These make no special effort to reach the genuine heathen, but confine themselves to proselyting among the native Christians. Still easier mission work is that done by a holiness sect in America which publishes a paper called "The Gospel Trumpet." It appeals for funds to evangelize the heathen, and then spends the money for sending copies of the paper to missionaries of the various denominations, already on the field! Thus, every missionary in Japan receives "The Gospel Trumpet," and none, so far as I could learn, ever reads it.

ONE MAN'S WAY

By ANNA BANCROFT COUSHAINE

(Copyright, by Daily Story Pub. Co.)

He was a royal good fellow, was Jack Bell, a leading light in the newspaper world and the writer of some of the cleverest bits ever published in the Call, but notwithstanding his environment, he had no love for the Bohemian life and his pleasantest hours were those spent in his own cozy flat with his charming wife and two youngsters.

Theirs had been a love match, pure and simple and five years had passed without a ripple to disturb the serenity of their married life. In the winters they had lived in town—as a rule they spent part of the summer with Mrs. Bell's relatives in Pennsylvania. The year of which I write, however, the publisher of the Call had given Jack a big assignment which would mean a couple of weeks in the Shenandoah Valley and with the golden harvest and a wealth of material for magazine work in view he had gaily hied to the southern states.

"O, no, Genevieve, its quite impossible. I have a fine photograph of you and Beth and Meg riding a prancing animal through the Shenandoah—I'm going on horseback, you know—better go to your mother's and take the youngsters with you and have a good, quiet, restful time. I'll be back in a fortnight."

Of course that settled the matter, if Jack was going on horseback Mrs. Jack couldn't go, but his footsteps hadn't died away when womanlike she began to plan to "get even."

"Well," she said to herself, "I will go to mother's and I'll stay and stay and stay, and give him a chance to get good and lonesome, that's what I'll do to him."

The Shenandoah trip was pleasant and fruitful, but it didn't consume all of the time Bell had allotted for it, and there were two days of the fortnight left when he got back home.

"I'll surprise Genevieve," he thought, "I'll get the house aired, and have some papering done before I let her know I'm home."

He found enough to keep him busy for four days and last of all sent for a cleaning woman to come over and put on the finishing touches—then when everything was in readiness, he telegraphed Genevieve—"Had a through ticket to Buffalo, am home now, when will I meet you. Jack."

To his amazement, the telegram brought forth no eager reply from Kentshire and in an agony of fear lest some one might be ill he called Mrs. Jack on the long distance.

"Yes, this is Genevieve. Is that you, Harry?"

"Harry—well, I should say not, who the devil is Harry?"

"Well, you are very rude, whoever you are, I guess you've got the wrong number."

"No, I haven't; I want to speak to Mrs. Jack Bell."

"Well, this is Mrs. Bell, who are you?"

"Why, it's me, dear, Jack; but I say, who is Harry?"

"Oh, is that you, Jack, well, for goodness sakes, didn't know your voice."

"Oh, you didn't. I say, who were you expecting to hear from?"

"Who was what? I can't hear very well, dear, there's something wrong with the line."

"I say, W-H-O I-S H-A-R-R-Y—"

Oh, Harry? Oh, he is—don't cut me off, Central—well, upon my word, did you ever hear any thing like that racket? I can't hear a word you say, Jack, better call me up to-morrow."

What Jack Bell didn't say to that phone and later to the operator, wouldn't be worth repeating.

"Harry, Harry, I'd like to know who in—well it's the Baltimore for me, I guess, for a few days longer." And the Baltimore it was with pool at the press club for many nights, in fact, so many that he was contemplating a trip to Kentshire when a letter from Genevieve arrived.

"Dear Jack:—I know you are getting along famously, and we are having a lovely time. Sis is home and we are going out a great deal. Mother is going to New York next week for a month and I've promised to stay here till she gets back, you don't mind, do you dear? It's so easy for you to get your meals at that nice little place at the corner. Harry is here, too. Be careful not to leave the windows open when you go down town in the morning, I don't want the rain to ruin the carpets. Bye, bye, be a good boy. Affectionately, Genevieve."

"Another month, another month, eh," and the man who hated the corner restaurant, hated the club room and was beginning to hate every thing else, groaned aloud, "Another month? Well, by gum, she can stay two months, and I won't ask her to come home, and I won't go down there, either. Now, Mrs. John Henry Bell, if you are so doggoned fond of the country, you just stay there till you get good and ready to come home. Somehow or another he managed to get through three weeks of the month and then the spirit of loneliness oppressed him. "I'll fix her, all right. She will come home, but it won't be for my asking."

That night he took his sister and a young friend who was visiting her by name, Miss Polly Pert, to the Saturday hop at the Yacht club, next day he and Polly and sister dined at one of the down town hotels. Two or three days later the two young ladies happened in his sanctum about noon and that meant a luncheon together. Neither sister nor Polly divined the reason for the sudden avalanche of attentions but they agreed on one point, that it was jolly good of Jack.

On Sunday Miss Katherine Bell wrote her sister-in-law a long letter in which she faithfully chronicled the good times she and Jack and Polly were having—automobile rides, theaters, boat rides and dances. Two days later Jack received a very snappy little letter from Mrs. Jack in which she said a few things that won't bear repeating and closing with this paragraph:

"Run down and spend the week end with us, Jack. I know it's expensive, but then you might as well be spending your money that way as wasting it in other directions. I won't be home for a couple of weeks yet. Lovingly, Genevieve."

"O, so you won't be home for a couple of weeks yet," groaned the lonely one. "Very well, lovingly Genevieve, nor will I go to Kentshire for a couple of weeks yet."

That night Genevieve received a telegram that made her bite her lips with vexation: "Can't come Saturday, business engagement, have promised to take Katherine and friends for a launch ride Sunday. Jack."

"O, the hateful hateful thing. I don't believe there is a meaner man in the world, he wouldn't ask me to come—well, I'll go for spite and I'll spoil that launch ride for 'friends,' too, so I will."

"Poor Gen, it's a shame to tease her so," mused Bell as he watched the wreaths of smoke curl to the ceiling of his den, "but then she deserves it. I wonder who the dickens Harry is. She never mentions him in her letters."

Was it intuition or a perfect understanding of the woman he had married that made him stop at the florists that night and order a great bunch of roses.

"Guess I'd better telephone to Mrs. Moriarity to come over and sweep up and get something to eat in the house. There's no telling what may happen."

The next morning before he was up this telegram came: "Will be home on the noon train; will expect you at the depot. Harry is with me. Genevieve."

"Harry is with her? Well, some things are liable to happen to Harry."

"Yes, this is the train from the east —O, here they are. Well, you dear girl, how ever did you manage to get along with the youngsters, and—well, who is this?" with an inquiring glance at a fifteen-year-old who was carrying the youngest of the children.

"That—O, that's Harry Maxwell—Elizabeth Maxwell's little son; he's been spending the summer with mother and I brought him on to Buffalo for a little visit."

It is needless to say that Harry was not annihilated and it wasn't until after she had gone into raptures over the roses and the dinner that Mrs. Jack remembered to express her regret at making Jack miss his launch ride.

"Why, you dear old girl, I'd miss 20 launch rides to get you back, but to tell the truth, that launch ride was a hoax, I had to say something that would bring you home."

And then they both laughed.

GREAT FEAT OF MEMORY.

Zangwill Had at Command All Famous Trials of History.

As an indication of the quality of Zangwill's mental processes I may relate an incident that occurred while we were producing "The Children of the Ghetto." Mr. Zangwill was seated in my office, and we were going over some of the details of the play. It was the day that Labori, intimately connected with the Dreyfus case in Paris, was assassinated. Knowing that Zangwill had intimate knowledge of the case, a New York newspaper sent a representative up to see him. The reporter entered, and, after conveying the news, said:

"Mr. Zangwill, we want from you a history of all the famous trials you can call to mind for our paper."

"Indeed?" said Mr. Zangwill; "I think I can prepare that for you. Come to see me in three or four days and I will have it ready."

"We want it now," objected the newspaper man. "We want to print it in our paper to-morrow morning."

"But surely you don't expect me to quote you dates and facts out of my mind on the spur of the moment, do you?" asked Mr. Zangwill in astonishment. "Such a thing is out of reason."

"I'm sorry, but it's the only way we can make use of it," replied the newspaper man, firmly. Mr. Zangwill thought a moment, and then asked if he could have my stenographer for a short time. He was called in, and Zangwill dictated to him, then and there, a two-column resume of all the famous trials of history from Savonarola down, and quoted every important date and historical feature connected with each.—The Bohemian.

BOTH UPS AND DOWNS.

Pair of Comedians Have Fun with Broadway Storekeeper.

The following story is accredited to Miss Phyllis Rankin, who in private life is Mrs. Harry Davenport:

"My husband and I went into a Broadway umbrella store a few days ago," says Miss Rankin. "A sign reading 'Umbrellas, $1 up,' was displayed in the window.

"'How much down?' asked Mr. Davenport.

"'All cash down,' answered the salesman innocently. 'This is not a credit house.'

"'But I mean how much do I have to put up for an umbrella put down?' asked Mr. Davenport.

"The salesman looked a bit perplexed. 'We have them for $1 up,' he said.

"'I know,' replied Mr. Davenport, 'but I don't want to buy one up; I want to buy one down. I can put it up myself.'

"'O,' said the salesman, smiling gently, 'you are speaking of the umbrella, while I am speaking of the price.'

"'And now I understand, too,' returned Mr. Davenport, 'it is the price that is $1 up. Then it isn't exactly $1 down as you said?'

"'Exactly. But perhaps you would like to talk with the proprietor.'

"The salesman hurried to the rear of the store, and I overheard him explaining to his employer; also I heard remarks about an insane asylum. The proprietor came blandly forward and said, 'We storekeepers have our ups and downs, but—' At this we bought an umbrella and fled."—Bohemian.

Mere Man and the Ubiquitous Lady.

May we be permitted to hint that perhaps there is still hope for even mere man, owing to the fact that all of his larger ideals are feminine? Liberty is a lady, Justice is a lady, Truth is a lady, and Faith, Hope and Charity are ladies. Everything worth having or worth following or worth worshiping is a lady. If Toil is sometimes a lady, too, we are extremely sorry and apologetic about it.

A Cardinal's Fellow Feeling.

Cardinal Manning used to say that he never saw an Irish name in a police case without noting it, grieving over it and regarding it as almost an alias of his own.

Thrones of the Sultan.

The Turkish sultan has several thrones, of which the principal is in the palace of Dolma-Bajtche. It is a seventeenth century work and was constructed for Abbas the Great. It is of pure white marble, which is habitually covered with the richest of gold and cashmere shawls. The sultan when occupying it reclines against a cushion encased in a network of pearls.

Light Blue and Gray Eyes.

Light blue eyes are generally the most powerful, and next to those are gray.

No More Plodding.

Superficiality is the bane of the day, and, backed up, as it so often is, by colossal self-esteem and forwardness, it adds a formidable contingent to the must-get-on-classes of people. No one wants to plod nowadays; the getting on must be rapid, and in trying to attain money without having to work for it, falsehood, dishonesty and heartlessness creep in.—T. P.'s Weekly.

USEFUL HOME HINTS

SUGGESTIONS THAT HAVE BEEN FOUND VALUABLE.

Simple Remedy for the Annoying Chilblain—Novel and Effective Manner of Cleaning Lace—Cure for Cold Feet.

A busy woman, employed during the day in sewing in other people's homes, sends the following useful suggestions:

1. Some one asked for a remedy for chilblains. Here is a simple cure. Cut an onion in two, put table salt on the cut side and rub it upon the afflicted part. Do this a few times and the cure will be effected.

2. To clean draperies, I use sawdust and ammonia. Put the sawdust into a tub and pour in enough household ammonia to soak it to the bottom. Beat the draperies or rugs free of dust. Put them into the sawdust and, with a small whisk broom, rub the mixture well into the article to be cleaned. The dirt will disappear at once. Hang out of doors to dry and air.

3. To clean lace, get a large paper bag and put the laces into it. Pour in a quart or more of Indian meal, and shake the bag up and down—not hard, but steadily—for some minutes. Do this several days, and four or five times a day. I cleaned a hand-made hat in that way and it came out as white as snow.

4. Get rid of water bugs and ants, weevils and roaches by washing shelves and floors with borax. I live in an apartment where there are 26 families, and I have not had a bug of any kind for years. I also clean my carpets every Friday with borax, and never find a moth. I sprinkle borax in my packing boxes when I put away woolens and feather pillows, using it liberally, and the moths never touch them. Turpentine is good for washing woodwork and floors in closets and wardrobes. Moths will not live in a place that has been washed with turpentine.

5. For cold feet and cramps, an old doctor told me once to rub the shinbone up and down until the flesh and the hand are hot. I tried it and have never suffered from cold feet and cramps after doing it.

6. A common oyster shell is a durable pot-and-pan cleaner. I got my husband to drill a hole in the center of one and to put a lid knob in it. One may buy one knob at a hardware store for three cents, or two for five cents.

7. If I put a half cupful of water in the saucepan in which I am about to cook oysters, then pour in the milk, the milk will not scorch. I let the water come to a boil, then add the milk or cream, or both. Then I let that boil before the oysters go in. I never need to clean burned milk from the side of a pan if this is done.—Montreal Herald.

Dyed Laces.

In dyed laces there is a marked preference for old tones mixed with a great deal of black, and these are brightened with pipings of gay-colored satins about the neck and sleeves, and also along the upper edge of the girdle. Notwithstanding the fact that the summer has been so belated in the point of warm weather, there is an abundance of light tailored costumes. White voiles and serges trimmed with filet lace are the acme of chic, and voiles made with slightly raised waists look charming for afternoon wear. At Dieppe and Cannes women carry with such frocks beautiful parasols in green, pure white and Pompeiian red. These are mostly perfectly plain, but some are scalloped and trimmed with "milliner's piping," in rows, following the form of the scallops.

Girdle for Batiste Frock.

A girdle intended for a fine willow green batiste frock, is formed of pinched tucks of the batiste, with lace beading above and below and black ribbon velvet run through the beading.

Three cute little bows at the back mark the finish of the waist belt, over which the blouse hangs gracefully. Immediately above the girdle the blouse shows a band of embroidery trimmings and the deep irregular shaped yoke repeats the drawn work and baby crochet embellishment shown upon the skirt. The puffed elbow sleeves are embroidered all over and gauged into unpretentious but marvelously smart cuffs that carry out the design of the tucked girdle. Finishing the toilet is a white mushroom hat with an immense willow plume, shading to very pale green.

Orange Cake.

Take the grated rind of one orange, two cups of sugar, whites of four eggs, and the yolks of five, one cup sweet milk, one cup of butter and two large teaspoonfuls of baking powder to be sifted through with the flour, bake in jelly tins. Filling: Take white of one egg that was left, beat to a froth, add a little sugar and the juice of one orange, beat together and spread between the layers.

Vanilla Sauce.

Take one pint and a half of milk, stir in three beaten eggs, and pass through a strainer in a double boiler. Add three tablespoonfuls of sugar. Put on the fire and when the water in the lower pan begins to boil, stir and keep stirring until the mixture has reached the consistency of a thick cream. Remove from the fire, add a tablespoonful of vanilla, and serve warm or cold.

An Herb Bouquet.

In cooking recipes one very often comes across the term a "bouquet of herbs." This means that a few sprigs of parsley, a piece of thyme, a clove of garlic, a bay leaf, and a few peppercorns all tied together, ready to be dropped into whatever they are to flavor and are (in this way) easily removed.

Green Currant Pie.

Stew and mash one pint of green currants until all are burst, using as little water as will keep them from burning. Add sugar to make it very sweet, and one soda cracker rolled fine. Bake between two crusts. When using ripe currants, do not stew.

Luncheon Fad.

Among the new social fads is that of serving a poached egg on a small square of toast to each guest at luncheons and teas. This has long been an English custom and has lately been introduced in New York by society women who have just returned from London.

Keeping Child Cool.

Place one or two thicknesses of wrapping paper between the sheet and mattress. It also is effective between the slips and hair pillow.

WHAT SHE WEARS

Eton Jacket Model Still Is the Most Popular

The present is the best time of year to pick up goods for making jackets and wraps, and never were the counters so flooded with silk remnants that are adapted to the linings of these garments.

Despite the influx of new models, the eton jacket has held its own in popular taste, and for some figures it is by far the most becoming model that could be worn.

An eton jacket is always in demand. It is both serviceable and smart, and it means a bit more protection than the more fanciful models. It is adapted to all seasons and materials, and for the girl whose figure is well rounded and long waisted, it is always recommended. It shows the figure to best advantage.

Of course, the mandarin, kimono or tokio sleeve is very up-to-date, and the eton with these sleeves is bound to show this season's mark upon it. It does not give the warmth that the tight sleeve does, but it has many practical advantages, as it can readily be slipped on over lingerie dresses with fluffy sleeves without mussing them.

These separate etons are best evolved from plain materials, but they can be trimmed quite elaborately and lined with bright silks or figured foulards.

An extra overgarment in the shape of a smart looking tailor coat is always wanted in the wardrobe of the well-dressed woman. The chesterfield coat, which, by the way, can be made in hip or three-quarters length, is a good model to go by.

The home sewer can do this coat if she is clever about her pressing and but that seems to have been superseded by much smarter looking materials, like cheviots in broken plaids, or novelty cloakings.

These coats are seldom lined, although it can be done if preferred. The popular model is the three-quarter length, with the seams bound, but if you prefer it lined, then match the goods in a heavy twilled silk or soft satin. Under no circumstances get a figured lining for this style coat, nor should it be of contrasting color.

This coat should always have a full-length sleeve, for you wear it only on undress occasions.

For the woman who goes out much in the evening, or for the young miss just entering society, nothing is more in demand than the mandarin coat for these occasions. The model is also adaptable for afternoons, driving, motoring, etc.

stitching, but if she is a novice, afraid to do big things, then it is best left in the hands of the professional.

Several years ago these coats were almost always made of covert cloth,

USEFUL HAIR-NET CASE.

Provides Safe Keeping for the Light Fringe-Nets.

Now that hair-nets and fringe-nets are so very generally worn, any suggestion for their safe keeping when they are not actually in use will be gladly welcomed. These light nets are very easily mislaid and swept aside, or even blown out of window and lost altogether, when they are left for an unguarded moment on the dressing-table. Under these circumstances our readers may like to provide themselves with a hair-net case similar to the one which is shown in the accompanying sketch. This case may be made in colored linen or silk, and it is arranged with two pockets like those of a purse, so that it might easily hold about half-a-dozen nets at one time. It is edged with stitching and made to fasten with buttons and button-holes. The words "Hair-nets" might be embroidered in washing threads on linen, or in silk on silk. Such a case as this would be specially useful to take away when going for one's summer holiday, as fringe nets are always greatly in request, when a neat coiffure has to submit to the unkind treatment of sea breezes and country winds. It will keep its shape better, by the way, if cardboard is used to stiffen the sides and top.

Empty Spools.

Never throw away empty cotton reels; they have a hundred uses. In most kitchens there is a row of nails on which aprons and dishcloths are hung, with the result that they are frequently torn and rust-marked. This will be prevented if you force on each nail one of your empty reels; nothing could make a more useful peg.

A spool will make an excellent stop to prevent the door from opening too far and banging the furniture. Cover the spool with thick cloth to prevent its injuring the varnish of the door and screw it firmly to the flooring in the position required.

Often enough one finds the door of a cupboard provided with no better means of opening than a keyhole. You can make an effective knob by screwing on another of those ever-useful spools.

Styles in Brooches.

In brooches the crescent-shaped and the horseshoe, both set with rhinestones, are the most popular and are worn either for day or evening. In plain gold-filled brooches the knot, the fleur de lis and the four-leaf clover share equal popularity. Breastpins in mosaic and enameled effects are good. Dainty sprays of lilies of the valley in green enamel and pearls and violets with mock diamond centers are dainty for summer gowns.

FANCIES FOR LATE SUMMER.

Original Features Put Forth by Parisian Costumers.

However much the late season may lack in great originality there are quite certain to be minor features developed. The very latest news from Paris is to the effect that wine and strawberry tints are much seen and that rich, deep blues appear to be given preference over the brighter sorts. Also, we are told that the sleeveless guimpe blouse and princesse gown are the favorites, but that they are cut out with only a moderate decollette neck, so that little of the guimpe beneath is shown.

The wide kimono sleeves are by no means becoming to all figures, and it was almost a foregone conclusion that the big armholes with narrow sleeves, or with trimming to simulate them, would be developed. More and more is the tendency toward simplicity of trimming on the skirts to be noted, and more and more certain does it become that the comparatively plain skirts with elaborate blouses will make a feature of the autumn.

Just now Paris dressmakers are using the filmiest possible materials with tucks or folds as their trimmings, but weighted at the lower edge with hems of contrasting and heavier fabric, and this treatment quite as well as the bordered stuffs is looked for throughout the coming season. The contrasting hems allow of color and fabric effects, at the same time that they serve a definite, practical end, and when utility and beauty are combined there seems every reason for any fashion to take as firm a hold as is possible in matters of the sort. Just now heavy linen is being used in this way, and late summer costumes are made of net with hems of the linen that are either plain or braided with soutache, as may be liked. Separate coats of linen, too, are being greatly used, and linen is given prominence during these late weeks of the summer season.

Beads Modish.

If there is any thought of beads going out of style, present conditions do not indicate it. There are new styles, large beads in irregular shapes, small beads of pretty patterns, good ones, precious gems and some decidedly cheap, though, strange to say, very pretty. Women are wearing all kinds and to many women they are very becoming. Amber is a favorite color at present, since the color looks beautiful worn with the new brown tints. Genuine amber beads are expensive, but there are some very clever imitations in the market which will satisfy most women. Many cheap beads can be made more elegant in appearance by stringing them on platinum wire and using gold clasps. It is the cheap cotton string and brass clasp which gives more evidence of cheapness than the beads.

Cheap Trimming for Fall Hats.

One sees handsome, dark colored flowers which have been rejected as too heavy looking by the buyers of summer finery at greatly reduced prices in the millinery departments. Autumn hats are far prettier trimmed with these flowers and foliage than with feathers and wings, and the long winter season affords plenty of time for employing the latter decorations.

STRIPED SILKS FIND FAVOR.

Remarkably Effective Costume That Was Seen Recently.

Many of the chic effects exploited in cloth gowns of the tailored order find repetition in the smart striped silks, which increase in favor as correct summer fabrics. For instance, there appeared recently a handsome striped silk, having the skirt cut with a very narrow front panel, embroidered in silk in the predominating shade of the dress—pale opal green silk. The design of the embroidery was picked out with tiny buttons and here we have a suggestion of a trimming patterned after the idea of picking out lace patterns with gold and silver braids, yet a mode of decoration that is better suited to frocks for street wear than the original idea itself. The buttons were very tiny and of the crochet genre. The rest of the skirt was finished with a band of embroidery, piped with a satin fold, which ended on either side of the panel.

Worn with the skirt was a smart neck, finished like the bands on the skirt, with a piping of satin and embroidered below with the same pattern. Similar bands formed the cuffs to the lace guimpe.

The Tunic Skirt.

The tunic skirt, which reminds one very much of the old-fashioned overskirt, is made with deep points which reach to the knee line. A pretty arrangement for the bottom of the upper skirt portion is to have the points developed in tucks. This work must be carefully done, but is very beautiful as a border edge when carefully fashioned. Of course the waist should be tucked to match the skirt tucks, and this is easily accomplished by making a surplice waist with tucks down the front.

Ruffles.

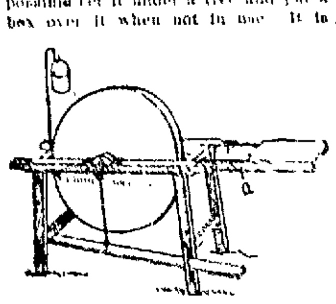

It is a long time since straight ruffles have played as important a part in summer gowns as they do now. Usually, however, the gown is otherwise trimmed in such a manner that in spite of this circular trimming the long lines are preserved.

ROAD AND FARM IMPROVEMENT

RUNNING THE GRINDSTONE.

Some Suggestions for Making a Hard Job Easy.

If the face of the grindstone is hard and glazed pour a little sand on the stone every few minutes until the glaze is worn off and the stone will cut like a new one. This condition is caused by exposing the stone to the weather. I like to keep the stone in a shed under cover, but if this is not possible set it under a tree and put a box over it when not in use. It is surprising how easy a little oil on the bearings will make the stone run, yet some of my neighbors never think to oil theirs. A few drops of kerosene will cut the gum if it runs hard and then some oil or axle grease will make it go easy.

Handy Grindstone Rig.

It is hard to stand on one foot and work the treadle with the other. This job can be made easy, suggests a writer in Farm and Home, by bolting two boards to the grindstone frame and extending it two feet, on which place a seat as shown in the cut. With a smooth and even face the grindstone works nicely, but when it becomes uneven it is hard work to do a good job of grinding. Such a stone needs to be cut down and toned up. This can be done by grinding against the end of a piece of pipe having the stone dry. There is nothing more exasperating than to try to work with a poor grindstone, but with a good one it is a pleasure to keep the tools sharp.

HELPS THE ROADS.

Experience of the Specialist at Nebraska Experiment Station.

The following from a recent issue of the Nebraska Farmer gives their experience with the road drag on the roads near the Nebraska experiment station.

"A good proof of road dragging with split log drags was shown last winter during the long spell of deep muddy roads. The roads next to the farm have been dragged for the last four or five years, and comparing them with others it makes a very great contrast. While some of the other roads are hardly dry, and a good many are rough and rutty the dragged roads have long become smooth and are as hard as brick. Even during very muddy weather the depth of mud on the dragged roads was slight compared with that of the undragged roads. When a person drives over a road of this kind when muddy it is like driving on pavement with but one or two inches of mud while the unworked roads sink to a depth of nine inches in places and also very heavy pulling, having no solid ground under the mud. A farmer who believes it does not pay to drag roads is badly mistaken. In eastern Nebraska it is just beginning to become a practice. And the ones to introduce it there were the students of the school of agriculture."

PLOWING DEEP OR SHALLOW.

Much Depends on the Kind of Crop to Be Grown.

Plow deep in the fall and shallow in the spring, is the advice of an Iowa professor of agriculture. We would amend this by suggesting that the crop you expect to raise on the land has something to do with it, as does also the length of time to elapse before the crop is sown or planted. Plowing deep for wheat is all right if the plowing is done in time so the soil will settle before seeding, but he who plows deep one week and drills in his wheat the next is courting failure.

For English bluegrass, timothy or any such crop, it is a detriment to plow very deep. We have found this out through sad and costly experience. Deep plowing furnishes too loose a seed bed for any of this stuff, and it is a hundred times more apt to dry out or freeze out before the winter is over. Like a good many rules, the one referring to deep plowing in the fall should be practiced only after a full and careful consideration of the field to be plowed and the crop to be sown.

FARM JOTTINGS.

Give the sheep shelter from the sun.

You can never improve a flock by using a grade sire.

Now is the time to select the best possible sire for the flock.

The superiority of beef breeds is largely in their early maturity.

Well drained land will stand drought or freshet better than land that has not been drained.

Wethers intended for market should be put in a pasture by themselves, where they can be liberally fed.

When ewes are gaining in condition at mating time, there will be a large percentage of twins and the lambs will be stronger.

The feeding of cotton seed meal is not yet reduced to a science. Any man that undertakes it should avail himself of all extant information on the subject.

Stringhalt.

Stringhalt is sometimes due to local injury. Closely observe the stable, change the stall, bathe the limbs in hot brine and attend to the shoeing. Your farrier may discover some fault in shoeing that may be remedied. A pronounced case can be corrected only by an operation.

The Horses at Night.

When the weather permits, try hitching the horses out these warm nights; or, what is better, leave the stable door open and let them go out into a small lot to roll and lie down on the ground instead of in the hard, narrow stalls.

Keep an eye open for tent caterpillars. When found, wrap a rag around the end of a long stick, saturate the rag with kerosene, ignite the torch, and then quickly burn out the pests.

It is not a very delightful job to make kerosene emulsion Besides being not the cleanest of work it takes considerable time The principal trouble and annoyance is in dissolving the soap and mixing it with kerosene The Canadian Station has made a new discovery which promises to make the work a great deal easier says the Rural World It is found that eight ounces of flour will hold in suspension a quart of kerosene If the flour is scalded before the kerosene is added two ounces have been found sufficient to make an emulsion which will remain in suspension three days It has also been found that when flour is used in making the emulsion there is not nearly so much danger of discoloring the trees

Buy a Good Separator

When a separator is to be purchased see that it is a good one There are many cheap and worthless machines on the market that will simply disgust the buyers when they come to use them The separators advertised in the Farmers' Review are not of this class but are of the class that will give satisfaction for many years to come The buyer of a separator should remember that when a separator is offered him at a price far below what the regular companies can make them for something must be the matter with it The matter is generally that the cheap machine is manufactured at a very low cost out of poor material and lacks exactness in adjustment Without that exactness a separator is of no value

FARMERS AND GOOD ROADS

The Latter Contribute to the Prosperity of the Farmer

One of the factors contributing to the prosperity of the modern agricultural community is a system of good public roads This subject has been discussed so frequently in the farm daily and magazine press that very few are not conversant with its more important aspects Every one must concede that the subject is important and its benefits to the agricultural and commercial worlds are self evident

Impetus is being given to the building of rural highways by the activities of the office of public roads connected with the United States department of agriculture Systematic work is being carried forward under the direction of this bureau and the influence of these federal endeavors has reached out into a number of the states

It was quite opportune that the government undertook to foster the building of good roadways Now through the education received from national road experts and from the crying necessity for better means for wagon transportation of farm products to market a general demand for good permanent country highways has gone out from the agricultural classes

America has been exceedingly backward in developing a system of good public roads but the time is at hand when farmers will not be compelled to haul their grain and produce over ways covered with mire or filled with dangerous ruts

The general consensus of opinion regarding public roads declares the Indiana Farmer is that there should be a good strong executive man at the head of a forceful commission dealing with the question

Twenty one states in the union have such a commission with an active and competent civil engineer or some other skillful practical man at its head It will be noticed that these states are improving their highways and are making them permanent and durable. Prominent among the states thus applying business methods and scientific principles to road building are New York Pennsylvania Illinois and Ohio The 17 other states are following suit very closely and good results are noticeable Of course it will require many years before every section in these states is immediately benefited but it suffices that the work is well begun

VIOLET SHADE WELL LIKED.

Has Attained Much Popularity for Bedroom Furnishing.

A charming wall paper displayed in a store window shows an arbor design of light purple shades upon a cream ground says the Chicago News Purple tones are so fashionable now that they are and very rightly used considerably for furnishing They are particularly clean and pretty for a bedroom that is if the violet or lavender shades are selected For a sunny exposure violet gives a cool effect

Most women select blue or pink for their bedrooms but if violet is becoming it is every bit as effective and if the solid tone is not used the dainty floral designs in papering are not sufficiently pronounced to conflict seriously with a dislike for the color

In a spare room violet is very pretty One room facing north and east is furnished with old mahogany although the two little beds are of brass The matting is violet and white with two or three woven rugs of the same coloring

The paper shows clusters of violets on a cream colored ground and the colonial fireplace and deep embrasured windows are of snowy white paint The white flowered muslin curtains have plaited ruffles Can any one imagine a cozier apartment for a welcome guest?

DISH OF MEXICAN ORIGIN

"Chili Colorow" for Those Fond of Highly Seasoned Viands

A dish that cannot fail to delight the palate of those who love highly seasoned viands and yet strangely enough will not induce an increase of the body's internal heat is recommended by Harry Leighton whose talents as an amateur cook are quite on a par with his abilities as an actor This is a Mexican concoction called Chili colorow and those who care for such delicacies will find it a most delectable mixture To make it Mr Leighton takes a quart of boiled tomatoes and one onion that has already been chopped fine To these he adds three tablespoonfuls of granulated sugar one tablespoonful of the prepared ground Spanish pepper—a condiment that may be purchased at any first class grocery store—and a little salt The mixture is then permitted to stew rather slowly for some 20 or 30 minutes, when if it seems too dry a little water is added —The Bohemian

Fruit Dumpling

Sift one pint of flour one half teaspoonful of salt and two teaspoonfuls of baking powder rub in one heaping tablespoonful of butter and mix into a stiff dough with three fourths of a cupful of milk Toss the dough onto a well floured board knead it slightly and roll out one third of an inch thick Cut into rounds with a large cutter Put half of a pared peach in the center of each drop the dough up over the peach and roll carefully in the hand until the folds have disappeared and it is smooth and round like a ball Butter the perforated pan in a steamer arrange the dumplings on it so that they will not touch cover tightly and steam 20 minutes Serve with fruit sauce Rub one fourth of a cupful of butter to a cream add gradually one cupful of powdered sugar and beat until light and frothy, then beat in gradually one cupful of sliced peaches Set in a cool place till hard Serve the same as hard sauce

Buttered Rice

A nice made over entree for lunch is made by boiling rice draining well, and placing while warm in a bowl or mold The next day turn it out carefully upon a pie plate and set in a quick oven When hot all through draw to you in the oven and butter plentifully After this let in the oven until it browns lightly Then butter again sift over it a thick coating of cheese—preferably Parmesan — and leave in the oven until the cheese is melted Then beap irregularly with a meringue of whites of two eggs, beaten up with a pinch of celery salt Brown very lightly slip a spatula under the mold and transfer to a hot platter

Cheese Sticks

On a day when pies have been made take a piece of pastry dough roll it out very thin and cut into strips as long and wide as a finger spread on each strip grated cheese sprinkled with salt and pepper Lay on another strip, pinch together, brush with yolk of egg and bake in a slow oven If no pie crust is at hand it can be easily made of a half cupful of flour a tablespoonful of butter and a little icewater

Double End Pillow Slips

When making pillow slips if both sides are left open instead of just the one there will be no hard corners to turn in washing and they are easier to iron Both sides can be trimmed with lace and insertion—two buttons and buttonholes on each side to button the pillow in They look so pretty on the bed pillow shams are not needed

Putting Up Preserves.

In putting up fruit in glass jars care should be taken to get fresh rubbers each season This is a comparatively small expense and will save untold worry from leaking jars

Egg Sauce

Heap two tablespoonfuls of butter in a saucepan When it bubbles put in (all at once) two tablespoonfuls of flour and stir from the sides toward the center of the pan until the ingredients are well mixed Have ready heated a cupful of milk, add to this the roux" gradually, and beat to a smooth cream Season with pepper, salt and beat into the thickened milk the yolks of two raw eggs and a little minced parsley. The white and yolk of a hard boiled egg chopped fine may also be added

Generosity That Was Purely the Result of Accident

A missionary bishop told this story about F Marion Crawford, the famous novelist

Mr Crawford went to school he said, in Concord and one day he was taken to call at a Concord clergyman's

The clergyman had a missionary box on his drawing room table, and time hanging heavily on the boy's hands he amused himself with trying, whether a silver dollar—it was all the money he had in the world and he had converted it into that gigantic coin for safety—would go into the slit in the box's top

It was a close fit but unfortunately it did go and the coin slipped out of the embryo author's fingers There was a terrible crash of silver falling among the coppers—and then the boy as the novelists say knew no more

When he came to himself he found the clergyman and his family in raptures over his generosity

CHILDREN TORTURED

Girl Had Running Sores from Eczema —Boy Tortured by Poison Oak— Both Cured by Cuticura.

"Last year after having my little girl treated by a very prominent physician for an obstinate case of eczema I resorted to the Cuticura Remedies and was so well pleased with the almost instantaneous relief afforded that we discarded the physician's prescription and relied entirely on the Cuticura Soap Cuticura Ointment and Cuticura Pills When we commenced with the Cuticura Remedies her feet and limbs were covered with running sores In about six weeks we had her completely well and there has been no recurrence of the trouble

In July of this year a little boy in our family poisoned his hands and arms with poison oak and in twenty four hours his hands and arms were a mass of torturing sores We used only the Cuticura Remedies and in about three weeks his hands and arms healed up Mrs Lizzie Vincent Thomas Fairmont Walden's Ridge Tenn Oct 13, 1905

Jerome on Colored Evidence

District Attorney Jerome of New York said one day of a piece of suspicious evidence

'It is evidence that has been tampered with colored It is like the lady's report of her physician's prescription

A lady one day in July visited her physician The man examined her and said

Madam you are only a little run down You need frequent baths and plenty of fresh air and I advise you to dress in the coolest most comfortable clothes—nothing stiff or formal

When she got home her husband asked her what the physician had said The lady replied

He said I must go to the seashore, do plenty of automobiling and get some new summer gowns

Sure to Have One

Lincoln Steffens in an address on municipal politics said in Chicago of a certain city

That city is as notorious for its rottenness as the town of Pebbles is notorious for another characteristic

Here is an incident that will give you an idea of the reputation of Pebbles

On a train one day a man rushed into a car held up his hand for attention and shouted excitedly

"Anybody here who belongs to Pebbles?

Aye I do said a small, dry old fellow calmly

Then said the other, 'lend us yer corkscrew''

Born, Not Worn

Little Margaret's grandmother had written for a photograph of her name sake, the baby For material reasons it was advisable that the little girl should appear as well dressed as possible and a cousin's new open work dress was borrowed for the occasion On being arrayed for the picture Margaret rushed to her father, crying

Oh, father, just look' These ain't worn holes, they is born holes —Harper's

FEET OUT.

She Had Curious Habits

When a person has to keep the feet out from under cover during the coldest nights in winter because of the heat and prickly sensation it is time that coffee, which causes the trouble, be left off

There is no end to the nervous conditions that coffee will produce It shows in one way in one person and in another way in another In this case the lady lived in S Dak She says

'I have had to lie awake half the night with my feet and limbs out of the bed on the coldest nights, and felt afraid to sleep for fear of catching cold I had been troubled for years with twitching and jerking of the lower limbs, and for most of the time I have been unable to go to church or to lectures because of that awful feeling that I must keep on the move

When it was brought to my attention that coffee caused so many nervous diseases, I concluded to drop coffee and take Postum Food Coffee to see if my trouble was caused by coffee drinking

"I only drank one cup of coffee for breakfast but that was enough to do the business for me When I quit it my troubles disappeared in an almost miraculous way Now I have no more of the jerking and twitching and can sleep with any amount of bedding over me and sleep all night, in sound, peaceful rest.

"Postum Food Coffee is absolutely worth its weight in gold to me There's a Reason" Read the little health classic, 'The Road to Well ville," in pkgs.

Not Entire

The aeronaut after painfully extricating himself from the wrecked balloon, limped to the nearest farm house

Madam he said to the woman who answered his knock can you accommodate with a night's lodging, a balloonist who has come to grief?

I'd be glad to she hesitated but you are an entire stranger to—

Not an entire one he interrupted with some acerbity For I have left my left ear three teeth and certain portions of my nose back there with the ruined car'

Laundry work at home would be much more satisfactory if the right Starch were used In order to get the desired stiffness, it is usually necessary to use so much starch that the beauty and fineness of the fabric is hidden behind a paste of varying thickness, which not only destroys the appearance, but also affects the wearing quality of the goods This trouble can be entirely overcome by using Defiance Starch as it can be applied much more thinly because of its greater strength than other makes

Great Discovery Announced

Sir William Crookes as a result of his own researches and the experiments of Professors Krowalski and Moscicki of Freiburg university has discovered a process of extracting nitric acid from the atmosphere The process is available for commercial industrial and agricultural purposes and is expected to revolutionize the nitrate industry and the world's food problem

Sheer white goods, as fast any fine wash goods when new owe much of their attractiveness to the way they are laundered this being done in a manner to enhance their textile beauty Home laundering would be equally satisfactory if proper attention was given to starching the first essential being good Starch which has sufficient strength to stiffen without thickening the goods Try Defiance Starch and you will be pleasantly surprised at the improved appearance of your work.

Colleges Undesirable Fire Risks

Colleges are now regarded as rather undesirable insurance risks and it is probable that the rate will be generally increased In 18 years 781 fires have occurred in college buildings, entailing a loss of $10 500 000 in money and a heavy loss of life This makes the average money loss over $13,000

With a smooth iron and Defiance Starch, you can launder your shirt waist just as well at home as the steam laundry can, it will have the proper stiffness and finish there will be less wear and tear of the goods and it will be a positive pleasure to use a Starch that does not stick to the iron.

Physicians Recommend Castoria

CASTORIA has met with pronounced favor on the part of physicians, pharmaceutical societies and medical authorities. It is used by physicians with results most gratifying. The extended use of Castoria is unquestionably the result of three facts: *First*—The indisputable evidence that it is harmless: *Second*—That it not only allays stomach pains and quiets the nerves, but assimilates the food: *Third*—It is an agreeable and perfect substitute for Castor Oil. It is absolutely safe. It does not contain any Opium, Morphine, or other narcotic and does not stupefy. It is unlike Soothing Syrups, Batoman's Drops, Godfrey's Cordial, etc. This is a good deal for a Medical Journal to say. Our duty, however, is to expose danger and record the means of advancing health. The day for poisoning innocent children through greed or ignorance ought to end. To our knowledge, Castoria is a remedy which produces composure and health, by regulating the system—not by stupefying it—and our readers are entitled to the information.—*Hall's Journal of Health.*

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr B Halstead Scott of Chicago Ills says "I have prescribed your Castoria often for infants I am, my practice, and find it very satisfactory"

Dr William Belmont, of Cleveland Ohio says "Your Castoria stands first in its class In my thirty years of practice I can say I never have found anything that so fills the place"

Dr J H Taft, of Brooklyn, N Y says "I have used your Castoria and found it an excellent remedy in my household and private practice for many years The formula is excellent

Dr R J Hamlen of Detroit Mich, says "I prescribe your Castoria extensively, as I have never found anything to equal it for children's troubles I am aware that there are imitations in the field, but I always use that my patients get the genuine"

Dr Wm J McClain of Omaha, Neb, says "As the father of thirteen children I certainly know something about your great medicine, and as the from my own family experience I have in my years of practice found Castoria a popular and efficient remedy in almost every home"

Dr J R Clausen, of Philadelphia, Pa, says "The name that your Castoria has made for itself in the tens of thousands of homes blessed by the presence of children, scarcely needs to be mentioned by the endorsement of the medical profession but I, for one, most heartily endorse it and believe it an excellent remedy"

Dr R M Ward, of Kansas City, Mo, says "Physicians generally do not prescribe proprietary preparations, but in the case of Castoria my experience, like that of many other physicians, has taught me to make an exception. I prescribe your Castoria in my practice because I have found it to be a thoroughly reliable remedy for children's complaints Any physician who has raised a family, as I have, will join me in heartiest recommendation of Castoria"

MOTHERHOOD

The first requisite of a good mother is good health, and the experience of maternity should not be approached without careful physical preparation, as a woman who is in good physical condition transmits to her children the blessings of a good constitution

Preparation for healthy maternity is accomplished by Lydia E. Pinkham's Vegetable Compound which is made from native roots and herbs, more successfully than by any other medicine because it gives tone and strength to the entire feminine organism curing displacements, ulceration and inflammation, and the result is less suffering and more children healthy at birth. For more than thirty years

MRS. JAMES CHESTER

Lydia E. Pinkham's Vegetable Compound

has been the standby of American mothers in preparing for childbirth

Note what Mrs James Chester, of 427 W 35th St, New York says in this letter—Dear Mrs Pinkham:—"I wish every expectant mother knew about Lydia E Pinkham's Vegetable Compound. A neighbor who had learned of its great value at this trying period of a woman's life urged me to try it and I did so and I cannot say enough in regard to the good it did me I recovered quickly and am in the best of health now"

Lydia E Pinkham's Vegetable Compound is certainly a successful remedy for the peculiar weaknesses and ailments of women

It has cured almost every form of Female Complaints, Dragging Sensations, Weak Back, Falling and Displacements, Inflammation, Ulcerations and Organic Diseases of Women and is invaluable in preparing for Childbirth and during the Change of Life.

A Wrong Idea.

An editorial recently published in the Milwaukee Journal commences as follows.

"A man might fool the public; he might fool his friends; he might fool his family. But he can't fool himself."

Now we wish to take issue with the Journal man, and say, that a man invariably starts in by fooling himself. We firmly believe that the greatest hypocrite in the land believes himself to be the soul of honor. In fact there are very few men who do not succeed in fooling themselves, and doing it continuously. A man invariably imagines he is the strongest right where he is the weakest, and notwithstanding that his friends may recognize his strong points, and urge him to develop himself along those lines he will generally be found to be paying very little attention to these matters and will pass over any reference to them without giving them much thought.

A man should not find out how he stands with himself, but how he stands with his acquaintances. It would be a mighty poor stick indeed who was not all right in his own estimation; in fact, there are very few of such persons. The crazy person first brings suspicion on himself by assuring those he meets that he is not crazy and the drunken man is profuse in his assertions that he is not drunk, while the gaffer who has no education and will not take the trouble to learn is always the first to assert that he is a mighty smart fellow, and doesn't care a cuss if the general public is apprized of the fact.

So we say a man not only can fool himself, but he invariably does do so. This is probably because the things that come easy are thought little of, while those that are acquired by hard work are magnified in their importance and appeal more strongly to the mind.

Don't like Present System.

It is said that the present system of two cent rate is not giving very good satisfaction to the railroad companies. The reason for this is said to be because there are a lot of traveling men who, since the mileage book went out of existence now tender the cash for their fare instead of stopping to buy a ticket each time. This system enables the conductors to be dishonest if they are so inclined, and there is very little chance for the railway officials to catch them at it.

It is said that the new developments may cause the companies to again adopt some form of mileage book in order to get away from the trouble. The traveling men also like the mileage books, as it furnishes an easy method for them to keep track of the number of miles traveled without making a note of each ticket purchased.

Doan's Kidney Pills relieve backache,
Cure every kidney ill.
Grand Rapids citizens endorse them.

Edward Young, living on Twelfth St., Grand Rapids, Wis, says: "I have used Doan's Kidney Pills and they gave entire satisfaction. I suffered with a lame back and sharp shooting pains through the loins. I ached constantly and was in a very miserable condition. My kidneys were in a disordered condition and gave me a great deal of annoyance I was advised to try Doan's Kidney Pills and procured a box at a drug store. My kidneys are now regular in action and I feel a great deal better in every way since using them. It gives me pleasure to recommend Doan's Kidney Pills to others suffering from kidney trouble."

PAIN

Pain in the head—pain anywhere, has its cause. Pain is congestion, pain is blood pressure—nothing else usually. At least, so says Dr. Shoop, and to prove it he has created a little pink tablet. That tablet—called Dr. Shoop's Headache Tablet—coaxes blood pressure away from pain centers. Its effect is charming, pleasingly delightful. Gently, though safely, it surely equalizes the blood circulation.

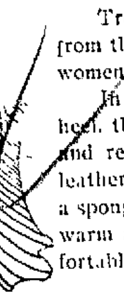

If you have a headache, it's blood pressure. If it's painful periods with women, same cause. If you are sleepless, restless, nervous, it's blood congestion—blood pressure. That surely is a certainty, for Dr. Shoop's Headache Tablets stop it in 20 minutes, and the tablets simply distribute the unnatural blood pressure.

Bruise your finger, and doesn't it get red, and swell, and pain you? Of course it does. It's congestion, blood pressure. You'll find it where pain is—always. It's simply Common Sense.

We sell at 25 cents, and cheerfully recommend

Dr. Shoop's Headache Tablets

Take Foley's Kidney Cure at the first sign of trouble as it corrects irregularities and prevents Bright's disease and diabetes. Daly Drug & Jewelry Co.

An Oklahoma paper declares that the weather is so hot there that the pop corn is popping on the stack. This is evidently meant as a companion piece to the Kansas story that the water melon vines grew so fast that they wore the melons out dragging them over the ground.

During the past week some of the members of the band have approached their friends on the subject of a series of concerts during the coming winter, and they have met with very favorable encouragment, and a number of names are already on the list. There is little question but what enough names will be secured to make the affair a success.

The new blue books which are issued every two years by the Secretary of State, will be ready for distribution the latter part of September or the first of October. The index this year will be an improvement over other years, and the additional work in this branch has delayed the publication to some extent.

The Marshfield News entered last week upon the nineteenth year of its existence The News has been one of the best papers in this section of the state ever since it was established, and there does not seem to be any indication that it will go backward under the able management of its present proprietor, John White.

Register of Deeds, W. S. Powell was in Bayfield recently where he purchased 160 acres of fruit land, two miles north of Bayfield. Mr. Powell will soon start a crew of men at work setting out fruit trees and expects to get in about twelve acres this fall. Mr. Powell has great faith in the soil and climate conditions of that locality for fruit raising.

James Gaynor of Cranmoor was in the city on Saturday and while here he favored the Tribune office with a pleasant call. Mr Gaynor is making active preparation to commence the picking of cranberries which will begin on his marsh on Monday next. He reports that there is little use to begin the work before that time as the berries are not in the proper condition.

Wilbur Briere, who is in the employ of a steel construction company, arrived in the city last week with the intention of spending a couple of weeks here visiting with relatives and friends. Wilbur has been in old Mexico for some time past, looking after some construction work, but does not speak very highly of that part of the universe as a place of residence.

Dr. Brewer will visit the Hotel Dixon in this city on Thursday, Sept. 19th.

Portage Democrat.—H. W. Goggins and R. B. McDonald of Grand Rapids were in the city Sunday. They are taking a canoe trip to Princeton and left Grand Rapids last Tuesday. They made the distance of fifty miles from Pete-in-Well Rock down the Wisconsin to Kilbourn in one day, coming from the latter place to Portage on Saturday night. Yesterday they went to Montello. The canoe is a handsome little craft, seventeen feet long, of cedar, weighs only fifty pounds and was built by the Detroit Boat Co.

The day of safely marketing rotten eggs and eggs about ready to hatch is over and both farmers and merchants have ample reason for being exceedingly careful of the hen fruit they dispose of, as otherwise the consequences may be exceedingly unpleasant. A government inspector recently hung around a store in an Iowa town, and when a farmer brought in some eggs he said he wanted some fresh eggs and took the lot. Several of them proved to be rotten and the farmer was assessed $120 by Uncle Sam under the pure food law. If the merchant had taken the eggs and disposed of them to his customers he would have been reliable to the same fine. The only safe rule now for both farmer and merchant is to candle their eggs so that they know they are giving the purchaser whatever he or she pay their money for.—Necedah Republican.

New Auto Ordinance.

At the last meeting of the city council an ordinance was passed which put a speed limit of six miles an hour on automobiles while running between the library building and the St. Paul depot, and ten miles an hour in other parts of the city. Another part of the ordinance provides that automobiles in crossing the bridge must not run past teams ahead of them, but must take their place in the procession and remain there until the structure is crossed.

Most of the Auto owners object to the last clause in the ordinance as they claim that most of the trouble on the bridge is caused when one of the machines is compelled to creep along at a low rate of speed, making much more noise than when it is moving faster and meeting less teams.

Cured Hay Fever and Summer Cold

A. J. Nusbaum, Batesville, Indiana, writes: "Last year I suffered for three months with a summer cold so distressing that it interfered with my business. I had many of the symptoms of hay fever, and a doctor's prescription did not reach my case, and I took several medicines which seemed to only aggravate my case. Fortunately I insisted upon having Foley's Honey and Tar in the yellow package, and it quickly cured me. My wife has since used Foley's Honey and Tar with the same success." Daly Drug & Jewelry Co.

Nearly a Freeze.

Cranberry growers report that it was cold on the marsh Monday morning, mercury going as low as 27 in spots. No damage is reported, as there is an abundance of water, should it be needed. A low temperature was reached early in the night and it was only because of a brisk wind that prevailed that there was not some damage.

New Millinery Store.

Railroad Men Sent West.

Tomahawk Leader.—John Flanagan, conductor, and Thomas McCarthy brakeman, left this (Friday) morning for Chamberlain, S D., where they will work during the next sixty days on the Pacific coast extension of the Milwaukee road. They are transferred from the Valley division. Other Valley railroaders have been sent west to help on the extension, among them being Conductor Thomas Pennewell, Engineer Charles Slightam and N. L Bouchor.

Was a Good Play.

It is seldom that the people of Grand Rapids have the pleasure of attending a production that is as good as the Cow Puncher, which was procured at the opera house on Monday night. Although the play is of the Wild and Wooly West, and there is a heap of shooting and stabbing, it was handled in a manner that made it good, and while the audience was not large, it is certain that those present appreciated the play thoroly.

Elected President.

At the convention of Wisconsin and Michigan undertakers held at Milwaukee last week, J. R. Ragan was elected president of the association. Mr. Ragan had been vice-president of the association during the past year and it is evident that he gave good satisfaction in that capacity. Mr. Ragan also responded to the address of welcome on behalf of the association.

It was discovered some years ago that a part of the business district of Minneapolis was built over a great subterranean cavern, whose rocky roof lay some sixty or more feet below the surface, but the fact has been kept quiet until now, when the roof of the cave has been put upon the support of great concrete pillars. The cave had been caused by a subterranean waterflow, which has been diverted. When accidentally discovered, says the San Francisco Argonaut, the cavern contained a lake of fine ice-cold water, ten feet deep, and large enough to have supplied the city.

TELLS OF ALTON DELAY

BONAPARTE EXPLAINS WHY PROCEEDINGS WERE POSTPONED.

NEW FACTS DISCOVERED

Department of Justice Had Ordered Immunity Pledge Fulfilled and Doesn't Yet Know What Its Attorney Learned.

Lenox, Mass. — Attorney General Charles J. Bonaparte Wednesday issued a statement regarding the Standard Oil case in the Illinois court. The attorney general's statement is as follows:

"On August 14 Judge Landis asked, in substance, that the department of justice consider portions of the transcript of testimony in the case of the United States against the Standard Oil company of Indiana in order to determine whether the Chicago & Alton Railroad company, its officers and employes, were entitled to the benefits of an agreement assuring it and them of immunity against criminal prosecution in connection with the granting of certain rebates to the Standard Oil company.

Immunity Bath Ordered.

"The department, in compliance with the desire of Judge Landis, examined the above mentioned records and carefully investigated the entire subject, and as a result of such investigation the attorney general on August 29 wrote Edwin W. Sims, United States attorney at Chicago, informing him in substance that the agreement was shown to have been made in June or July, 1905, by C. B. Morrison, Mr. Sims' predecessor in office; that Mr. Morrison's action appears to have been duly authorized at the time by the department; that in the opinion of the department the arrangement had greatly facilitated the indictment and conviction of the Standard Oil company, and that while certain portions of the evidence might be fairly open to unfavorable comment, the department regarded the government as bound in good faith and also as a matter of public policy, to give effect to the agreement.

"Mr. Sims was instructed to read this letter when the grand jury reconvened on September 3, and to take such further action to the foregoing end as might seem to the court and to himself appropriate in the premises.

New Facts Found by Sims.

"The department learns that Mr. Sims did not comply with these instructions by reason of his having had called to his attention very recently certain new, and, in his judgment, material facts, which he thought should be submitted to the department for its further consideration before its conclusions should be finally announced. For this purpose, he asked and was granted by the court a delay of three weeks.

"The department is not as yet advised as to what are the facts thus ascertained by Mr. Sims. It has great confidence in his sound judgment and devotion to duty and it awaits his report before taking further action in the premises. Inasmuch, however, as the circumstances of the case may be liable to misconstruction, it is deemed proper to submit now the present statement to the public."

BORAH INDICTMENT SERVED.

Senator and Others Are Accused of Timber Land Frauds.

Boise, Idaho. — An indictment returned last April by the federal grand jury against Senator William E. Borah and other prominent men, charging conspiracy to defraud the United States government, was served on the defendants Wednesday.

Beside Borah, the indictment includes Frank Martin, attorney general of Idaho under Gov. Steunenberg's administration; J. T. Barber and Sumner G. Moon, millionaire stockholders of the Barber Lumber company, residing in Wisconsin; J. I. Wells, P. H. Downs, John Kincaid, L. M. Pritchard, William Sweet, Albert M. Palmer and H. S. Rand.

The indictment charges that these persons entered into unlawful conspiracy in September, 1901, and various other times to secure by fraudulent entry timber lands in Boise county, Idaho.

Falling Tree Kills Seven.

Raleigh, N. C.—Details of the disastrous effect of a lightning stroke at Buckhorn Falls, in Chatham county, show that seven men were killed and ten injured. A heavy storm had forced 50 to 70 men to seek shelter in the cement house of the Buckhorn Falls' power plant. Lightning struck a large tree back of the house and the tree, splitting, fell over on the building, instantly killing two white men and five negroes and injuring three whites and seven negroes, all of them residents of this vicinity.

"MIDDIES" UNDER ARREST

SCALED WALLS TO DINE WITH CHORUS GIRLS.

Hilarious Time at Bath, Me., May Lead to Ousting of Four Offenders.

Annapolis, Md. — Superintendent Badger's recommendation to President Roosevelt for the dismissal of four "middies," one of whom is a member of the first class, has caused much talk in Annapolis. The youths are under arrest and confined in their rooms.

Two of the cadets, who are upper classmen, broke the discipline of the academy on the recent summer cruise. The other two offenders are "plebes" of the type known in "middy" slang as as "sligers"—boys who dropped back a class and reentered the fourth class a second time. Nothing has been heard from the president or the navy department on Capt. Badger's recommendation for dismissal of the four midshipmen.

It is learned that the culprits participated in and were understood to be the leaders of a "shore party" at Bath, Me., while the ships of the practice squadron were at anchor off that place. The return to the ship was said to have been long after the allowed time, and there is said to have been considerable disorder among the youths as a result of too frequent indulgence in something stronger than water.

"The Devil's Auction," with a spectacular chorus of beauty, was the bill at the local theater that night. The show was enjoyable, the supper afterwards was more so, and the stay from under the sheltering care of superior officers was prolonged. In fact, day was approaching when the two "plebes" returned to quarters by way of the wall to find that their absence had been noted in the conduct report.

It is said that since forwarding his recommendations for the dismissal of the four youths to the president, Capt. Badger has called on them to give him three reasons why they should not be dismissed.

In connection with the alleged aftertheater party it will be remembered that Capt. Badger, since assuming charge of the academy, has held several conferences with Mayor Claude of Annapolis, with a view of breaking up this and similar practices through cooperation between the city and federal authorities.

TWO MOTORMEN ARRESTED.

Held Responsible for Fatal Wreck Near Charleston, Ill.

Charleston, Ill — Following the verdict of the coroner's jury, charging them with criminal negligence, which resulted in the death of 14 persons in an interurban collision Friday, motorman Ben F. McClara and Charles Botts were arrested Sunday. McClara was motorman of the express car and Botts was motorman on car No. 14, in which the victims were riding. Both men were released on bonds of $3,000 each.

The coroner's jury completed its investigations Sunday and returned its verdict. McClara is blamed for leaving Charleston without knowing where car No. 14 was; Botts is accused of disobeying orders in not having his car under proper control while going around the curve where the disaster occurred. The jury further charges that the Central Illinois Traction company employs incompetent men, and does not keep in its principal office some person from whom employes can get positive instructions in the movement of cars, and that instructions to employes on days when the regular schedule is not in force are misleading.

WARNER STILL FIGHTS.

Pension Commissioner to Appeal Victory of His Stepmother in Will Case.

Clinton, Ill. —There is general rejoicing here over the decision of Judge Cochran that Mrs. Isabella Robinson Warner, stepmother of Vespasian Warner, United States commissioner of pensions, has no negro blood in her veins, did not deceive her husband, and is entitled to dower and homestead rights in the estate of Dr. John Warner. The court held that at the time of his death Dr. Warner was worth $1,600,000. The effect of the decision if sustained by the supreme court, to which an appeal will be carried, is to give the widow the old Warner homestead in Clinton, $250,000, and an annual income of $10,000.

Commissioner Warner, who, as executor of his father's estate was defendant to the suit, concealed whatever chagrin he felt over the defeat of his efforts to prevent his stepmother from inheriting her share of his father's estate. "There would have been an appeal in any case," he said. "Now, I shall carry it vigorously to the supreme court." He said he was still convinced his stepmother's father was a negro.

Famous Composer Dead.

Bergen, Norway.—Edward Hagerup Grieg, the composer, died here Wednesday. He intended sailing for Christiania Tuesday and his baggage was already on board a steamer, when he was taken sick.

Metz Tiger New Creek Chief.

Washington.—The president Wednesday authorized the secretary of the interior to appoint Sub-Chief Metz Tiger, of the Creek Indians, to succeed Gen. Pleasant Porter as chief of the tribe.

American Painting Portrait of King.

Marienbad.—King Edward has commissioned Mrs. Leslie Cotton, a portrait painter of New York, to paint his portrait. Two sittings already have been given and the results are most satisfactory.

Double Crime by Rejected Suitor.

Worthington, Minn.—Mrs. William Brayon, a widow, was shot and killed here Tuesday morning by William Walsh because she refused to marry him. Walsh then blew out his own brains

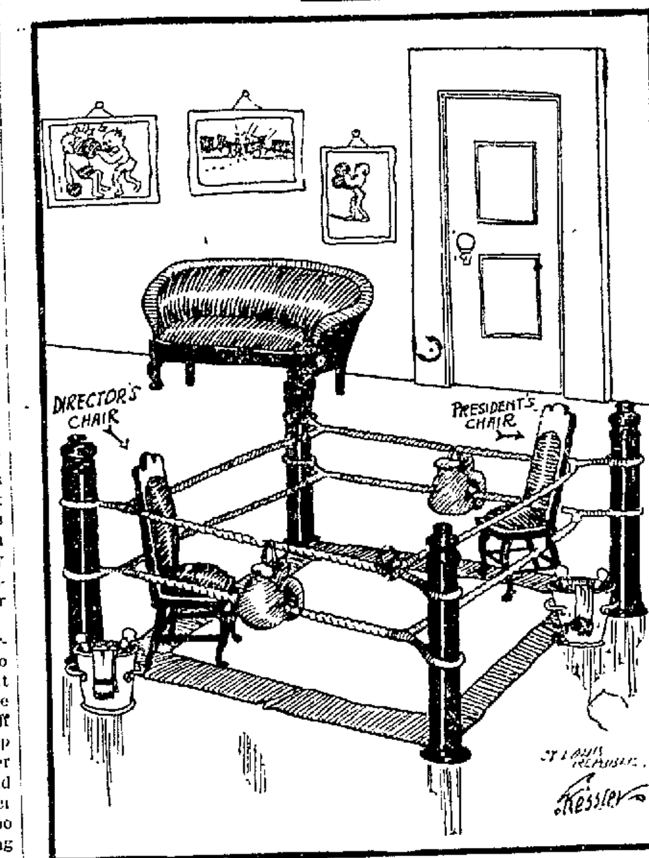

200 Dying Daily of Cholera.

Shanghai.—The epidemic of cholera among the Chinese in the lower Yangtse ports is spreading. About 200 persons die daily in the streets of Wuhu, in the province of Nganhwei, and Kiukiang, province of Kiangsi.

Edward Is Shocked by Song.

Marienbad.—King Edward has administered a rebuke for the singing of indelicate songs in places of public amusement, and his action, which was taken publicly, has created intense excitement in Marienbad.

PHILLIPS' WIDOW ARRESTED

CLEVELAND MURDER CASE HAS A SENSATIONAL TURN.

Dr. Richardson Tells Coroner's Jury of Peculiar Circumstances Surrounding Death.

Cleveland O.—Developments in the investigation into the death of John J. Phillips, coal operator, broker, banker and clubman, came thick and fast Wednesday and took a sensational turn late in the afternoon when Mrs. Phillips, widow of the deceased, was taken into custody by Chief of Police Stamberger, of the aristocratic suburb, East Cleveland.

Late Wednesday night Chief Stamberger made public a warrant which was issued by Justice Brown, of East Cleveland, charging Mrs. Phillips with the murder of her husband. The warrant charges second degree murder. Up to a late hour Mrs. Phillips, who collapsed about the funeral hour in the afternoon, had not regained consciousness. Physicians attending her say her condition is serious.

The police are reticent in the case, and whether they really believe Mrs. Phillips culpable in the murder or whether they merely believe that she can give facts concerning the tragedy which would solve the mystery surrounding it, does not appear at this time.

The inquest into the death of Phillips was resumed Wednesday morning by Deputy Coroner Houck. Dr. C. L. Richardson, the first witness, testified he had not been summoned until four a. m., more than three hours after Phillips was shot. He had been called by telephone. Mrs. Phillips admitted him to the house. She exclaimed:

"Oh, doctor, something dreadful has happened; Mr. Phillips has been shot by a burglar."

He found the wounded man in bed. He called Dr. Rhodes. After they reached the house Phillips asked them to leave the bedroom a minute as he wished to talk with his wife. Husband and wife were together alone for perhaps two minutes. He said there was a trace of blood on the stairway. The bed in which Phillips was found was much stained by blood. When the physicians reached Phillips they realized immediately, Dr. Richardson said, he could live but a short time.

BLACK HUNDREDS CHECKED.

Massacres Stopped by Action of Bankers and Exporters.

Odessa.—The Black Hundreds Tuesday suffered a severe blow by the closing of the grain bourse and the threat of the bankers to suspend financial transactions as a protest against the anti-Semitic outrages of September 2, when three men were killed and from 50 to 60 wounded. The disorders of last February were followed by similar steps, and financial transactions were then practically suspended.

A deputation of exporters called on the governor general Tuesday, and demanded that the authorities take action against the rioters, saying that if they did not, the exporters would leave Russia. The governor general assured the deputation that the police officials would suppress the raids of the Black Hundreds.

Strikers Become Fire Bugs.

Antwerp.—The striking dock laborers Wednesday night set fire to another lumber yard and stacks of lumber covering 3,000 square yards were soon blazing furiously. An entire regiment of troops was called out at ten o'clock to assist the firemen, but their efforts were futile. The loss was estimated at $800,000. Shortly after midnight the rioters set fire to two warehouses. Officers of the militia declared the strikers were in a dangerous temper as free liquor was being distributed to them in saloons.

Woman Murdered in Feud.

Clarksburg, W. Va. — Mrs. Fred Pickett, wife of the manager of the Bijou theater, was shot through the heart and instantly killed Tuesday afternoon, it is alleged, by Thomas Hannon, of the firm of Hannon & Murray, saloonkeepers. The shooting occurred on the front porch of the house where Mrs. Pickett was staying. Hannon immediately surrendered himself to the officers. A family feud of long standing is said to have been the cause of the crime. Mrs. Pickett was from Oil City, Pa.

Paducah Building Falls.

Paducah, Ky.—Without warning, the American Express company building collapsed at 5:10 Monday afternoon. A. F. Ingersoll was caught in the debris and it required more than two hours to dig him out. He was not badly injured.

E. R. Coffin Dies in Omaha.

Omaha, Neb.—E. R. Coffin, vice president of the Electrical Securities corporation of New York, and a prominent financier, died Monday at the Omaha General hospital.

FIVE YEARS FOR LOUIS GLASS.

San Francisco Telephone Man Is Sentenced for Bribery.

San Francisco. — Five years for Louis Glass, was the news message that sped with incredible rapidity to all parts of the city Wednesday morning from the Temple Sherith Israel at California and Webster streets, where was imposed the sentence that brought to a dramatic close the second trial of the vice president and former general manager of the Pacific Telephone and Telegraph company, convicted last week of the crime of bribery, a crime whose extreme punishment under the law of this state is 14 years. Only a small crowd, made up for the most part of lawyers and newspaper men, witnessed the imposition of sentence.

After his attorney had applied for and been granted a 30 day arrest of judgment, within whose expiration they will apply for bail and begin the prosecution of an appeal, Mr. Glass was removed by the sheriff to the county jail.

The crime for which Louis Glass was sentenced to San Quentin and of which he maintains his innocence, was the bribing of Supervisor Thomas F. Lonergan in the sum of $5,000 to vote against the application of the Home Telephone company for a franchise in this city.

RECEIVER FOR IRON COMPANY.

One of Bank Wrecker Harper's Concerns in Trouble.

Bristol, Va.—Judge A. M. Skeen of the United States court here Wednesday appointed Col. L. O. Pettit of Big Stone Gap receiver of the Union Iron and Steel corporation of New York, owning furnaces in Virginia, Ohio, Michigan and New Jersey.

The Union Iron and Steel corporation is an offshoot of the Union Steel and Chain corporation—the latter a $60,000,000 concern—organized several years ago by Edward L. Harper, formerly of Cincinnati.

It is reported that the receivership is a plan of the creditors of E. L. Harper to uncover his assets. Obligations aggregating several million dollars are held by Cincinnati and Chicago bankers against Harper, as a result of the failure of the Fidelity bank of Cincinnati about 20 years ago. Harper, it was alleged, wrecked this institution in an attempt to corner the wheat market. For this he was sentenced to eight years in the Ohio penitentiary.

Thief Robs Baron Rothschild.

Baden Baden, Germany. — A thief went through one of the principal hotels here Saturday night and stole a large amount of money and jewelry. Baron Goldschmidt Rothschild, of Frankfort, who is attending the races here, is reported to have lost from $2,000 to $20,000 and the Baroness Ephrussi, of Vienna, lost jewels which were reported to the police as being worth $18,000. There were many Americans stopping at the same hotel, but apparently they did not lose anything.

Two Cent Rate Ordered in Kansas.

Topeka, Kan.—At a late hour Wednesday afternoon the state board of railroad commissioners ordered that the railroads of Kansas put in a flat 2-cent fare rate, beginning Oct. 1.

Road Is in Bad Condition.

Jefferson City, Mo.—The board of railroad commissioners Tuesday reported on the condition of the Iron Mountain railroad. That portion of the main line between Poplar Bluff, Mo., and the Arkansas state line is reported in bad condition and a speed limit of 20 miles an hour is ordered until that part of the road has been repaired. The yards at Poplar Bluff are reported to be in bad condition and improvements have been ordered made. The rest of the line is considered reasonably safe.

Caid MacLean Well and Safe.

Tangier.—The anxiety expressed here regarding the safety of Caid Sir Harry MacLean, due to the protracted absence of direct news from the general, was relieved Monday by the arrival of letters from MacLean himself. He is in good health and is with Raisuli in the Ben Iarous territory. Letters from Raisuli to the British minister here, laying down the terms upon which the bandit chief will release MacLean, were also received. Raisuli suggests that an emissary be sent to Ben Iarous.

Fierce Battle at Casablanca.

Paris.—A terrific battle is reported to have occurred at Casablanca, Morocco, between the French and Spanish troops encamped there and a vast force of Moorish tribesmen.

Mounted on fleet horses the Arabs made a desperate charge, hoping to take the camp by surprise. They were met with volleys from the artillery and machine guns with which the French garrison is well provided and which mowed lanes through the tribesmen's ranks. The result of the encounter was favorable to Europeans.

HINDUS DRIVEN OUT

EAST INDIANS EXPELLED FROM THE BELLINGHAM MILLS.

SIX ARE BADLY BEATEN

Long Threatened Race Crusade Breaks Out Among White Laborers in the Washington Town.

Bellingham, Wash.—Six badly beaten Hindus are in the hospital, 400 frightened and half-naked Sikhs are in jail and the corridors of the city hall, guarded by policemen, and somewhere between Bellingham and the British Columbia line are 750 natives of India, beaten, hungry and half-clothed, making their way along the Great Northern railway bound for Canadian territory and the protection of the British flag

The long expected cry, "Drive out the Hindus," was heard throughout the city and along the water front Wednesday night. The police were helpless. All authority was paralyzed and for five hours a mob of half a thousand white men raided the mills where the Hindus were working, battered down doors of lodging houses and, dragging the invaders from their beds, escorted them to the city limits with orders to keep on going.

The trouble started at C and Holly streets, a district with Indian lodging houses. The houses were cleaned and the denizens started on their trek for the Canadian line. The mob then swept down on the water front and mill after mill was visited, the white employes joining the mob, and every Hindu was hustled outside.

Racial feeling has played no small part in the affair Every day whites are being replaced in the mills by the East Indians The invaders have become bold and insolent, many instances of women being pushed into the gutter, insulted on street cars, etc., being reported. General uneasiness of the whites is given as a reason for the outbreak.

The Hindus are all British subjects and their case is being placed before the British authorities.

TEN DEAD IN HOTEL FIRE.

Serious Loss of Life in Disaster at Shelton, Wash.

Tacoma, Wash.—Ten persons are known to have lost their lives in the burning of the Webb hotel at Shelton, 20 miles from here, early Thursday morning. Another person is dying and yet others may be found in the ruins.

The fire was discovered about 1:40 in the morning. It had started in the hotel annex, probably from a lighted cigar dropped in the sample room. The hotel was a three-story structure. The top floor was occupied by lodgers, but the exact number is not known.

Within a few minutes of the time the fire was discovered the hotel was a mass of flames. Screams and cries for help were coming from almost every window and dozens of people risked their own lives to help bring out the unfortunates. Those in the upper stories were cut off from the stairway and seven or eight jumped from the windows before help could reach them from the outside.

BIG FAILURE ON 'CHANGE.

Watson & Co., Grain and Stocks, Forced to Wall.

New York.—The failure of Watson & Co., members of the New York Stock and Produce exchanges, and of the Chicago Board of Trade, was announced in those exchanges Thursday. No cause was assigned for the failure nor was any estimate of the liabilities and assets made public.

The firm has had extensive connections in the west, maintaining offices in Duluth, Minneapolis, Fargo and Winnipeg. It is said to have carried on one of the biggest grain brokerage businesses in the country besides trading actively in railroad stocks, particularly those of the Great Northern and Northern Pacific railroads.

The members of the firm are Louis T. Watson, Henry P. Watson, Charles E. Anderson and Herschell V. Jones. Louis T. Watson is the only member of the firm residing in this city, the others being residents of Minneapolis.

Warship Coming to St. Louis.

Washington—Acting Secretary Newberry has ordered the tug Lebanon to tow the converted yacht Huntress from League Island, Pa., to Pensacola, Fla. There the Huntress will be formally turned over to the naval militia of Missouri, a crew from which will take the vessel to St. Louis. This will be the first time that a warship has been permanently stationed as far up the Mississippi river as St. Louis. Reports to the navy department from the recruiting parties in the middle west show the development of a remarkable interest in naval affairs in that section.

Brick Concern in Trouble.

Springfield, Ill.—Creditors of the McNeil Pressed Brick company of Jerseyville, Ill., with a plant valued at about $50,000, filed a petition in the United States circuit court Thursday alleging that the corporation is insolvent and asking that it be adjudged bankrupt. They allege that the company allowed an attachment to be issued in the circuit court of Jersey county in favor of certain creditors on Aug. 20, and permitted the sheriff of Jersey county to levy on all the stock on hand.

McKinley Monument Unveiled.

Buffalo, N. Y.—In a heavy downpour of rain and before a vast multitude, the McKinley monument on Niagara square was dedicated Thursday afternoon and formally turned over to the state of New York through Gov. Charles E. Hughes.

Man and Girl Drowned Together.

Muscatine, Ia.—Bodies of a young man and a girl clasped in each other's arms were found in the Mississippi river Thursday. There is nothing to establish their identity.

Snow Avalanche Buries Fifty.

Santiago, Chili.—Fifty persons are said to have been buried alive by a vast avalanche of snow that obliterated the Chilian custom house at Juncal. This station is on the Argentine frontier, high up in the Andes.

Failure Follows Trolley Wreck.

Mattoon, Ill.—Following the wreck that resulted in the loss of 17 lives, the Mattoon City Railway company and the Central Illinois Traction company, Thursday went into the hands of a receiver.

NOT THE TIME TO STOP.

Manager Saw the Possibilities in the Situation.

Jim Johnstone, the famous baseball umpire, said recently in New York that baseball crowds were far kinder to umpires than they used to be

"This is true of theater crowds, too," said Mr. Johnstone. "Why, with provincial touring companies in the past, maltreatment was regularly expected. In fact, the companies profited by it in more ways than one.

"I know of a company that was playing 'The Broken Vow' in Paint Rock, a one night stand. The audience didn't like 'The Broken Vow,' and eggs, cabbages and potatoes rained upon the stage.

"Still the play went on. The hero raved through his endless speeches, dodging an onion or a baseball every other minute, and pretty sore from those missiles that he hadn't been able to dodge.

"But finally a gallery auditor in a paroxysm of rage and scorn hurled a heavy boot, and the actor, thoroughly alarmed, started to retreat.

"'Keep on playing, you fool,' hissed the manager from the wings, as he hooked in the boot with an umbrella. 'Keep on till we get the other one.'"

PRESCRIPTIONS IN LATIN.

The Public Should Have Them Translated by the Druggists.

What virtue is there in the secrecy with which the doctor hedges about his profession?

"Professional etiquette" occupies a prominent place in the curriculum of every medical school, and when strictly analyzed "professional etiquette" seems to mean "doing what is best for the doctor, individually and collectively."

Among the things that "is best for the doctor" is the writing of his prescriptions in Latin, and thus keeping the public in ignorance not only of what it is taking for its ills, but forcing a call upon the doctor each time a prescription is needed.

In plain and unmistakable English the writing of prescriptions in Latin makes business for the doctors.

Let us say that you have the ague. You had it last year and the year before. Each time you have visited the doctor and he has prescribed for you —in Latin. You have never known what he has given you for the disease, and so each time you are forced to go to him again and give him an opportunity to repeat his prescription—in Latin, and his fee—in dollars.

If you ask the doctor why he uses Latin in writing his prescriptions, why he writes "aqua" when he means water, he will give you a technical dissertation on the purity of the Latin language, and the fact that all words are derived from it, etc. It will be a dissertation that you may not be able to answer, but it will hardly convince you.

It would be a good thing for the public to devise a little code of ethics of its own; ethics that will be "a good thing for the public individually and collectively."

Let us apply one of the rules of this code of ethics to you, the individual.

You call in the physician when you have the ague, the grippe, or any of the other ills to which human flesh is heir, and which you may have again some day. The doctor prescribes—in Latin, and you take this, to you, meaningless scribble to the druggist to have it compounded. Right here is where you come in, if you are wise. Say to the druggist that you want a translation of that prescription. It is your privilege to know what you are taking. While the doctor's code of ethics may not recognize this right it is yours just the same.

With the translated prescription in your possession you have two distinct advantages. You know what you are taking, and should you wish to call some other doctor at some time you will be able to tell him what drugs you have been putting into your system, and also if you should have the same disease again you can save yourself a visit to the doctor, and his fee, by taking this translated prescription to the druggist once more and having it refilled.

APPEAL THAT WAS HEEDED.

Judge Must Also Have Been Follower of the Gentle Art.

John Quincy Adams, of Massachusetts, third of that name, who died about ten years ago, was very fond of fishing, and not especially fond of his legal profession.

One day, the story runs, a case in which he was counsel was down for trial in a Massachusetts court. Mr. Adams did not make his appearance, but sent a letter to the judge. That worthy gentleman read it, and then postponed the case with the announcement:

"Mr. Adams is detained on important business."

It was afterward learned by a colleague of Adams that the letter read as follows:

"Dear Judge: For the sake of old Isaak Walton, please continue my case till Friday. The smelts are biting, and I can't leave."

She Experimented.

A little girl of five was taken to church one Sunday, and listened with unexpected attention to the sermon, which graphically told the story of the stilling of the tempest on the Sea of Galilee, and how Christ walked on the waves. In the afternoon her mother missed her and began an anxious search of the house. As she neared the bathroom she heard sounds of splashing, and hurried to the door to behold a small, excited face peering over the rim of the big white tub, and to hear a small, excited voice exclaim: "Say, mamma, this walking on the water is quite a trick."

Time to Fly.

The trust magnate leaped up from the banquet table and made a dive for his 100-mile-an-hour automobile.

"Hold on!" cried the astonished toastmaster. "Won't you wait for us to serve the dessert?"

"No," replied the nervous magnate; "I just saw a suspicious face loom up at the window. The next thing served will be a process."

And telling his chauffeur to put on full speed the wealthy fugitive headed for the next state.

A Knock.

"Jimmy," said the father, "there's a rip in your bathing suit. Go and sew it up."

"But papa," growled the boy, "mother will sew it for me."

"Never mind. I want you to learn to sew yourself. For," said the father, "some day you will get married, and then you won't have any mother—you will only have a wife."

GOOD DISH FOR INVALIDS.

Bavarian Creams of All Sorts Are Most Palatable.

Bavarian creams of all sorts make delicious and nourishing desserts for invalids. For chocolate Bavarian cream, soak half a box of gelatin in cold water for at least half an hour. In a double boiler heat one pint of milk and two ounces of grated chocolate, add the gelatin and stir until dissolved. Next add half a cup of sugar and remove from the stove, turn into a deep bowl and add one teaspoonful of vanilla; set this bowl into a pan of ice water and stir until it thickens like a sauce; then add a pint of cream whipped stiff. Stir lightly, pour into a mold, wet with cold water, set on ice and serve with whipped cream. This must be made very early in the morning if it is to be used for lunch or tea. If a fruit cream is desired substitute fruit juice, stewed and strained, for the milk, omitting the grated chocolate. Both raspberry and peach Bavarian cream are delicious.

Cheese and Mustard Sandwiches.

Cream some butter, adding to over tablespoonful two tablespoonfuls grated cheese seasoned lightly with paprika and made mustard. Mix thoroughly and spread Grated American or Swiss cheese mixed to a paste with salad dressing makes an excellent filling, as also cottage cheese mixed with parsley or cress and seasoned with paprika Other good combinations: with cottage or cream cheese are cream cheese and olives, green or black, chopped fine; cream cheese and chopped nuts, with or without mayonnaise; cheese and chopped dates or figs; cheese and chopped spinach moistened with lemon juice and mayonnaise; cheese with the yolks of hard-boiled eggs put through a ricer; cheese and sliced cucumber; cheese and preserved ginger, chopped; cheese, currant jelly and nuts.

Tasks That Do Not Pay.

Does it pay to darn socks repeatedly amid a multitude of other tasks, in order to save money that it may be spent for a silk petticoat, an extra feather in one's hat, or an expensive dessert for dinner? Does it pay to stand at the ironing board and smooth out ruffles and laces for children to wear once, perhaps, when it means mother so tired out that she cannot repress impatient words later in the day? Does it pay to do without the occasional day's help in the kitchen in order to spend the money for some unnecessary piece of furniture? No, none of these things ever pays in anything but heartache and tired nerves, in temper and friction. And so the housewife's best friend is a "sense of proportion" applied to daily life and the daily tasks of the home.—Pictorial Review.

Beads Modish.

If there is any thought of beads going out of style, present conditions do not indicate it. There are new styles, large beads in irregular shapes, small beads of pretty patterns, good ones, precious gems and some decidedly cheap, though strange to say, very pretty. Women are wearing all kinds and to many women they are very becoming. Amber is a favorite color at present, since the color looks beautiful worn with the new brown tints. Genuine amber beads are expensive, but there are some very clever imitations in the market which will satisfy most women. Many cheap beads can be made more elegant in appearance by stringing them on platinum wire and using gold clasps. It is the cheap cotton string and brass clasp which give more evidence of cheapness than the beads.

The Deadly Travel Letter.

Letter-writing is, of course, an entirely different thing from note-writing. It is the intimate chat of dear friends or the art of conversation between congenial people. All letters exchanged in friendly correspondence are bound to be interesting and welcome, except, and it should be emphasized, letters of travel. What is more deadly than a letter that consists of arrivals and departures of trains, locations of hotels, shopping lists and raptures over scenery?—The Delineator.

Parasols.

Attractive parasols of white taffeta silk have wide borders of coin spotted silk in various colors to match suits and hats. The parasols come in two qualities and can be bought for $2.50 and $5. White linen parasols with wide eyelet embroidered borders are marked $2.50. A pretty white taffeta sunshade, cross checked with black, is finished with a half-inch edge of colored silk hemstitched on. It has white furze handle. The parasol costs $3.25.

Use for Celery Leaves.

After cleaning the celery do not throw away the leaves. Wash them carefully, spread them out thinly and set them on the back of the stove to dry.

After they are thoroughly dried, rub them to a powder, and put them away in bottles. They will prove a delicious flavor to many different kinds of dishes.

Try a pinch in a chicken stew, or with the scalloped tomatoes.

Take Tuck in Under Hem.

A simple way to shorten wash linen or crash skirts that have a deep hem at the bottom is to take up a tuck on the inside of the hem. This need not be stitched on a machine or very particularly sewn, as the starch used in the laundry will hold it in position and it can be more easily ripped if the washing shrinks the material.

Fruit Cocktail.

Cut in small pieces three or four varieties of fruits, cooked or fresh, mix with sugar or sugar sirup and the juice of the fruit. Wine may or may not be added. The whole is served cold in sherbet glasses in hollowed out pineapple or orange shells especially prepared for it.

Doughnuts.

Add a large cupful of mutton fat or suet to the fat in which the doughnuts are to be fried. They will absorb less grease and will not be greasy.

Tutti Frutti for Invalids.

For invalids who are allowed to eat fruit there is nothing more dainty and refreshing than the following: Take one box blackberries, one-half pound cherries, peel and cut up four bananas, powder with sugar to taste and mix thoroughly. Do this early in the morning and set on the ice to get cold.

To Roast a Bird.

Roast a bird with the breast down the greater part of the time; the flesh will then remain more juicy.

CHAPTER XXI.—Continued.

"Good! but this is just wall here with with a layer of bricks and a thin coat of cement. A nice job it must have been to do the work, and it cost the price of a fleet hunt." I grumbled. "Take heart lad and listen" and Larry began pounding the wall with a hammer, exactly under the north stepost. We had sounded everything in and about the house until the process bored me.

"Hurry up and get through with it," I jerked impatiently, holding the lantern at the level of his head. It was sharply cold under the posts and I was anxious to prove the worthlessness of his idea and be done.

Thump! thump!

"There's a place here that sounds a little off the key. You try it."

I snatched the hammer and repeated his soundings.

Thump! thump!

There was a space about four feet square in the wall that certainly gave forth a hollow sound.

"Stand back!" exclaimed Larry eagerly. "Here goes with the ax."

He struck into the wall sharply and the cement chipped off in rough pieces, disclosing bricks beneath. Larry paused when he had uncovered a foot of the inner layer, and examined the surface.

"They're loose these bricks are, and there's something beside earth behind them!"

The bricks were set up without mortar, and I plucked them out and tapped with my knuckles on a wooden surface.

Even Larry grew excited as we flung the bricks out into the tunnel.

"Ah, lad," he said, "the old gentleman had a way with him. He had a way with him!" A brick dropped on his foot and he howled in pain.

"Bless the old gentleman's heart! He made it as easy for us as he could. Now, for the Glenarm millions,—red money all piled up for the ease of counting it, a thousand pounds in every pile."

"Don't be a fool, Larry," I coughed at him, for the brick dust and the smoke of Larry's pipe made breathing difficult.

"That's all the loose bricks, bring the lantern closer," and we peered through the aperture upon a wooden door, in which strips of iron were deep set. It was fastened with a padlock and Larry reached down for the ax.

"Wait!" I called, drawing closer with the lantern. "What's this?"

The wood of the door was fresh and white, but burned deep on the surface, in this order, were the words:

The Door
of
Bewilderment

"There are dead men inside, I dare say! Here, my lad, it's not for me to turn loose the family skeletons,"—and Larry stood aside while I swung the ax and brought it down with a crash on the padlock. It was of no flimsy stuff and the remaining bricks cramped me, but half a dozen blows broke it off.

"The house of a thousand ghosts," chanted Larry, as I pushed the door open, crawled through and dropped down inside.

Whatever the place was it had a floor and I set my feet firmly upon it and turned to take the lantern.

"Hold a bit!" he exclaimed. "Some one's coming,"—and bending toward the opening I heard the sound of steps down the corridor. In a moment Bates ran up, calling my name with more spirit than I imagined possible in him.

"What is it?" I demanded through the opening.

"It's Mr. Pickering. The sheriff has come with him, sir."

As he spoke his glance fell upon the broken wall and open door. The light of Larry's lantern struck full upon him. Amazement, and, I thought, a certain satisfaction, were marked upon his countenance.

"Run along, Jack,—I'll be up a little later," said Larry. "If the fellow has come in daylight with the sheriff, he isn't dangerous. It's his friends that shoot in the dark that give us the trouble."

I crawled out and stood upright. Bates, staring at the opening, seemed reluctant to leave the spot.

"You seem to have found it, sir," he said,—I thought a little chokingly. His interest in the matter nettled me. It was none of his affair, for one thing; and my first business was to go above for an interview with the executor,—a matter of immediate importance, as should have been clear to any one.

"Of course we have found it!" I ejaculated, brushing the dust from my clothes.

"Is Mr. Stoddard in the library?"

"Oh, yes, sir; I left him entertaining the gentlemen."

"Their visit is certainly most inopportune," said Larry. "Give them my compliments and tell them I'll be up as soon as I've articulated the bones of my friend's ancestors."

Bates strode on ahead of me with his lantern, and I left Larry crawling through the new-found door as I hurried toward the house. I knew him well enough to be sure he would not leave the spot until we had found what lay behind the Door of Bewilderment.

"You didn't tell the callers where you expected to find me, did you?" I asked Bates, as he brushed me off in the kitchen.

"No, sir. Mr. Stoddard received the gentlemen. He rang the bell for me and when I went into the library he was saying, 'Mr. Glenarm is at his studies. Bates,'—he says—'kindly tell Mr. Glenarm that I'm sorry to interrupt him, but won't he please come down?' I thought it rather neat, sir, considering his clerical office. I knew you were below somewhere, sir; the trap door was open and I found you easily enough."

Bates' eyes were brighter than I had ever seen them. A certain buoyant note gave an entirely new tone to his

There are new styles, large beads in irregular shapes, small beads of pretty patterns, good ones, precious gems and some decidedly cheap, though strange to say, very pretty. Women are wearing all kinds, and to many women they are very becoming. Amber is a favorite color at present, since the color looks beautiful worn with the new brown tints. Genuine amber beads are expensive, but there are some very clever imitations in the market which will satisfy most women. Many cheap beads can be made more elegant in appearance by stringing them on platinum wire and using gold clasps. It is the cheap cotton string and brass clasp which gives more evidence of cheapness than the beads.

The Deadly Travel Letter.

Letter-writing is, of course, an entirely different thing from note-writing. It is the intimate chat of dear friends or the art of conversation between congenial people. All letters exchanged in friendly correspondence are bound to be interesting and welcome, except, and it should be emphasized, letters of travel. What is more deadly than a letter that consists of arrivals and departures of trains, locations of hotels, shopping lists and raptures over scenery?—The Delineator.

Parasols.

Attractive parasols of white taffeta silk have wide borders of coin spotted silk in various colors to match suits and hats. The parasols come in two qualities and can be bought for $2.50 and $5. White linen parasols with wide eyelet embroidered borders are marked $2.50. A pretty white taffeta sunshade, cross checked with black, is finished with a half-inch edge of colored silk hemstitched on. It has a white furze handle. The parasol costs $3.25.

Use for Celery Leaves.

After cleaning the celery do not throw away the leaves. Wash them carefully, spread them out thinly and set them on the back of the stove to dry.

After they are thoroughly dried, rub them to a powder, and put them away in bottles. They will prove a delicious flavor to many different kinds of dishes.

Try a pinch in a chicken stew, or with the scalloped tomatoes.

Take Tuck in Under Hem.

A simple way to shorten wash linen or crash skirts that have a deep hem at the bottom is to take up a tuck on the inside of the hem. This need not be stitched on a machine or very particularly sewn, as the starch used in the laundry will hold it in position and it can be more easily ripped if the washing shrinks the material.

Fruit Cocktail.

Cut in small pieces three or four varieties of fruits, cooked or fresh; mix with sugar or sugar sirup and the juice of the fruit. Wine may or may not be added. The whole is served cold in sherbet glasses in hollowed out pineapple or orange shells especially prepared for it.

Doughnuts.

Add a large cupful of mutton fat or suet to the fat in which the doughnuts are to be fried. They will absorb less grease and will not be greasy.

Tutti Frutti for Invalids.

For invalids who are allowed to eat fruit there is nothing more dainty and refreshing than the following: Take one box blackberries, one-half pound cherries, peel and cut up four bananas; powder with sugar to taste and mix thoroughly. Do this early in the morning and set on the ice to get cold.

To Roast a Bird.

Roast a bird with the breast down the greater part of the time; the flesh will then remain more juicy.

CHAPTER XXI.—Continued.

"Good! but this is just wall here—earth with a layer of bricks and a thin coat of cement. A nice job it must have been to do the work,—and it cost the price of a tiger hunt," I grumbled.

"Take heart, lad, and listen," and Larry began pounding the wall with a hammer, exactly under the north gatepost. We had sounded everything in and about the house until the process bored me.

"Hurry up and get through with it," I jerked impatiently, holding the lantern at the level of his head. It was sharply cold under the posts and I was anxious to prove the worthlessness of his idea and be done.

Thump! thump!

"There's a place here that sounds a trifle off the key. You try it."

I snatched the hammer and repeated its soundings.

Thump! thump!

There was a space about four feet square in the wall that certainly gave forth a hollow sound.

"Stand back!" exclaimed Larry eagerly. "Here goes with the ax."

He struck into the wall sharply and the cement chipped off in rough pieces, disclosing bricks beneath. Larry paused when he had uncovered a foot of the inner layer, and examined the surface.

"They're loose—these bricks are loose, and there's something beside earth behind them!"

The bricks were set up without mortar, and I plucked them out and rapped with my knuckles on a wooden surface.

Even Larry grew excited as we flung the bricks out into the tunnel.

"Ah, lad," he said, "the old gentleman had a way with him—he had a way with him!" A brick dropped on his foot and he howled in pain.

"Bless the old gentleman's heart! He made it as easy for us as he could. Now, for the Glenarm millions,—red money all piled up for the ease of counting it,—a thousand pounds in every pile."

"Don't be a fool, Larry," I coughed at him, for the brick dust and the smoke of Larry's pipe made breathing difficult.

"That's all the loose bricks,—bring the lantern closer,"—and we peered through the aperture upon a wooden door, in which strips of iron were deep-set. It was fastened with a padlock and Larry reached down for the ax.

"Wait!" I called, drawing closer with the lantern. "What's this?"

The wood of the door was fresh and white, but burned deep on the surface, in this order, were the words:

The Door
of
Bewilderment

"There are dead men inside, I dare say! Here, my lad, it's not for me to turn loose the family skeletons,"—and Larry stood aside while I swung the ax and brought it down with a crash on the padlock. It was of no flimsy stuff and the remaining bricks cramped me, but half a dozen blows broke it off.

"The house of a thousand ghosts," chanted Larry, as I pushed the door open, crawled through and dropped down inside.

Whatever the place was it had a floor and I set my feet firmly upon it and turned to take the lantern.

"Hold a bit!" he exclaimed. "Some one's coming,"—and bending toward the opening I heard the sound of steps down the corridor. In a moment Bates ran up, calling my name with more spirit than I imagined possible in him.

"What is it?" I demanded through the opening.

"It's Mr. Pickering. The sheriff has come with him, sir."

As he spoke his glance fell upon the broken wall and open door. The light of Larry's lantern struck full upon him. Amazement, and, I thought, a certain satisfaction, were marked upon his countenance.

"Run along, Jack,—I'll be up a little later," said Larry. "If the fellow has come in daylight with the sheriff, he isn't dangerous. It's his friends that shoot in the dark that give us the trouble."

I crawled out and stood upright. Bates, staring at the opening, seemed reluctant to leave the spot.

"You seem to have found it, sir," he said,—I thought a little chokingly. His interest in the matter nettled me; it was none of his affair, for one thing; and my first business was to go above for an interview with the executor,—a matter of immediate importance, as should have been clear to any one.

"Of course we have found it!" I ejaculated, brushing the dust from my clothes.

"Is Mr. Stoddard in the library?"

"Oh, yes, sir; I left him entertaining the gentlemen."

"Their visit is certainly most inopportune," said Larry. "Give them my compliments and tell them I'll be up as soon as I've articulated the bones of my friend's ancestors."

Bates strode on ahead of me with his lantern, and I left Larry crawling through the new-found door as I hurried toward the house. I knew him well enough to be sure he would not leave the spot until we had found what lay behind the Door of Bewilderment.

"You didn't tell the callers where you expected to find me, did you?" I asked Bates, as he brushed me off in the kitchen.

"No, sir. Mr. Stoddard received the gentlemen. He rang the bell for me and when I went into the library he was saying, 'Mr. Glenarm is at his studies. Bates,'—he says—'kindly tell Mr. Glenarm that I'm sorry to interrupt him, but won't he please come down?' I thought it rather neat, sir, considering his clerical office. I knew you were below somewhere, sir; the trap door was open and I found you easily enough."

Bates' eyes were brighter than I had ever seen them. A certain buoyant note gave an entirely new tone to his voice. He walked ahead of me to the library door, threw it open and stood aside.

"Ah, here you are, Glenarm," said Stoddard. Pickering and a stranger stood near the fireplace in their overcoats.

Pickering advanced and offered his hand, but I turned away from him without taking it. His companion, a burly countryman, stood staring, a paper in his hand.

"The sheriff," Pickering explained, "and our business is rather personal—"

He glanced at Stoddard, who looked at me.

"Mr. Stoddard will do me the kindness to remain," I said and took my stand beside the chaplain.

"Oh!" Pickering ejaculated scornfully. "I didn't understand that your relations with the neighboring clergy were so intimate. Your taste is improving, Glenarm."

"Mr. Glenarm is a friend of mine," remarked Stoddard quietly. "A very particular friend," he added.

"I congratulate you—both."

I laughed. Pickering was surveying the room as he spoke,—and Stoddard suddenly stepped toward him, merely, I think, to draw up a chair for the sheriff; but Pickering, not hearing Stoddard's step on the soft rug until the clergyman was close beside him, started perceptibly and reddened.

It was certainly ludicrous, and when Stoddard faced me again he was biting his lip.

"Pardon me!" he murmured.

"Now gentlemen, will you kindly state your business? My own affairs press me."

Pickering was studying the cartridge boxes on the library table. The sheriff, too, was viewing these effects with interest not, I think, unmixed with awe.

"Glenarm, I don't like to invoke the law to eject you from this property, but I am left with no alternative. I can't stay out here indefinitely, and I want to know what's I'm to expect."

"That is a fair question," I replied. "If it were merely a matter of following the terms of the will I should not hesitate or be here now. But it isn't the will, or my grandfather, that keeps me, it's the determination to give you all the annoyance possible,—to make it hard and mighty hard for you to get hold of this house until I have found why you are so much interested in it."

"You always had a grand way in money matters. As I told you before you came out here, it's a poor stake. The assets consist wholly of this land and this house, whose quality you have had an excellent opportunity to test. You have doubtless heard that the country people believe there is money concealed here,—but I dare say you have exhausted the possibilities. This is not the first time a rich man has died, leaving precious little behind him."

"You seem very anxious to get possession of a property that you call a poor stake," I said. "A few acres of land, a half-finished house and an uncertain claim upon a school teacher!"

"I had no idea you would understand my position," he replied. "The seriousness of a man's oath to perform the solemn duties imposed upon him by law would hardly appeal to you. But I haven't come here to debate this question. When am I to have possession?"

"Not till I'm ready,—thanks!"

"Mr. Sheriff, will you serve your writ?" he said, and I looked to Stoddard for any hint from him as to what I should do.

"I believe Mr. Glenarm is quite willing to hear whatever the sheriff has to say to him," said Stoddard. He stepped nearer to me, as though to emphasize the fact that he belonged to my side of the controversy, and the sheriff read an order of the Wabana county circuit court directing me, immediately, to deliver the house and grounds into the keeping of the executor of the will of the estate of John Marshall Glenarm.

The sheriff rather enjoyed holding the center of the stage, and I listened quietly to the unfamiliar phraseology. Before he had quite finished I heard a step in the hall and Larry appeared at the door, pipe in mouth. Pickering turned toward him frowning, but Larry paid not the slightest attention to the executor, but leaned against the door with his usual tranquil unconcern.

"I advise you not to trifle with the law, Glenarm," said Pickering, as the sheriff folded his paper. "You have absolutely no right whatever to be here. And these other gentlemen—your guests, I suppose—are equally trespassers under the law."

He stared at Larry, who crossed his legs for greater ease in adjusting his lean frame to the door.

"Well, Mr. Pickering, what is the next step?" asked the sheriff.

"Mr. Pickering," said Larry, straightening up and taking his pipe from his mouth, "I'm Mr. Glenarm's counsel. If you will do me the kindness to ask the sheriff to retire for a moment I should like to say a few words to you that you might prefer to keep between ourselves."

I had usually found it wise to take any cue Larry threw me, and I said:

"Pickering, this is Mr. Donovan, who has every authority to act for me in the matter."

Pickering looked impatiently from one to the other of us.

"You seem to have the guns, the ammunition and the numbers on your side," he observed dryly.

"The sheriff may wait within call," said Larry, and at a word from Pickering the man left the room.

"Now, Mr. Pickering,"—Larry spoke slowly,—"as my friend has explained the case to me, the assets of his grandfather's estate are all accounted for,—the land hereabouts, this house, ten thousand dollars in securities and a somewhat vague claim against a lady known as Sister Theresa, who conducts St. Agatha's school. Is that correct?"

"I don't ask you to take my word for it, sir," rejoined Pickering hotly. "I have filed an inventory of the estate, so far as found, with the proper authorities."

"Certainly. But I merely wish to be sure of my facts for the purpose of this interview, to save me the trouble of going to the records. And, moreover, I am somewhat unfamiliar with your procedure in this country. I am a member, sir, of the Irish bar. Pardon me, but I repeat my question."

"I have made oath—that, I trust, is sufficient even for a member of the Irish bar."

"Quite," said Larry, nodding his head gravely.

He was not, to be sure, a presentable member of any bar, for a smudge detracted considerably from the appearance of one side of his face, his clothes were rumpled and covered with brick dust, and his hands were black. But I had rarely seen him so calm. He recrossed his legs, peered into the bowl of his pipe for a moment, then asked, as quietly as though he were soliciting an opinion of the weather.

"Will you tell me, Mr. Pickering, whether you yourself are a debtor of John Marshall Glenarm's estate?"

(TO BE CONTINUED.)

HER LITERARY LIKES

They had just met; conversation was somewhat fitful. Finally he decided to guide it into literary channels, where he was more at home, and, turning to his companion, asked, "Are you fond of literature?"

"Passionately," she replied. "I love books dearly."

"Then you must admire Sir Walter Scott," he exclaimed with sudden animation. "Is not his 'Lady of the Lake' exquisite in its flowing grace and poetic imagery? Is it not—" "It is perfectly lovely," she assented, clasping her hands in ecstacy. "I suppose I have read it a dozen times."

"And Scott's 'Marmion,'" he continued, "with its rugged simplicity and Scottish characters and his graphic, forceful pictures of feudal times and customs?" "I just dote on them," she replied.

"And Scott's Emulsion," he continued, a faint suspicion beginning to dawn upon him.

"I think," she interrupted rashly, "that it is the best thing he ever wrote."—Montreal Herald.

TROUBLE AHEAD FOR JACK

His Well Meant Advice Evidently Caused All the Trouble.

Recently a lady was seen hurriedly approaching the gate at the Grand Central Depot, in New York. She had a traveling bag in one hand, a hat box and a bunch of flowers in the other and an umbrella and a box of lunch tucked under her arm. There was not a moment to spare, but the gatekeeper stopped her mad rush.

"Let me have your ticket, please," he commanded.

"I can't," she said, turning first red and then white, "but I have one. Please let me pass. I've got to catch that train."

"You will have to show your ticket, madam," repeated the gateman sternly. Tears glistened in the lady's eyes.

"I tell you I can't, it's—it's— Well, I pinned in in my— Oh, I put it where I wouldn't lose it, and I can't get it till I have a chance to— Oh, do please let me through!" She was allowed to pass, and was heard to say as she made a dash for the train:

"The next time Jack worries me into putting things where I can't lose them I guess I'll know it."

Sickness as Age Advances.

At the age of 20, the average man loses six days yearly by illness; at 65 he will lose 26 days.

State Capital Notes

Weekly Budget Gathered by Our Special Correspondent at Madison.

Madison.—Electors of a city or village cannot by means of petitions or in any other way legalize an illegal contract or act of the village board or city council, says Judge Michael Kirwan, of Manitowoc, in a decision which he has handed down in the Duggan vs. Rusch case at Reedsville, heard at the June term of Circuit court. He emphasized the validity of the state law prohibiting village or city officeholders from entering into contracts with the municipalities they may serve. The decision makes permanent a temporary injunction issued in court a year ago preventing L. Rusch, a village trustee, from furnishing material or labor to the village of Reedsville while an official there. In the decision the court intimates that the officer is liable for prosecution and penalty for an attempt to collect the moneys due. Rusch performed certain work for the village of Reedsville while a trustee and furnished lumber because both could not be procured from anyone else, and the plea entered in defense that the village could get no one except Rusch to accept the contract, and that the work was imperative, is not recognized by Judge Kirwan, who adheres to the principle that an illegal act is always illegal, and no petition can make it otherwise.

Plan to Attract Immigrants.

Marinette county already has a development association organized to work with the state board of immigration in its efforts to people the northern wilderness and make grass and grain grow where now are to be found stumps and brush, ferns and wild berry bushes, timber and opportunities to make money. That it required nothing more than a suggestion from the state commissioner of immigration, A. D. Campbell, to bring about such an organization is explained by the fact that there are in Marinette county more members of the Wisconsin Immigration and Development association than in any other county in the state with the single exception of Milwaukee. Also, Elmer Grimmer of Marinette is a director of the association, the organization that brought about the establishment of the state board of immigration. Also, again, Marinette county in general and the city of Marinette in particular are awake and ready for a campaign which may be described in the vornacular of "going some." The articles of incorporation of the Marinette County Development association were forwarded to the secretary of state at Madison this week and the organization is now ready for business. That the membership of the body is not confined to citizens of the county seat is shown by the list of officers. J. B. Wood of Amberg is president, George E. Dogrand of Wausaukee, secretary, D. J. McAllister of Marinette, vice president, and L. J. McAlpin of Marinette, treasurer. The directors are F. E. Noyes, L. J. Evans, T. J. Redeling and P. A. Martineau, of Marinette; J. L. Hallenbeck, Dunbar; H. P. Bird, Wausaukee; S. D. Woodward, Peshtigo; Peter Nelson, Beaver; Philip Dwyer, Pound.

Hears Pleas for Mercy.

Gov. Davidson recently heard arguments on applications for the pardon of three persons serving life sentences in the state prison at Waupun for murder. After hearing the arguments he took the applications under consideration and will probably not reach a decision on any of them for some days. The first application heard was one for the pardon of Marvin M. Fonner, who was sentenced on May 10, 1883, for killing John L. Hesler near Grand Rapids in January of that year.

The second was for a pardon for John Bernhardt, who was sentenced for life on June 30, 1891, for killing Henry Schley of Waukesha with a club on the night of May 3, 1891.

The third petition heard was for the pardon of Wilhelmina Beehr of the town of Washington, Shewano county, who pleaded guilty on April 24, 1891, to the murder of Michael Sell in 1889.

Shot Guns Balk Railroad.

An attempt by the Chicago, Milwaukee & St. Paul railroad, abetted, it is charged by the board of regents of the university, to force a spur track across the property of A. W. Gratz on West Johnson street while Mr. Gratz and his family were away from home, was frustrated by the timely arrival of Fred Gratz who, with a couple of shotguns, kept two section crews off the property until help arrived, by threatening to blow off the head of the first man who attempted to start work.

Denies Paper Mill Merger.

Anson R. Flower of New York city, director of the International Paper company, in a statement emphatically denied that his company is back of the prospective print paper mill merger of the middle west. Mr. Flower is the first man in an executive position who has come out point blank and denied that it is the great eastern syndicate that is behind the movement. This again seems to lend substantiation to the report circulated some time ago that Standard Oil interests are back of the project.

Oshkosh to Have New Gym.

The executive committee of the state board of normal school regents at a meeting here considered plans for the new gymnasium at the school in Oshkosh. Plans for the new gymnasium at the Oshkosh school were submitted by four architects—H. Van Ryn of Milwaukee, William Waters of Oshkosh, Herman Wildhagen of Appleton, and W. T. Proudfit of Des Moines, Ia. After considering the plans for several hours the committee decided to defer making a selection for a month.

Decides Important Case.

Manitowoc.—Electors of a city or village cannot by means of petitions or in any other way legalize an illegal contract or act of the village board or city council, says Judge Michael Kirwan, of this city, in a decision which he has just handed down in the Duggan vs. Rusch case at Reedsville, this county, heard at the June term of circuit court, and he further emphasized the validity of the state law prohibiting village or city office holders from entering into contracts with the municipalities they may serve.

Ambitions of McGovern.

A political rumor of some moment is to the effect that District Attorney McGovern of Milwaukee will be the Republican candidate for mayor of that city next spring, the boyish executive having decided that one term is quite sufficient for him. There have been whisperings more or less pronounced for some months that Mr. McGovern would be a candidate for the Republican nomination for governor next year. It is quite natural that this other rumor should follow. If it turns out that the rumor is based on fact it will not mean that the district attorney has abandoned his hunt for the governorship. Indeed, if he is a candidate for mayor of Milwaukee that fact will be pretty good confirmation that he is a candidate for governor, and will push his claim with all of the skill and energy at his command. It is remembered by the older residents of the state that the position of mayor of Milwaukee has long been regarded as a fairly good stepladder upon which to climb to higher stations.

Severs Connection With Company.

E. B. Cottrill, general manager of the Wisconsin Telephone company has severed his connection with the company after a service of 21 years in which time he rose from a minor clerkship to one of the highest positions with the company. At the last meeting of the board of directors it was decided to combine the office of general manager with that of president. The consolidation of these two offices was proposed as much in the nature of an economy as well as better to align the lines of organization, other large corporations having found it profitable as well as advisable to have these two positions joined in one person. The additional work entailing greater responsibilities upon President Burt, the office of assistant general manager was created and filled by appointing H. O. Seymour who had acted as special agent for the company for the last five years. Under the circumstances Mr. Cottrill deemed it best to resign at once.

Against Municipal Ownership.

The municipal ownership of a lighting plant is a thing of the past in Superior, according to the vote of the council at its last meeting, when it was decided to make a contract with the local lighting company at a lower rate than formerly. The contract is for a year, but with a clause which may lengthen it to five years. Most of the aldermen in the council and the mayor were elected on municipal ownership platforms, but after attempting to build a light plant, and expending $800 for the services of an engineer in preparing plans they came to the conclusion that no money could be saved, and negotiated with the company for a new rate on which to base a contract. The vote was 14 to 2 in favor of making the contract.

Mayor Becker at Madison.

Mayor Becker of Milwaukee, and his secretary, George R. Gove, arrived here in the mayor's auto and left the next day for Beloit. Mayor Becker was the chief speaker at the reunion of the Dodge County Veterans' association. "Your lives and your deeds will always be sung," the mayor said. "It was your glorious example which inspired our younger generation when they left their homes, their wives and their children to enter the doubtful conflict with Spain in 1898. For their part in that short but eventful epoch they are deserving of the same glory which our people love to bestow upon the veterans of the war of the rebellion."

Attacks Open Berth Law.

The first attack on the new law providing that occupants of a double berth in a sleeping car shall have the right to direct whether the upper berth shall remain open or closed will be made at Green Bay by John Redmond, a negro porter for the Pullman company. He is accused by James H. Elmore and W. O. Stone of neglecting to comply with their directions to close the upper berth.

Post for Filipino Student.

Jose Gomez, a Filipino student in the state university, has been appointed a lieutenant in the constabulary in the Philippine islands, and will leave Madison in a few days for Manila to assume his new office. During the two years he was in the university he attained the reputation of being one of the best drilled and most efficient members of the university battalion.

Site for Marinette Post Office.

The postmaster general has accepted the proposal of the Albert Parth company to lease quarters for five years for the Marinette post office. The location is Main street between Wells street and Pierce avenue.

Made Normal School Regent.

Gov. Davidson has appointed Attorney H. O. Hamilton of Whitewater a member of the state board of normal school regents to succeed Attorney Paul Tratt, who has moved from Whitewater to Fort Atkinson.

To Choose Park Sites.

The state park board has appointed T. E. Brittingham and Senator E. E. Browne of Waupaca and W. H. McFetridge of Baraboo a committee to look up available sites for parks in the state.

New Bank Gets Charter.

State Banking Commissioner Bergh has issued a charter to the Bank of New Auburn at New Auburn, Chippewa county. Amt. Erickson is president, and L. Abrahamson cashier of the new institution.

Poisoned by Candy.

District Attorney Thompson of Racine is investigating a sensational poisoning case that may develop in arrests being made. Three families received through the mail boxes containing caramels and marked sample candy. A mother and daughter partook of the candy and were taken violently ill. There was sufficient arsenic in each caramel to kill a person. An impression prevails in police circles that a woman who is suspected is not right mentally.

RECIPES FOR FRENCH CAKES.

Dessert Dishes from the Land of Good Cooking.

Lorraine Cakes.—Take one quart of flour, a half pound of butter, a small teaspoonful of salt, and two eggs. Mix and knead these well together. Flatten on the board to the thickness of two silver dollars. Butter a pie dish and line it with the paste, making a rounded edge at the top. Put it in the oven for 15 minutes, and take it out. Beat two eggs together, with a pinch of salt and a half pint of cream. Pour into the paste. Scatter over a few small pieces of butter and put it again in the oven for another 15 minutes. Serve warm or cold.

Biscuit de Savoie.—Take four yolks of eggs and mix them with three tablespoonfuls of powdered sugar. Add and mix two ounces of rice flour, a tablespoonful of vanilla and the whites of the four eggs beaten to a froth. Butter a mold, put in the mixture and cook it in the oven for about 20 minutes.

Quarter Quartz Cake.—Weight four eggs and mix with them their equal weight of sugar, the same weight of flour, as much of butter and a teaspoonful of vanilla. Butter a mold, put the mixture in and bake it in the oven for 20 minutes.

Souse of Pigs' Feet.

Another substantial addition to the lunch hamper for a fishing or camping party, where men "grown ups" are in the ascendency, are pickled pigs' feet made in the good old Dutch way. The souse should be made a day or two before using, but it will keep for days. They may be eaten cold or broiled over the campfire, as preferred. Put the desired number of well-cleansed pigs' feet in a kettle, cover with boiling water, and cook for half an hour. Remove and plunge into cold water. Drain and return to the kettle. Cover with water and vinegar in equal proportions, adding to each gallon of the liquor a tablespoonful of salt, two tablespoonfuls of sugar, a tablespoonful of whole peppers, a bay leaf, three blades of mace, four large onions cut fine, and a teaspoonful of thyme tied in a little bag. Cook until the feet are very tender, remove and pack in a stone jar. Strain the liquor over the feet, and when cold cover tightly and keep in a cold place.

White Bread.

Chop into a quart of flour a tablespoonful of shortening, wet with a quart of warm water, add a tablespoonful of white sugar and beat in a half-yeast cake that has been dissolved in warm water. Beat hard for ten minutes, cover and set to rise over night. In the morning work in two and one-half quarts of white flour that has been sifted with a tablespoonful of salt. When the flour is thoroughly incorporated, turn upon a pastry board and knead for 15 minutes, then set to rise until double its original size. Knead again, make into loaves, kneading each loaf for five minutes. Set to rise for an hour, then bake.

Lima Beans Served in White Sauce.

A delicate way of serving lima beans is in a white sauce. Soak one pint of beans over night. About three hours before dinner drain, cover with two quarts boiling water and simmer gently for two and a half hours. Drain, saving the water for soup. Put into a saucepan a heaping tablespoonful butter, a half tablespoonful flour, a teaspoonful salt and pepper to season. Stir into this a pint of hot milk and cook, stirring constantly until smooth and thick. Season the beans with salt and pepper, simmer 15 minutes longer and serve.

Veal Scallop.

Chop into bits cold roast veal and the dressing with which it has been stuffed. Put a layer of this mince in a baking dish and moisten with veal gravy, then put in a layer of chopped canned mushrooms and sprinkle with buttered bread crumbs. Season with salt and pepper, add more chopped meat and proceed in this way until the dish is full, sprinkling the top with crumbs and bits of butter and wetting each layer of the meat with gravy. Cover the dish and bake until the contents bubble, then uncover and brown lightly before sending to the table.

Renovate Skirt.

An old black skirt may be successfully cleaned as follows: First of all, brush and shake it well to get rid of the dust, then brush carefully all over with a good hard clothes brush dipped in malt vinegar, using plenty of the vinegar. The skirt should then be hung out in the air for an hour to dry, and then pressed on the wrong side over a damp cloth. The ordinary serge or cloth skirt will be found to look like new after this treatment.

A Savory Green Corn Chowder.

This is a savory mixture of green corn, green peppers and tomatoes. To a half dozen ears of corn allow five tomatoes, five green peppers and five small onions, all minced. Cook the onions a golden brown in a little bacon fat, then add the other vegetables, having the corn cut from the cob as nearly whole as possible. Cover with boiling water and simmer for an hour. Season with salt and pepper and serve.

Fruit Gelatine.

Pare and core a dozen nice apples, put them in a pudding dish with a cup of sugar and half a pint of water, and bake until tender. When cool, lay in a glass bowl. Have wine or lemon jelly made, and when it begins to congeal pour it over the apples and set on ice. Whip some cream, flavor it with wine or lemon, and put around the jelly. Sliced peaches or bananas are also nice thus.—Good Housekeeping.

Salad Dressing.

Take a coffee cup; put into it one egg; a pinch of salt; two tablespoonfuls of sugar; one of flour; mix well, and fill up the cup with vinegar. Take a small, granite pan; put it on the fire with a piece of butter the size of a walnut. When warm, put in the contents of the cup; stir until thick and smooth. Put back in the cup, and when cool thin with sour cream. Will keep a month or more.

Clean Old Cloak.

It is not always necessary to send light cloth coats or cloaks to the cleaners whenever they appear a little soiled by smoke and dust. A successful method of removing surface dirt consists in rubbing the material with equal parts of oatmeal and whiting applied with a piece of flannel. The coat should be well shaken, and the same application repeated once or twice, until the cloth looks perfectly clean. After shaking it once more, it should be pressed on the wrong side with a warm iron.

News of Wisconsin

Interesting Happenings in the Various Cities and Towns of the State.

WILL MINISTER TO APACHES.

Milwaukee Pastor to Resign to Go as Missionary to Southwest.

Milwaukee.—Rev. J. F. G. Harders has resigned from the pastorate of the Jerusalem Evangelical Lutheran church of this city in order to devote himself to missionary work among the Apaches. He will leave with his family for Globe, Ariz., where he will be stationed in charge of the missionary field work among Indians of the southwest. Mr. Harders recently spent some time in the southwest in search of health and was thrown into intimate contact with the Indian tribe to whose spiritual wants he will now minister, and a warm attachment sprang up between him and some of the tribesmen.

VACATION FULL OF HORRORS.

Man Witnessed Two Murders and Attempt at Murder; Nearly Robbed.

Manitowoc.—That Chicago is a wicked place is the firm conviction of Arthur Wascher, an employe of the Julius Linstedt Co., of this city, who in a sight seeing tour of that town, witnessed two murders, an attempted murder, a desperate fight, and in the end was himself chased into an alley where he made his escape, by four thugs bent on robbery and possible murder. Wascher spent a portion of his vacation at Chicago, and now vows that neither money nor any other inducement will again lure him from his native heath to go to a large city in search of recreation.

CAUGHT IN WISCONSIN.

Harry D. Cotton, Wanted in Litchfield, Ill., for Forgery, Under Arest.

Milwaukee.—Harry D. Cotton, wanted at Litchfield, Ill., is under arrest here. The arrest was made on advice from the state's attorney and sheriff of Montgomery county, Ill., and he is held on the charge of embezzlement and forgery, waiting the arrival of Sheriff Bray, with requisition papers. Young Cotton is wanted in Litchfield on a charge of embezzling $100 from the International Text Book company, and the evidence appears to be conclusive. The young man is also accused of passing at least three worthless checks.

Will "Outlaw" Dietz Give Up?

Hayward.—Is John Dietz, the far-famed "hero of Cameron dam," ready to compromise his trouble with the Chippewa Lumber & Boom company? E. M. Worden, of Ladysmith, and two companions arrived here from the Dietz stronghold in an automobile and reported that Dietz said he would be glad to settle the cause. They also reported that a mysterious person is now in communication with Dietz. Mr. Worden was able to run his car up to a mile from the "outlaw's" homestead. At that point the trail was impassable, and they walked on to the house, meeting John and his son on the way. Mr. Worden says he received a hearty welcome.

One-Legged Man Rescues Girl.

Stowell.—E. A. McGrath, a one-legged station agent at Stowell, is a candidate for a Carnegie hero medal. While sitting in his station he was signaled that an engine was approaching. He went out, and, looking about, saw five-year-old Emma Hamich, playing on the track. McGrath hobbled up the track as fast as he could, reaching the child, dragged her from the rails, and then threw himself into the ditch just as the big engine thundered by.

More Arrests Are Made.

Kenosha.—The Kenosha police and the Northwestern railway detectives have reopened the search for the members of the gang of train robbers which recently burglarized many cars on the Northwestern road at small stations in this county, and as a result of the renewed activity, Charles Griffin, and Walter Lyons, both Milwaukee men, are in jail here awaiting a hearing.

Milwaukee Banker Dead.

Milwaukee.—Samuel Marshall, founder of the Marshall & Ilsley bank and the oldest banker in Milwaukee, died at his home, 40 Prospect avenue, at the age of 87 years, after an illness of five weeks. An attack of kidney trouble, accentuated by old age, was too much for the veteran banker, and after sinking gradually for the last week, he passed away quietly.

Transfer Men Organizing Combine.

Eau Claire.—All the transfer men of this city are making plans for organizing a combine for the purpose of fixing a scale of prices that will be uniform for hauling baggage, passengers and doing dray work.

Fire Imperils Factory.

Racine.—Fire which started in the engine room of the Racine-Sattley Co., at Racine Junction, for a time imperiled the whole plant. It was extinguished, however, with a loss of only $2,000.

Killed by a Crowbar.

Manitowoc.—George Norkowski, an employe of the Chicago & Northwestern handcar crew, met instant death when a crowbar used in lifting rails slipped from his grasp, striking him with such force in the chin as to cause almost instant death.

Six Times Wedded Woman Dies.

Green Bay.—Mrs. Mary Smith, of the town of Howard, is dead. She had been married six times and was living with her sixth husband at the time of her death.

Potato Crop Blighted.

Waupaca.—The late potato crop in many parts of the surrounding country, which up to about a week ago looked promising, has been struck with the blight, caused by the hot, damp weather of the last week. The early potatoes were about one-third of an average crop.

Death in Green Bay Hotel Fire.

Green Bay.—One life was lost and damage to the extent of $20,000 was done by fire in the Beaumont hotel, one of the oldest hotels in the state.

SPRING GREEN CELEBRATES.

Village Observes Its Semi-Centennial at Fair Time.

Spring Green.—The intercounty fair at Spring Green is a great success. Every department is full to overflowing. It has been necessary to erect new stables and stalls. A remarkable exhibit of children's work is on exhibition in Ferry hall. Every school in Milwaukee is represented, in charge of Miss Bessie Buckley, a Milwaukee teacher, and the work of the great schools of Liverpool, England, Lyons, France, Hongkong, China, Edinburg, Scotland, and many others are placed side by side for comparison. On Friday the village celebrated its semi-centennial and Gov. Davidson and wife, with state, county and municipal officials generally, were present.

EFFORT TO DIE IS FUTILE.

Man Jumps Into Lake and Is Saved After Struggle.

Kenosha.—Albert Bever, 55 years of age and claiming Milwaukee as his home, made a spectacular attempt at suicide here when he leaped from the Simmons docks at the foot of Park street into the lake. He was rescued by employes of the Simmons Manufacturing company. Before the man was carried to the beach he made a terrific struggle, insisting that he desired to die. After he was safe out of the water he was locked up in the county jail pending the arrival of his relatives. The man is supposed to be insane.

CHALLENGE ENDS IN DEATH.

Dared to Climb Pole, Man Is Electrocuted.

Superior.—Henry A. Curry, a Great Northern switchman, was instantly killed by being electrocuted at the top of a telegraph pole. The young man was standing in front of his boarding house with a number of friends, and one of them dared him to climb the pole. He took the dare and when he reached the top he grasped hold of two wires. The insulation was defective and the man was instantly killed. He was a single man and has no relatives here, having come here but a short time ago from Detroit, Mich.

To Round Up Tax Dodgers.

Milwaukee.—There will be no more tax dodgers in the United States within three years if the plan of Tax Commissioner William F. Hooker, of Milwaukee, is carried out. Mr. Hooker is preparing to form a national association of tax commissioners and perfect a working system of assessments that no one shall escape. Mr. Hooker proposes that each tax commissioner exchange reports and thus find out who is escaping taxation.

Dock Breaks; 14 in Water.

Green Bay.—Fourteen people, three of them women, were thrown into Green Bay by the breaking of a dock at Bay Beach. Several lives were nearly lost. The men rescued the women. The water was over five feet deep. J. Clich, Will Neusen and James Grose made the rescue of the three women. It was their wives who carried the babies. A number of people were injured by the breaking of the dock.

Soil Girls' Waists.

Appleton.—Three complaints to the general offices of the Wisconsin Traction, Heat, Light & Power company, to the effect that conductors on interurban cars had soiled white shirtwaists in assisting women to and from cars, has resulted in a general order from the managing office of the concern that conductors shall assist only very old women and children.

Lost Faith in Banks; Robbed.

Superior.—Sam Tetson and wife Lizzie are held on a charge of robbing Henry Johnson. Johnson had $1,500 in gold under a plank and found it missing. He claimed that Mrs. Tetson watched him dig the hole and although he tried to throw her off the scent he did not succeed. Tetson had $100 in gold on his person when arrested.

Lightning Kills Three.

Milwaukee.—During an electrical storm which passed over here Mrs. Hannah Alfter of West Allis was struck and instantly killed. At Waukesha George Haertel, aged 60 years, a farmer, and William Cannonsburg, a farmer at Kenosha, were also killed.

Gored by Bull; Is Dead.

Antigo.—Carl Dumjohn, aged 65 years, was badly gored by an angered bull at his home, near Summit Lake village, north of here, and died shortly afterward. The animal had escaped from its enclosure and Mr. Dumjohn was attempting to drive it back.

Crop Outlook Alarming.

Oshkosh.—The farmers in Winnebago county are very pessimistic over the crops. Some farmers are nearly ruined.

Burglars at Marinette.

Marinette.—Justice Jeremiah O'Leary, a veteran lawyer, discovered that his safe in his office had been swept clean by burglars and many valuable documents are gone. It is believed the burglary was committed with the hope of destroying a will.

Ptomaine Kills Children.

Galesville.—Two children are dead and a third is suffering from ptomaine poisoning in the family of John Reichel, a farmer near here. The fatalities are due to eating spoiled fish.

Makes Gift of Old Curio.

Appleton.—Judge N. C. Griffin has presented Lawrence university with a copy of the Ulster County Gazette, printed January 4, 1800. It contains a notice of the death of George Washington.

Play May Cause Death.

Appleton.—While scuffling playfully with her mother at their home in Neenah Miss Clara Arft gave her mother's shoulders a shrug that resulted in developing an attack of pleurisy that is likely to prove fatal.

Council Rooms, Sept 3, 1907.

Council met in regular session. Mayor Wheelan presiding. Present.—Aldermen, Arpin, A D. Hill, Steib, Rowson, Nisson, Getzlaff, Panter, Kubisiak, Jackson, Ristow, Lyon, G M. Hill and Hansen.

On motion, the reading of the minutes of the last regular meeting was dispensed with.

There was presented the following communication from the Board of Education and, on motion, the same was referred to the comptroller to report upon at the next meeting of the Council.

Grand Rapids, Wis., Sept. 2, 1907.

To the Common Council,
Grand Rapids, Wis.

Gentlemen —We hereby certify, on behalf of the Board of Education of this city, that it will be necessary to raise for school purposes $35,000.00 by direct taxation. Of this amount $1305.00 is for kindergarten purposes.

Frank Pomainville
President of the Board of Education.
H. S. Youker.
Clerk of the Board of Education

The Sidewalk committee to whom had been referred the petition of W. A. Drumb, et al, for the placing in proper repair of that portion of the sidewalk on First Ave. North lying between the MacKinnon corner and the Tribune Printing Office reported, recommending that the prayer of the petitioners be granted and the said sidewalk put on grade. On motion, the report of the Committee was adopted and the Committee instructed to proceed with the work.

The Street committee to whom had been referred the petition of T. E. Mullen, et al reported, recommending that in place of the street being lowered at this time, that there be a few catch basins put in along the street.

Motion made and seconded that the Street committee be authorized and instructed to take whatever action they deem proper to give the necessary relief to the petitioners.

Motion made and seconded that the original motion be amended so as to adopt the Committee's report. Vote taken on the amendment and the same was carried.

The Street committee to whom had been referred the petition of John A. Gaynor, et al, praying for the extending and opening of what used to be known as Main St. (now Second St.) from its present northerly terminus to the depot grounds of the Green Bay & Western Railway reported, recommending that the prayer of the petitioners be granted and, on motion, the report of the Committee was adopted.

On motion, by unanimous vote the Clerk calling the roll, the Clerk was instructed to draw an order of $25.00 in favor of the Rablin estate, in payment of a strip of land to be used in the extension of Second St.

The city Attorney, to whom had been referred the claim of Frank Stahl for $29.69 on account of error in delinquent return, made the following report which was, on motion, accepted.

"To the Hon. Mayor ar Common Council of the city of Gr. d Rapids, Wis.

Gentlemen:—With reference to the claim of Frank Stahl for reimbursement of certain money paid by him to said city on account of not returning certain taxes as delinquent, will say that on interviewing assessor Jones he states that he has reassessed said property and therefore the city will receive said tax this coming tax paying time or credit when same is returned delinquent and then the within claim will be due Mr. Stahl.

However the payment of the same at this time or a few months later will make but little difference and therefore your Honorable body will use your discretion in the matter. J. J. Jeffrey,
City Atty."

On motion, by unanimous vote the Clerk calling the roll, the claim of Frank Stahl for $29.69 was allowed.

The city Attorney to whom had been referred the claim of W. L. Compton for $5.95 presented the following report which was, on motion, accepted.

"To the Hon. Mayor and Common Council of the city of Grand Rapids, Wis.

Gentlemen:—With reference to the within claim of W. L. Compton will say that there is no liability on the part of said city for said claim.

J. J. Jeffrey,
City Atty."

There was presented the petition of T. J. Cooper and 19 others, petitioning your Honorable Body to cause the telephone poles standing on the easterly side of Fourth Ave. North to be placed in the proper position in order that shade trees may be planted between the curbstone and sidewalk on the said easterly side of Fourth Ave. North, the present location of said poles rendering the successful planting of shade trees impossible.

On motion, the above petition was referred to the street committee.

There was presented the petition of J. L. Nash, and 8 others, praying your Honorable Body to open up and place in good passable condition a street beginning at a point on Oak St. between lots owned by Henry McCann directly east of his residence and running in a southerly direction to intersect with Birch St., (the street which is proposed to be opened from Third St. to the Lincoln High school) a distance of two blocks. Also to lay a sewer pipe on said street to connect with the sewer on Oak St. On motion, the petition was referred to the street committee and to the sewer committee.

Ordinance No. 111, regulating the running and driving of automobiles within the city limits, was presented.

Motion made and seconded that Section 1 of the ordinance be amended so as to limit the speed on certain streets to eight miles per hour instead of six miles.

Ordinance No. 111.

An ordinance to regulate the speed of automobiles and the manner of crossing the wagon bridge with same, in the City of Grand Rapids, Wis.

The Common Council of the City of Grand Rapids, do ordain as follows:—

1. It is hereby declared to be unlawful for any person or corporation, to run, drive, or cause to be run or driven, or allow to be run or driven any automobile of any kind or description, within the limits of said City, at a speed to exceed ten (10) miles per hour, and on the following named streets at a speed to exceed six (6) miles per hour: On Grand Ave. between the St. P. depot and the wagon bridge; on First street between Vine street and the Library building; and on Second street between Oak street and the said Library building.

2. It is hereby declared to be unlawful for any person or corporation to run or drive any automobile of any kind or description, or cause or allow the same to be run or driven on the Wagon bridge in said City at a speed greater than six (6) miles per hour, or pass any team or teams, horse or horses, going in the same direction as said automobile while on said bridge.

3. Any person found guilty of violating sections one or two of this ordinance shall on conviction thereof be liable to a fine of not less than Two dollars and not more than Twenty-five dollars and costs of suit, and in case of failure to pay said fine and costs the defendant shall be punished by imprisonment in the County jail of Wood County, Wis., not less than one and not more than twenty days.

4. This ordinance shall take effect and be in force from and after its passage and publication.

W. E. WHEELAN,
Mayor.

Passed, approved, and adopted by the Common Council of the City of Grand Rapids, Wisconsin, this 3rd day of Sept A. D. 1907.

Attest C. E. BOLES,
City Clerk.

S. L. Stevens of Nekoosa was in the city on Monday. Mr. Stevens reports that he has sold out his business at Nekoosa and that it is his intention to remove to this city to live in the near future.

PORT EDWARDS.

Miss Anna Gaylor, one of our popular young ladies was married in the Lutheran church in Grand Rapids on Thursday to Gust Zimmerman of Fort Atkinson. After the ceremony a big wedding dinner was served at the home of the bride's father, to which were seated a large number of friends.
